Re: Phase I Environmental Site Assessment Report
Future Edgeview II — 981 Peach Avenue, Memphis, Tennessee

Dear Mr. Battin:

EnSafe Inc. is pleased to provide the enclosed Phase I Environmental Site Assessment Report for the above-referenced property.

If you have any questions or require additional information, please contact me at 901-372-7962 or mcooley@ensafe.com.

Respectfully submitted,

EnSafe Inc.

EXECUTIVE SUMMARY

EnSafe Inc. performed a Phase I Environmental Site Assessment (ESA) of the Future Edgeview II property at 981 Peach Avenue, Memphis, Shelby County, Tennessee (subject property), in conformance with the ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation E1527-21 (ASTM E1527-21). This Executive Summary provides an overview of the Phase I ESA findings with sufficient information to understand the conclusions and environmental professional opinion that resulted from interviews, records review, and a site reconnaissance on March 16, 2026.

Subject Property

- The subject property encompasses approximately 1.09 acres (proposed Lot 2) within a 3.82-acre parcel identified as Shelby County Parcel 051017-00021 (site property), occupying the undeveloped east portion of the collective site property parcel associated with 981 Peach Avenue. The subject property is owned by MHA and is planned for multi-family housing development within the Future Edgeview II phase in the Legends Park Subdivision.

- The subject property was developed as early as 1897 with multi-family residential buildings associated with the former Dixie Homes public housing development from 1950 until 2006, when the area was cleared for redevelopment within the Legends Park Subdivision. The subject property is currently vacant.

- The BVA Site ID 79-846S1 includes the subject property, including the west-adjoining property, with the collective parcel identified as the site property. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater; and 2) the presence of hydrocarbons and dry-cleaning solvents in soil gas. Additionally, numerous sites in the subject property's surrounding area have reported releases of hazardous substances and/or petroleum products. An amended BVA (2026) indicates hazardous substances, solid wastes, and/or other pollutants are determined to be present on the site property to an extent that may not have yet been fully characterized.

- The subject property is subject to Land Use Restrictions that 1) prohibit the installation of water wells and use of groundwater at the subject property; 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in accordance with a TDEC-approved soil management plan; and 3) may require the installation of soil vapor mitigation systems on buildings constructed at the subject property.

- Minkie Jos, a former clothes cleaner and presser, was identified at the subject property circa 1921. No additional information was identified from records review or interviews; however, it is important to note that historical documents from the 2020 Phase I ESA identify a storefront at this address, which could potentially have been operated as a dry cleaner.

- Gordon Cleaners and Dyers, at the historically upgradient south-adjoining address of 311 Decatur Street, was identified as a former clothes cleaner and presser in the 1932 historical city directory. No additional information about the former potential dry cleaner has been identified.

- The subject property address of 981 Peach Avenue is not listed on environmental databases researched; however, the site property, including the subject property, is located within the Legends Park VCP/BVA site.

Surrounding Area Properties

- The subject property is located in a predominantly residential area, adjoined by Peach Avenue, Interstate 40, and residential parcels progressively to the north; to the east by residential parcels and Columbus Baptist Church; to the south by residential townhomes; and to the west by a developed senior-living apartment building (Edgeview at Legends Park). Historical records indicate the surrounding area was mostly developed for residential and sporadic commercial purposes as early as 1897.

- The west and south-adjoining properties are located within BVA Site ID 79-846. PAH-impacted soils were used as geotechnical fill material on the west-adjoining (site) property. In accordance with BVA Site ID 79-846, to prevent exposure to the PAH contaminants, the soil is contained beneath an orange witness barrier and clean fill material.

Environmental Professional Opinion

This assessment has identified the following *recognized environmental conditions, controlled recognized environmental conditions,* and *significant data gaps* in connection with the subject property:

- The current BVA and the number of sites in the subject property area with reported releases of hazardous substances and/or petroleum products constitute a REC.

- The subject property is subject to Land Use Restrictions, which are considered a CREC.

- The absence of information associated with Minkie Jos, a former clothes cleaner and presser, likely operating at the subject property circa 1921, is considered a *significant data gap*.

- The absence of information associated with Gordon Cleaners and Dyers, at the historically upgradient south-adjoining address of 311 Decatur Street, is considered a *significant data gap*.

This Executive Summary is an excerpt of a detailed Phase I ESA report that includes elements necessary for proper interpretation, including definitions, limitations, exceptions, and deviations to ASTM E1527-21 and established scope of work. As such, the Executive Summary should not be used independently of the Phase I ESA report.

1.0 INTRODUCTION

EnSafe Inc. was retained by PennRose to conduct a Phase I ESA of the Future Edgeview II property at 981 Peach Avenue in Memphis, Shelby County, Tennessee (subject property), as shown in Figure 1 (Appendix A) Site Location Map.

The subject property encompasses 1.09 acres (proposed Lot 2) within a 3.82-acre parcel identified as Shelby County Parcel 051017-00021 (site property), occupying the undeveloped east portion of the collective site property parcel associated with 981 Peach Avenue. The subject property is planned for multi-family housing development within the Future Edgeview II phase of the Legends Park Subdivision, accompanying the west-adjoining multi-family structure encompassing the remaining approximately 2.73 acres of the site property parcel, collectively owned by MHA. Figure 2 (Appendix A) is a Site Layout Map, which shows the subject property layout and key site features. Significant features of the subject property are detailed in Sections 2 and 3.

The subject property is in a predominately residential area, adjoined by the properties detailed in the table below. Additionally, the subject property is within the 30.91-acre Legends Park Subdivision (former Dixie Homes housing complex). Figure 3 (Appendix A) is a Site Vicinity Map.

Direction	Parcel Identification/Address	General Description (e.g., type of property, uses, occupants)
North	051018 00020 0 Peach Avenue	• Owned by Emanuel Baptist Church • Vacant grass-covered parcel • 0.16 acre
	051018 00018 0 Decatur Street	• Owned by the State of Tennessee • Vacant grass-covered parcel with a portion of a pedestrian overpass • 0.05 acre
East	020088-00001 1027 Peach Avenue	• Owned by Faye M. Green • Developed with a 2,215-square-foot single-story apartment building • 0.14 acre
	020088-00023 346 Decatur Street	• Owned by Faye M. Green • Vacant grass-covered parcel • 0.12 acre
	020088-00017C 324 Decatur Street	• Owned by Columbus Baptist Church • Developed with an approximately 8,800-square-foot church and associated paved parking area • 1.31 acres
South	051017-00022 942 Peach Avenue	• Owned by MHA • Subdivided, vacant grass-covered parcel associated with 942 Peach Avenue parcel (northwest) • Approximately 0.14 acre

Direction	Parcel Identification/Address	General Description (e.g., type of property, uses, occupants)
	051017-00007 0 Decatur Street	• Owned by MHA • Developed with four townhome structures (ranging from approximately 2,600 to 3,400 square feet) and an associated 8,200-square-foot paved parking area • Occupied townhome structures include addresses 313 Decatur Street and 992 through 1010 Delmar Avenue (even) • 1.15 acres
West	051017-00021* 981 Peach Avenue	• Owned by MHA • West portion of the site property parcel, developed with an approximately 21,625-square-foot senior-living apartment building, identified as Edgeview at Legends Park, with an associated 15,500-square-foot paved parking area enclosed by metal fencing • Consists of the remaining 2.73 acres of the collective 3.82-acre site property parcel

Note:
* Only the east portion of the parcel (proposed Lot 2) associated with 981 Peach Avenue is included in the subject property.

1.1 Purpose

The subject property was assessed with respect to the range of contaminants within the scope of CERCLA and petroleum products. The ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation E1527-21 (ASTM E1527-21) is the current industry standard used to define good commercial and customary practice for conducting an ESA of a parcel of commercial real estate. In accordance with ASTM E1527-21, this Phase I ESA is intended to identify evidence of the following.

- *Recognized environmental condition* or REC — "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

- *Controlled recognized environmental condition* or CREC — "a *recognized environmental condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

- *Historical recognized environmental condition* or HREC — "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A *historical recognized environmental condition* is not a *recognized environmental condition*."

- *De minimis condition* — "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis condition* is not a *recognized environmental condition* nor a *controlled recognized environmental condition*."

1.2 Scope of Services

The Phase I ESA includes the following elements:

- Reconnaissance of the subject property on March 16, 2026, by Mr. Kevin Staggs of EnSafe. Select photographs taken during the site reconnaissance are in a Photo Log in Appendix B.

- Interviews with personnel by Mr. Staggs of EnSafe, discussed in Section 2.

- Review of the following standard historical resources for the subject and adjoining properties; select copies are provided in Appendix C or as noted in Table 1.

Table 1

Table 1 Standard and Other Historical Sources				
Historical Resource	**Date(s) and Source(s)**	**SP**	**AP**	**Appendix [or NA/NP]**
Property deeds/Building records	Records obtained on March 12, 2026, from the Shelby County Register of Deeds online database included: Ownership, lien, LUR, and site property building records.	☒	☒	F
Property tax files	Records obtained on March 12, 2026, from the City of Memphis and Shelby County Trustee online tax databases included: • Historical tax information for the subject property	☒	☐	F

- Review of physical setting resources provided by a commercial database search company, which included the most recent USGS 7.5-Minute topographic map, in Appendix D.

- Review of standard and additional federal, state, and local government records for the subject property and properties within ASTM E1527-21 AMSDs. Database search information is provided in Appendix E.

- Review of historical, physical setting, and regulatory information from previous Phase I ESAs that include the subject property (EnSafe: November 2020, February 2022, September 2022, January 2023, June 2023). The most recent reports (June and January 2023) are included in Appendix G; the January 2023 Phase I ESA is included in Appendix F of the June 2023 Phase I ESA.

- Review of the historical resources (i.e., USGS topographic maps, aerial photographs, fire insurance maps, and city directories), land-use and TDEC regulatory records included in prior Phase I ESAs.

- Review of regulatory information available from the U.S. EPA Envirofacts website and TDEC DoR and DUST online map viewers. Select information for the subject property is provided in Appendix F.

- Review of information from the websites listed in Section 6.

1.3 Client Information and User Responsibilities

EnSafe was retained by PennRose (user) to conduct the Phase I ESA. According to ASTM, the user shall make known the reason for the Phase I ESA. In contracting EnSafe for the Phase I ESA, as documented in the User Questionnaire included in Appendix G, Mr. Matthew Battin, on behalf of PennRose, indicated the Phase I ESA was being conducted to obtain financing.

1.4 Non-Scope Items

At the request of PennRose, and as documented in Appendix G, EnSafe's Phase I ESA scope of work was not expanded to include consideration of environmental issues that are beyond the scope of ASTM E1527-21.

1.5 Qualifications

Appendix H includes a resume that documents the qualifications of the EP responsible for this Phase I ESA.

2.0 INTERVIEWS

2.1 Owners, Operators, Occupants, Key Site Manager, Local Officials

Table 2 lists personnel interviewed, indicates their association with the subject property or this Phase I ESA, and summarizes topics discussed and information provided.

Table 2
Summary of Interviews

Interviewee Name and Title or Affiliation	ASTM E1527-21 Association with Subject Property	Date	Content/Section Discussed
Ms. Deborah Payne MHA	Key Site Manager	March 15 – March 25, 2026	Provided information regarding historical and current subject property uses. Information is discussed in Section 2.1.1 and throughout the report.
Ms. Luretha Phillips MHA	Current Owner Representative	March 15, 2026	Provided information regarding current and historical subject property operations and development. Information provided is discussed throughout the report. According to Ms. Phillips, the subject property is proposed as Lot 2 of the subdivided site property parcel.
Ms. Rachel Meredith TDEC DERP	State/Local Official	March 30, 2026	Ms. Meredith indicated neither TDEC DoR nor DERP has documented dry cleaners associated with 981 Peach Avenue (subject property/site property).
Ms. Deborah Claxton City of Memphis Division of Fire Services – Fire Prevention Bureau	Local Official	March 30, 2026	Ms. Claxton indicated the Fire Prevention Bureau has no records of hazardous storage, spill/release responses, or UST/ASTs associated with the site property address. No records of outstanding violations were identified, according to Ms. Claxton.

2.1.1 Key Site Manager Interview

Ms. Deborah Payne, representative of MHA, provided EnSafe with an interview questionnaire completed on March 25, 2026, included in Appendix G. EnSafe communicated with Ms. Payne on multiple occasions via phone and email, beginning March 15, 2026, through March 25, 2026. According to Ms. Payne, MHA has owned the site property since April 1953, indicating the previous owner was United States Home and Housing Finance Agency and Public Housing Administration.

Reportedly, the site property parcel at 981 Peach Avenue has recently been platted as a subdivided 1.09-acre lot, identified as Lot 2 (subject property), and submitted to the Shelby County Land Use and Development Services department for approval. Ms. Payne states, "The address for the future development site [Lot 2] has not been assigned and the address listed [981 Peach Avenue — site property] is the address for Edgeview Phase I", referring to the west-adjoining senior apartment building. Reportedly, Legends Park Senior, LLC, was the site property lessee during construction of the west-adjoining apartment building and remains the current tenant. "Until the parcel is subdivided, Legends Park Senior LLC is listed as both the previous and current tenant of the parcel. Once subdivided, the current tenant will change to Legends Park Senior II, LLC", according to Ms. Payne.

Ms. Payne also indicated that MHA will retain ownership of the subject property, while the User will act as the developer of the proposed multi-family apartment building on the subject property. Ms. Payne is unaware of any current or historical storage tanks, hazardous substance storage, unauthorized dumping/disposal, or hazardous waste generation occurring on the subject property. Ms. Payne acknowledged that the subject property use(s) have not changed since the prior 2023 Phase I ESAs.

2.1.2 Interview Data Gaps

The following data gaps relative to interviews were encountered:

- EnSafe did not interview past owners of the subject property because contact information was not identified. Given the reported date of MHA ownership, the information to be obtained is likely duplicative of information already obtained from other sources or resources.

2.2 Helpful Documents

EnSafe requested the following helpful documents on March 17, 2026, from the User, subject property owner representative, and key site manager. Table 3 summarizes the interviewed person's knowledge of the availability of such documents and whether copies were provided to EnSafe for review.

Table 3
Helpful Documents

Recorded AULs/environmental liens	No	No	No	NA
Pending, threatened, or past litigation, administrative proceedings, and notices from government entity regarding violation of environmental laws or liability relating to hazardous substances or petroleum products	No	No	No	NA

The User, subject property owner representative, and key site manager each indicated that all known subject property records have been provided to EnSafe during previous environmental assessments. Prior environmental assessments for the site property have been conducted since 2003, including six Phase I ESAs, soil sampling summaries, and Phase II ESA investigations. Reports summarized in this section are those evaluating the collective site property and subject property. Findings for the entire Legends Park Subdivision site are summarized in Section 3.4. A copy of the prior June 2023 Phase I ESA, October 2025 Soil Removal Report, and February 2026 BVA are included in Appendix G.

November 2020 — Phase I Environmental Site Assessment

A Phase I ESA for the approximate subject property boundary was performed in November 2020 (EnSafe 2020). The Phase I ESA identified that Legends Park Subdivision (including the subject property) lies within the Dixie Homes State Remediation Program (SRP) site 79-846 (discussed in Section 3.4); additionally, a Notice of Land Use Restriction was imposed on the Legends Park Subdivision as an institutional control to address groundwater contamination. The 2020 Phase I ESA identified the following *recognized environmental condition* and *controlled recognized environmental condition*:

- *"Given the BVA and number of sites in the subject property area with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a recognized environmental condition for the subject property."*

- *"The subject property is subject to Land Use Restrictions that 1) prohibit the installation of water wells and use of groundwater at the subject property, 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in accordance with a TDEC-approved soil management plan, and 3) may require the installation of soil vapor mitigation systems on buildings constructed at the subject property. Therefore, the land use restrictions are considered a controlled recognized environmental condition."*

December 2021 — Phase II Environmental Site Assessment

In December 2021, a Phase II ESA was conducted to evaluate the site for potential chemicals of concern associated with historical operations. Five soil borings (SB01-SB05) were advanced at the site property portion of the Brownfields Voluntary Agreement (BVA) site (EnSafe 2021). Two soil samples were collected from each soil boring location, and each was converted into a temporary monitoring well to collect a groundwater sample. Additionally, soil gas samples were collected from five locations across the site property.

Metals data identified arsenic and chromium concentrations in soil above residential and industrial RSLs. Arsenic concentrations exceeded the Tennessee background level (10 mg/kg; TDEC 2001) in a single soil sample from 16 to 20 feet bgs. Chromium concentrations exceeded the Tennessee background level (20 mg/kg; TDEC 2001) in soil samples from three separate soil borings from 24 to 32 feet bgs. The Phase II ESA report concluded that the concentrations of arsenic and chromium were not statistically higher than the Tennessee background levels. PAH data identified benzo(a)pyrene concentrations in soil from 4 to 8 feet bgs in one soil boring above residential and industrial RSLs. All other detected concentrations in soil were below RSLs, including VOCs and extractable petroleum hydrocarbons.

Groundwater samples did not have detected concentrations of metals, VOCs, PAHs, or extractable petroleum hydrocarbons above their respective U.S. EPA maximum contaminant level or tapwater RSLs.

Five soil gas samples (SG01-SG05) were collected throughout the site property. The VOC data identified benzene (13.8 µg/m^3) and naphthalene (26.8 µg/m^3) concentrations in one soil gas sample location (SG01) above the U.S. EPA residential VISLs of 12 µg/m^3 for benzene and 2.75 µg/m^3 for naphthalene. Additionally, naphthalene exceeded the commercial VISL of 12 µg/m^3. Concentrations detected at SG01 also exceeded the maximum U.S. EPA VISL carcinogenic risk, a calculated and location-specific unitless quotient, of 1E-05 with a risk of 1.20E-05. The Phase II ESA report concluded vapor mitigation should be considered for future development within sample area SG01

(southeast corner of the site property), and the future use of the site property will dictate further recommendations for, but not limited to, a passive mitigation system or vapor barrier.

February 2022 — Phase I Environmental Site Assessment

A Phase I ESA conducted in February 2022 included ASTM 2013 non-scope items concerning National Environmental Policy Act environmental factors (EnSafe 2022). The Phase I ESA identified the same *recognized environmental condition* related to the BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the 2020 Phase I ESA. Additionally, the February 2022 Phase I ESA stated the ASTM 2013 non-scope issues related to compliance with the National Environmental Policy Act were assessed under National Housing Trust Fund guidance, and the project was found to comply with ASTM non-scope issues.

September 2022 — Phase I Environmental Site Assessment

In September 2022, an update to the February 2022 Phase I ESA was conducted. The update revealed no new findings, identifying the same *recognized environmental condition* related to the BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the previous Phase I ESAs.

January 2023 — Phase I Environmental Site Assessment

In January 2023, an update to the September 2022 Phase I ESA was conducted. The update revealed no new findings, identifying the same *recognized environmental condition* related to the BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the previous Phase I ESAs.

March 2023 — Soil Gas Sampling Report

In March 2023, EnSafe performed soil gas sampling within the planned building footprint (currently Edgeview at Legends Park) on the west-adjoining portion of the site property parcel. Seven soil gas samples (SG06-SG12) were collected. A total of 23 VOCs were reported with detected concentrations within the seven samples. The laboratory analytical results were compared to U.S. EPA VISLs for residential air, and risk screening was evaluated using U.S. EPA's VISL calculator. Each detected concentration was below its respective VISL and 1E-5 for carcinogenic risk and a hazard quotient of 0.1. EnSafe concluded that the calculated carcinogenic risk and hazard quotient were below levels that would prompt TDEC to require response actions (i.e., installing a vapor mitigation system).

March 2023 — Soil Sampling for Lead and Asbestos Report

In March 2023, EnSafe performed soil sampling to ensure asbestos and lead did not remain onsite. This report summarized the laboratory analytical results for 24 surface (0 to 1-foot bgs) and 12 subsurface (1 to 3 feet bgs) soil samples collected for lead and asbestos analysis. Lead concentrations were below the residential RSL in each soil sample collected. Asbestos was not detected in any of the soil samples. No further action was recommended for lead and asbestos in soil at the site property (including the subject property).

May 2023 — Soil Sampling for Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons, and Metals

In April 2023, EnSafe performed soil sampling to determine if VOCs, PAHs, and RCRA metals remained in the site property soil at concentrations causing potential human health risks. This report summarized the laboratory analytical results for 22 surface soil samples (0 to 1-foot bgs) and 11 subsurface soil samples (1 to 3-feet, 3 to 4-feet, 4 to 5-feet, and/or 8 to 9-feet bgs) in the area where soil would be removed during construction activities. The collected soil samples (SB25 to SB46) were analyzed for VOCs, PAHs, and RCRA metal concentrations. VOCs were below the residential RSL in each soil sample collected.

Concentrations of arsenic exceeded residential RSLs at six sample locations, and concentrations of cadmium exceeded the residential RSL in one sample. Elevated metal concentrations were primarily identified in surficial soils.

Four PAHs were detected at concentrations exceeding residential RSLs in 14 sample locations, and benzo(a)pyrene exceeded the industrial RSL in one sample location. A subsequent risk assessment was conducted with PAH concentrations converted to a benzo(a)pyrene equivalency (BEQ), which was compared to the TDEC DOR residential soil screening value (1.15 mg/kg). The BEQ results were below the residential screening value for all soil samples, except SB25 from 0 to 1-foot bgs and SB42 from 0 to 1-foot bgs and from 1 to 3-feet bgs.

EnSafe concluded that, since the site will be cut and filled (i.e., soil will be moved around the site to adjust site elevations), the soil sample locations with the highest concentrations can be moved to areas covered by hardscape or removed from the site.

June 2023 — Phase I Environmental Site Assessment

In June 2023, an update to the January 2023 Phase I ESA was conducted by EnSafe. The update revealed no new findings, identifying the same *recognized environmental condition* related to the

BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the previous Phase I ESAs.

October 2025 — Soil Removal Report

According to an October 2025 Soil Removal Report prepared by EnSafe, original plans called for the excavation and placement of impacted soils beneath engineered barriers (e.g., building foundation). The original plans were modified to excavate impacted soils in selected locations and dispose of them in accordance with applicable federal, state, and local requirements. A SMP was submitted to TDEC DoR in December 2023, which specified the modified plan. The SMP was approved by TDEC DoR on January 7, 2024. As a result, in January 2024, EnSafe performed oversight, extent sampling, and coordinated transport and disposal of three areas:

- SB25: Performed removal of PAH-impacted soil and elevated soil gas at the identified impacted location SB25/SG01 (subject property).

- SB28: Performed removal of arsenic- and chromium-impacted soil at the identified location SB28 (subject property).

- SB42: Performed removal of PAH-impacted soil at identified location SB42 (site property).

Soil samples were collected before the excavations were initiated to confirm the extent of the impacted soil. The extent samples were collected on January 10, 2024, around locations SB25, SB28, and SB42 as shown on Figure 3 of the Soil Removal Report, included in Appendix G. An exceedance of the BEQ level of 1.15 mg/kg was detected at one location, SB42, at 1.78 mg/kg (west portion of the site property). An additional extent sample (SB42C- 03A) was collected on January 24, 2024, and the BEQ concentration (0.13 mg/kg) was below the approved 1.15 mg/kg threshold.

On January 29, 2024, EnSafe was onsite when impacted soils at SB25, SB28, and SB42 were removed from the three locations for offsite disposal. The soil was directly loaded into dump trucks for transport and disposal at the Waste Management Tunica County Landfill in Robinsonville, Mississippi. Onsite soil was reworked to fill the excavation.

Based upon the proposed expansion of the site property building (Edgeview at Legends Park), including proposed construction of an additional senior housing facility on the subject property (Edgeview II), EnSafe prepared a revised SMP, dated August 2025. The SMP has been established to ensure that any soil excavated during any redevelopment activities is screened, sampled, handled,

transported, and disposed of (if necessary) in accordance with applicable federal, state, and local requirements/guidelines. The 2025 SMP has been submitted to TDEC for approval, in accordance with February 2026 BVA requirements, as discussed below.

February 2026 — Updated BVA

The previous BVA included the site property and a larger south-adjoining parcel (2009 BVA 79-846A) The 2026 Amended and Restated BVA specifically addresses the site property parcel (including the subject property) located at 981 Peach Avenue, Memphis, Shelby County, Tennessee (the "Site"), effective February 12, 2026. The Site has been assigned site number 79-846S1, superseding and replacing the 2009 BVA. The 2026 BVA is included in Appendix G. Figures depicting the site property boundaries are included in Exhibit A of the 2026 BVA.

According to the 2026 BVA, the site property was accepted into the Brownfield Projects Voluntary Cleanup Oversight and Assistance Program on February 9, 2023, listing the User and Legends Park Senior LLC as recognized "successor parties". The 2026 BVA states, "Real or perceived hazardous substances, solid wastes, or other pollutants are determined to be present on this Site to an extent that may or may not have yet been fully characterized".

The 2026 BVA summarizes all of the abovementioned environmental assessments, and includes the following excerpts of agreed actions to be taken by the successor parties, adhering to standing LURs:

- *"Prepare and implement a soil management plan to be approved by the Department* [TDEC] *for land disturbance activities occurring after the completion of development activities at the Site"*. The SMP has been submitted to TDEC for approval as of the date of this assessment.

- *"Upon completion of the land disturbance work associated with the redevelopment of the Site, the Voluntary Parties agrees to submit to the Department a report on the land disturbance work, including any waste manifests evidencing offsite disposal, if any, of soils or other materials".*

- *"Environmental assessment activities conducted by or on behalf of the Voluntary Parties have demonstrated that vapor intrusion mitigation is not required for the building to be constructed as part of the planned development"…"A plan for the design of the vapor intrusion mitigation system was submitted to the Department on or about February 7, 2023".*

- *"Before constructing any additional building or the expansion of the existing building"…"an assessment of the risk of vapor intrusion shall be conducted pursuant to a plan approved by the Department. If a vapor mitigation system is determined by TDEC to be warranted based upon the data evaluation in order to safely allow occupancy of such additional buildings or an expansion to the planned building, such construction or expansion is prohibited until such structure(s) are equipped with an appropriate passive or active mitigation system as proposed by the Property owner and approved by TDEC".*

3.0 SUBJECT PROPERTY

Subject property information discussed below was obtained from historical resources identified in Section 1.2 and referenced in Section 6.

3.1 Historical Records Review

The historical records review was conducted to identify evidence of RECs in connection with past uses of the subject property.

3.1.1 Historical Development

The earliest historical resource reviewed is an 1897 fire insurance map, which shows the subject property developed with four residences across the east portion. The 1907 fire insurance map depicts two additional structures in the northeast portion of the subject property, two shop buildings along the east property boundary, and multiple small structures in the west portion of the subject property, likely associated with residences on the west-adjoining property (site property). In the 1937 aerial photograph, the subject property appears to have been cleared and graded for re-development; the west-adjoining property already appears to have been redeveloped with multi-family residential/apartment buildings. The 1951 and 1952 fire insurance maps indicate apartment buildings (Dixie Homes Apartments) were constructed on the subject property in 1950. The subject property remains relatively unchanged in subsequent aerial photographs reviewed through 2006, except for the construction of Interstate 40 and the rerouting of Peach Avenue along the north subject property boundary between 1969 and 1973. By 2007, the buildings have been removed, and the subject property appears to be a vacant, unpaved, grass-covered lot. The 2010 aerial photograph depicts the subject property cleared of most vegetation in preparation for development, with several excavators visible to the west. Aerial photographs indicate the subject property remained vacant and grass-covered from 2012 to 2023. In 2024 and March 2025 Google Earth aerial imagery, the subject property appears to be stripped of vegetation and graded as part of from west-adjoining construction activities, appearing to contain benched terrain indicative of fill soil placement visible in November 2025 imagery.

The 1897 Fire Insurance Map depicts the subject property residential lots associated with 199 to 205 Decatur Street (east portion); and 2 to 12 King Street (west portion). City directories (1907, 1951, 1952) indicate residential use associated with 321 to 347 Decatur Street (east portion); and 328 to 340 King Street (west portion). The 2020 Phase I ESA (EnSafe 2020) identified one subject property address, 335 Decatur Street, as Minkie Jos, a potential former dry cleaner in the 1921 city directory, which is not listed in the earliest city directory reviewed for this assessment

(1924). The present-day subject property address of 981 Peach Avenue is only identified in 1940, 1943, 1948, 1954, and 1961 listings (all residential).

Current operations are discussed in Sections 3.2 and 3.3.

3.1.2 Data Failure

ASTM E1527-21 Section 8.3.8 requires identifying all obvious uses of the subject property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. The earliest useful historical resource that shows the subject property developed is the 1897 Fire Insurance Map, which shows the subject property with residential structures primarily across the east portion. The failure to obtain historical documentation dating back to the property's first developed use is considered a data failure.

Minkie Jos, a former clothes cleaner and presser, has been identified at the subject property in environmental database records (EnSafe 2020) and historical city directories for the year 1921 (EnSafe 2020). No additional information was provided in the database records; however, it is important to note that historical documents from the 2020 Phase I ESA identify a storefront at this address, which could potentially have been operated as a dry cleaner. The absence of information obtained from reasonably ascertainable historical records and interviews related to former Minkie Jos operations circa 1921 precludes EnSafe's ability to identify RECs; therefore, this is considered a *significant data gap*.

Table 6 identifies standard historical resources that were not obtained or reviewed and explains why.

Table 6
Historical Resources Not Reviewed

Standard Historical Source	Reason(s) Not Reviewed
Interviews with former occupant(s)	Contact information was not identified.

3.2 Site Reconnaissance — Current Subject Property Uses

The subject property was visually assessed on March 16, 2026, by Kevin Staggs of EnSafe. The purpose of the reconnaissance was to determine current uses and to identify evidence of RECs in connection with the subject property. EnSafe personnel walked throughout the interior and exterior of the subject property. The subject property was also viewed from adjacent public thoroughfares. Observations made of adjoining properties during the reconnaissance of the subject property are discussed in Section 4.1. Representative photographs taken during the site visit are in Appendix B.

The subject property consists of a vacant 1.09-acre lot, reportedly proposed as Lot 2 within the collective site property parcel. The subject property contains fill soil overlain by bladed grass. No obvious uses or visible utilities were observed during site reconnaissance. Windblown trash (e.g., food wrappers, drink containers, general refuse) was observed along the east and south perimeter of the subject property.

3.3 Interior and Exterior Observations

Table 7 lists features, activities, uses, and conditions applicable to the subject property based on EnSafe's visual observations of the interior and exterior and interviews.

Table 7
Site Reconnaissance — Summary of Observations and Interviews

Features, Activities, Uses, and Conditions	Observed Yes/No	Identified by Interview Yes/No	Comment/Report Section
Hazardous substances and petroleum products	No	No	—
Storage tanks	No	No	—
Strong, pungent, or noxious odors and their sources	No	No	—
Standing surface water, pools, or sumps	No	No	—
Drums, totes, and intermediate bulk containers	No	No	—
Unidentified substance containers	No	No	—
Electrical or hydraulic equipment known to contain or likely to contain PCBs	No	No	—
Means of heating and cooling subject property buildings, including fuel source(s)	No	No	—
Stains or corrosion on floors, walls, and ceilings	No	No	—
Drains and sumps	No	No	—
Pits, ponds, or lagoons	No	No	—
Stained soil or pavement	No	No	—
Stressed vegetation	No	No	—
Solid waste indicative of onsite disposal	No	No	—
Water/wastewater	No	No	—
Wells	No	No	—
Septic systems or cesspools	No	No	—

3.4 Environmental Records Review

EnSafe obtained standard environmental record resource information directly from a commercial service, TDEC data viewers, and U.S. EPA databases. The subject property address of 981 Peach Avenue is not listed on environmental databases researched.

The Legends Park Subdivision (former Dixie Homes), which includes the subject property, was identified on the TDEC VCP, SRP, INST, and LUR databases.

The subject property is part of the Legends Park Subdivision/former Dixie Homes TDEC VOAP site. According to a Phase I ESA interview (EnSafe 2023) with Ms. Alison Campany at TDEC DoR, the MHA has entered into multiple BVAs to address impacts to soil, soil gas, and groundwater on various lots within the Legends Park Subdivision that are planned for future residential development and use. Based on the regulatory information reviewed, TDEC DoR site ID 79-846 includes the subject property. According to an updated BVA (February 2026), as discussed in Section 2.2.1, the DoR site ID is now identified as 79-846S1.

The BVA executed on September 29, 2009, outlines environmental conditions identified hydrologically upgradient of the site property that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and drycleaning solvents in soil gas. Based on TDEC records reviewed, groundwater samples were collected from two sentinel wells (SW-1 and SW-2) on the southwest corner of the BVA site, not on the subject property or site property, between October 2010 and July 2012 for analysis of VOCs. Chlorinated solvent detections exceeded the U.S. EPA drinking water MCLs. TDEC records indicate VOC impacts to BVA site groundwater likely originated from historical uses associated with properties farther south.

Because the BVA site may not have been fully characterized, a Notification of Land Use Restrictions was imposed, as discussed in Section 2.2.1. As it applies to the subject property, the land use restriction 1) prohibits the installation of water wells and use of groundwater at the subject property, 2) in the event of the discovery of contaminants in soil at the subject property, other than PAHs, the soil must be managed in accordance with a TDEC-approved soil management plan, and 3) may require the installation of soil vapor mitigation systems for buildings constructed at the subject property.

EnSafe requested regulatory records/files for the subject property from agencies listed in Table 8. Table 8 lists the agency from which information was requested, date of request, date of response, and information provided or not available, as indicated by the agency response.

Table 8
Summary of Records Requests

Agency	Records Requested	Request Date	Response Date	Response/Section Discussed
TDEC DoR/DERP	Records pertaining to spills/remediation/tanks/ waste manifests associated with the subject property	March 27, 2026	March 30, 2026	Section 2.1.

Table 8
Summary of Records Requests

Agency	Records Requested	Request Date	Response Date	Response/Section Discussed
TDEC DUST	Records associated with storage tanks, spills/releases, and remediation for the subject property	March 27, 2026	March 31, 2026	No records were identified for the subject property.
Memphis Fire Prevention Bureau	Records associated with registered tanks, bulk hazardous material/petroleum storage, spills/releases, and/or emergency responses for the subject property	March 27, 2026	March 30, 2026	Section 2.1.

3.5 Physical Setting Resources

Based on review of the 2022 Northwest Memphis, Tennessee topographic map, the subject property elevation is at approximately 255 to 270 feet amsl. Overall topography at the subject property and surrounding area is relatively flat with slight relief towards the north-northwest. The center of the subject property is elevated and flat with graded slopes around the perimeter.

Five soil borings installed in 2021 to depths of 28 to 32 feet bgs encountered predominantly silty clay on the site property. Limited intervals of silty clay with gravel and sand or with pebbles and gravel were encountered in some of the borings. Alternating clay and silty clay were also encountered in a few borings at depths greater than 20 feet bgs. Groundwater was observed at 12 to 25 feet bgs in 2021 (EnSafe 2021).

3.6 Activity and Use Limitations

EnSafe reviewed federal, state, and tribal standard environmental record resources obtained directly from a commercial service. The subject property is part of the Legends Park Subdivision/former Dixie Homes and is subject to land use restrictions, as detailed in Sections 2.2.1 and 3.4.

4.0 AREA RECONNAISSANCE

The current and historical uses of adjoining and surrounding area properties described in this section are based upon visual observations during the site reconnaissance and information obtained from interviews and historical and environmental records review. Historical records obtained for the subject property, listed in Section 1.2/Table 1, that also cover adjoining properties include aerial photographs, topographic maps, city directories, and fire insurance maps.

4.1 Adjoining Properties — Historical Development and Uses

During EnSafe's site reconnaissance, discussed in Sections 3.2 and 3.3, adjoining properties were visually assessed from the subject property boundaries and from nearby roads and driveways.

The subject property is adjoined by Peach Avenue, Interstate 40, and residential parcels progressively to the north; to the east by Decatur Street, beyond which are residential parcels and Columbus Baptist Church; to the south by a developed parcel consisting of four townhome structures adjoined by an undeveloped vacant parcel; and to the west by a developed multi-family structure (Edgeview at Legends Park) encompassing the remaining site property parcel. Fire insurance maps indicate that adjoining properties were developed as early as 1897.

North

Based on historical records reviewed, the north-adjoining properties were primarily residential as early as 1897 and remained relatively unchanged through the early 1900s. The 1937 aerial photograph depicts residential structures associated with the former Dixie Homes subdivision in the current location of Peach Avenue and Interstate 40. The north-adjoining properties appear relatively unchanged until the construction of Interstate 40 and the rerouting of Peach Avenue between 1965 and 1973. The properties beyond Interstate 40 remain vacant.

East

The subject property is adjoined to the east by a developed residential parcel (1027 Peach Avenue), an associated undeveloped parcel (346 Decatur Street), and Columbus Baptist Church (324 Decatur Street). Based on historical records reviewed, the east-adjoining properties were residentially developed as early as 1897. Multi-family dwellings are depicted to the east on the 1907, 1951, and 1952 fire insurance maps. Aerial imagery suggests that multi-family dwellings historically located on the present-day vacant residential parcel were removed by 1973. City directories list addresses for the east-adjoining residential properties as residential from 1924 to 2000. 324 Decatur Street (Columbus Baptist Church) is listed in 1940 to 2024 city directories and first depicted on the 1951 fire insurance map.

South

The subject property is adjoined to the south by a developed parcel consisting of four townhome structures adjoined by an undeveloped vacant sub-divided parcel. Based on historical records reviewed, the south-adjoining properties were primarily residential with some apparent shops as early as 1897 and 1907. The 1927 topographic map shows numerous small structures on the south-adjoining property, and by 1937, the property is redeveloped with residential structures associated with the former Dixie Homes. Based on historical records reviewed, the south-adjoining properties have remained residential, cleared for redevelopment circa 2007. According to Ms. Phillips, the present-day Legends Park Townhomes were constructed in 2009.

West

The subject property is adjoined to the west by site property parcel 051017-00021, which includes the subject property. Based on historical records reviewed, the west-adjoining property was previously developed with multi-family residential lots as early as 1897. The 1907 fire insurance map and 1927 topographic maps depict numerous small structures on the west-adjoining property. The 1937 aerial photograph shows structures associated with the former Dixie Homes from 1937 to 2006. The structures were removed, and the property was graded for redevelopment in 2007. According to Ms. Payne, the west-adjoining property was used to stockpile soil from the Legends Park Subdivision construction and environmental activities occurring from 2009 to 2012. The parcel remained vacant until construction on the present-day 21,625-square-foot senior-living apartment building, Edgeview at Legends Park, in 2024. By late 2025, the property was completed with asphalt-paved parking and metal exterior fencing, as observed present-day.

4.2 Adjoining Properties — Regulatory Agency File and Environmental Records Review

EnSafe used a commercial service company to obtain an environmental database search report that made environmental records reasonably ascertainable for adjoining and surrounding area properties. Standard environmental records source listings and regulatory agency files and records reviewed for adjoining properties are discussed in this section. Surrounding area sites identified on standard environmental records resources within ASTM-defined AMSDs are discussed in Section 4.3.

The south and west-adjoining properties are within the Legends Park Subdivision VCP/BVA site (former Dixie Homes) as previously discussed in Sections 2.2.1 and 3.4.

South — 311 Decatur Street

Gordon Cleaners and Dyers, at 311 Decatur Street, was identified as a former clothes cleaner and presser in the 1932 historical city directory. No additional information was identified in historical and

database resources obtained for this Phase I ESA; however, it is important to note that historical fire insurance maps identify a storefront at this address in 1907, and Gordon Cleaners and Dyers may have operated as a dry cleaner.

West — 981 Peach Avenue (Site Property)

The west-adjoining property is located within the Legends Park North/West VCP/BVA site within the larger Legends Park Subdivision BVA site, as previously discussed in Sections 2.2.1 and 3.4. Previous investigations indicate PAH-impacted soil was used as geotechnical fill material on the west-adjoining property. In accordance with BVA Site ID 79-846, to prevent exposure to the PAH contaminants remaining in the soil, an orange plastic witness barrier was placed over impacted soil, then covered with at least 2 feet of clean fill material, between June and October 2010.

4.3 Surrounding Area Properties

The environmental database search identified 33 sites beyond the subject property and adjoining properties. Of those sites, 9 are within the ASTM-defined AMSDs for their respective listings and are summarized in the table below. Based on information obtained from standard government environmental record sources, regulatory agency files, and/or records review, the remaining sites were not identified as having releases that have migrated, have likely migrated, or have the potential to migrate to the subject property.

Environmental Listings within ASTM-Defines AMSDs (Beyond Subject/Site Property and Adjoining Properties)				
Facility Name/Address	**Distance from SP (Miles)***	**Database Listing(s)**	**Status/Notes**	**Potential Impact to Subject Property**
Church's Fried Chicken 925 Poplar Avenue	0.32 SW	VCP and SRP	• Inactive, No Further Action Petroleum impacts in soil and shallow groundwater. • Groundwater flow reported to the north/northwest. • SRP issued no further action required for petroleum impacts on March 1, 2011.	Not expected to migrate to subject property based on site regulatory status, distance, and groundwater flow direction.
Memphis Bulk Plant 432 North Dunlap Street	0.32 WNW	LUST, VCP, and SRP	• Petroleum constituents detected in soil, soil gas, and groundwater. • Groundwater flows generally to the west. • Site-specific standards issued • TDSWM approves closure with land-use restrictions in 2005.	Not expected to migrate to subject property based on distance and groundwater flow direction.

Environmental Listings within ASTM-Defines AMSDs (Beyond Subject/Site Property and Adjoining Properties)				
Facility Name/Address	**Distance from SP (Miles)***	**Database Listing(s)**	**Status/Notes**	**Potential Impact to Subject Property**
Southern Steel 431 Dunlap Street	0.35 WNW	VPC, SRP, and IC	• No Further Action • Petroleum constituents detected in soil. VOCs and SVOCs detected in groundwater. • TDSWM approves closure with land-use restrictions in 2009.	Not expected to migrate to subject property based on site regulatory status, distance, and groundwater flow direction.
Memphis VA Medical Center 1030 Jefferson Avenue	0.36 S	SEMS and LUST	• One UST was removed in December 1998; TDEC DUST issued closure on November 5, 1999.	Not expected to migrate to subject property based on site regulatory closure and distance.
Memphis Mental Health Institute 865 Poplar Avenue	0.38 SW	VCP and SRP	• Site Closed • EPH detected in soil samples. • SRP issued no further action required status on November 17, 2009.	Not expected to migrate to subject property based on contamination being limited to soils and distance to subject property.
Air Mask Service Unit 1010 Faxon Avenue	0.43 N	LUST	• One 500-gallon diesel UST and associated piping were drained and capped in September 1991. • Soil sample results collected from tank pit were non-detect or below applicable action levels for petroleum constituents. • TDEC DUST issued case closure on February 26, 1996.	Not expected to migrate to subject property based on contamination being limited to soils, distance to subject property, and groundwater flow direction.
Amoco/Poplar BP 821 Poplar Avenue	0.44 WSW	LUST	• Petroleum impacts identified in soil and groundwater. • TDEC DUST issued contaminated case closure on August 28, 2015.	Not expected to migrate to subject property based on distance from the subject property and groundwater flow direction.
The Med Adam's Building 842 Jefferson Avenue	0.49 SW	LUST	• One 20,000-gallon UST and associated piping were drained and capped in July 1999. • TDEC DUST issued case closure on February 6, 2002.	Not expected to have had contamination that migrated to the subject property based on regulatory status and distance.
UTHSC Medical Center 956 Court Street	0.49 SSW	LUST	• Tank Closure • One 2,000-gallon double-walled steel off-road high sulfur diesel UST related to an emergency generator was closed-in-place on November 30, 2022. • No leaks were detected.	No contamination detected during closure procedures.

Note:
* Distances are approximate

Northeast — 370 Decatur Street

Young Auto Service, at 370 Decatur Street, was identified on the HIST RISK database as a former fuel and automotive garage in 1924, 1925 (Polks), and 1927 historical city directories. No additional information was identified in historical and database resources obtained for this Phase I ESA; however, it is important to note that the database search lists the address 0.06 mile northeast, and historical fire insurance maps identify this address at a geographic location likely beyond present-day Interstate-40.

Northwest — 947 Peach Avenue

947 Peach Avenue was identified on the HIST RISK database as a former clothes cleaner and presser in the 1924, 1927, and 1935 (Polks) city directories under the listing Prince Kershaw. No additional information was identified in historical and database resources obtained for this Phase I ESA; however, it is important to note that the database search lists the address 0.12 mile northwest relative to the subject property. Historical fire insurance maps do not identify this address within the mapped coverage obtained for this assessment.

4.4 Unplottable Properties

The environmental database search identified 11 unplottable sites beyond the subject property and adjoining properties. Of those sites, one is within the ASTM-defined AMSD for its respective listing. Based on information obtained from standard government environmental record sources, regulatory agency files, and/or records review, the remaining sites remain unplottable and could be within AMSDs, as discussed below.

An unplottable CERCLIS listing (EPA ID: TND980728422) was identified along with an associated CERCLIS NFRAP and SEMS ARCHIVE listing with a matching EPA identification number. No additional information was identified in historical and database resources obtained; however, the database search indicates the source and nature of the potentially hazardous waste site did not warrant further investigation.

5.0 RESULTS OF THE PHASE I ENVIRONMENTAL SITE ASSESSMENT

EnSafe performed a Phase I ESA of the Future Edgeview II property at 981 Peach Avenue, Memphis, Shelby County, Tennessee, in conformance with the scope and limitations of ASTM E1527-21. Any exceptions to, or deletions from, this practice mentioned throughout the report are described in Section 5.3.

5.1 Findings and Environmental Professional Opinion

This Phase I ESA identified the following:

- The subject property encompasses 1.09 acres (proposed Lot 2) within a 3.82-acre parcel identified as Shelby County Parcel 051017-00021 (site property), occupying the undeveloped east portion of the collective site property parcel associated with 981 Peach Avenue. The subject property is planned for multi-family housing development within the Future Edgeview II phase in the Legends Park Subdivision.

- The subject property was developed as early as 1897 with multi-family residential buildings associated with the former Dixie Homes public housing development from 1950 until 2006, when the area was cleared for redevelopment within the Legends Park Subdivision. The subject property is currently vacant.

- The BVA Site ID 79-846S1 includes the site property, including the west-adjoining property, with the collective parcel identified as the site property. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater; and 2) the presence of hydrocarbons and dry-cleaning solvents in soil gas. Additionally, numerous sites in the subject property's surrounding area have reported releases of hazardous substances and/or petroleum products. An amended BVA (2026) indicates hazardous substances, solid wastes, and/or other pollutants are determined to be present on the site property to an extent that may not have yet been fully characterized.

- The subject property is subject to Land Use Restrictions that 1) prohibit the installation of water wells and use of groundwater at the subject property; 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in accordance with a TDEC-approved soil management plan; and 3) may require the installation of soil vapor mitigation systems on buildings constructed at the subject property. Therefore, the land use restrictions are considered a CREC.

- Minkie Jos, a former clothes cleaner and presser, has been identified at the subject property circa 1921. No additional information was identified from records review or interviews; however, it is important to note that historical documents from the 2020 Phase I ESA identify a storefront at this address, which could potentially have been operated as a dry cleaner. The absence of information obtained from reasonably ascertainable historical records and interviews related to former Minkie Jos operations circa 1921 precludes EnSafe's ability to identify RECs; therefore, this is considered a *significant data gap*.

- Gordon Cleaners and Dyers, at the historical south-adjoining address of 311 Decatur Street, was identified as former clothes cleaner and presser in the 1932 historical city directory. No additional information was identified from records review or interviews; however, it is important to note that historical fire insurance maps identify a storefront at this address in 1907 and Gordon Cleaners and Dyers may have operated as a dry cleaner. The absence of information obtained from reasonably ascertainable historical records and interviews related to former Minkie Jos operations circa 1921 precludes EnSafe's ability to identify RECs; therefore, this is considered a *significant data gap*.

- Five soil gas samples were collected throughout the subject property in 2021. Benzene and naphthalene were detected at concentrations exceeding the U.S. EPA residential VISLs in one sample location (SG01) on the southeast portion of the subject property. Additionally, concentrations in SG01 exceeded the acceptable residential carcinogenic risk quotient of 1E-05 with a result of 1.20E 05.

- In May 2023, soil samples were collected from across the site property, including the subject property. Analytical results identified concentrations of PAHs which exceeded residential RSLs. A subsequent risk assessment found benzo(a)pyrene equivalency to be below the residential screening value for all but one soil sample.

- The west and south-adjoining properties are located within BVA Site ID 79-846. PAH-impacted soils were used as geotechnical fill material on the west-adjoining property. In accordance with BVA Site ID 79-846, to prevent exposure to the PAH contaminants, the soil is contained beneath an orange witness barrier and clean fill material.

5.2 Conclusions

5.2.1 Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, and Significant Data Gaps

This assessment has revealed the following RECs, CRECs, and *significant data gaps* in connection with the subject property:

- Given the BVA and the number of sites in the subject property area with reported releases of hazardous substances and/or petroleum products, the potential exists for soil and groundwater contamination, which constitutes a REC with regard to the subject property.

- The subject property is subject to Land Use Restrictions that 1) prohibit the installation of water wells and use of groundwater at the subject property; 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in accordance with a TDEC-approved soil management plan; and 3) may require the installation of soil vapor mitigation systems on buildings constructed at the subject property. Therefore, the land use restrictions are considered a CREC.

- Minkie Jos, a former clothes cleaner and presser, has been identified at the subject property circa 1921. The absence of information obtained from reasonably ascertainable historical records and interviews related to former Minkie Jos operations circa 1921 precludes EnSafe's ability to identify RECs; therefore, this is considered a *significant data gap*.

- Gordon Cleaners and Dyers, at the historical south-adjoining address of 311 Decatur Street, was identified as a former clothes cleaner and presser in the 1932 historical city directory. The absence of information obtained from reasonably ascertainable historical records and interviews related to former Minkie Jos operations circa 1921 precludes EnSafe's ability to identify RECs; therefore, this is considered a *significant data gap*.

5.2.2 Historical Recognized Environmental Conditions and *de minimis conditions*

This assessment has revealed no HRECs or *de minimis conditions* in connection with the subject property.

5.3 Data Gaps, Limiting Conditions, and Deviations

EnSafe's Phase I ESA conforms to ASTM E1527-21. EnSafe did not sample soil, soil vapor, groundwater, or surface water as part of the Phase I ESA. Assessment of these items is based upon visual observations and sources as referenced throughout the report. This report should not be

construed as verifying the present property owner or operator's compliance with federal, state, and local regulations or as a recommendation to purchase, sell, or develop the subject property. The following data gaps, limiting conditions, and deviations apply to this Phase I ESA:

- EnSafe did not interview past owners of the subject property because contact information was not identified. Given the reported date of MHA ownership, the information to be obtained is likely duplicative of information already obtained from other sources or resources.

5.4 Significant Assumptions

This report is a prudent, reasonable evaluation of the subject property's observed environmental condition. EnSafe assumes no responsibility for conditions or information not practically reviewable, or information not accurately disseminated by any party. EnSafe can neither warrant nor guarantee that environmental database information is accurate and complete. The following significant assumptions were used to formulate the conclusions and opinions contained in this report

- Groundwater flow generally follows topography.
- Conditions at the time of the site visit were representative of ordinary conditions at the subject property.
- Persons interviewed answered questions in good faith and to the extent of their knowledge.
- The subject property boundaries depicted on figures and described herein are accurate.

5.5 User Reliance and Continued Viability of Environmental Site Assessment

The assessment was prepared under contract for the exclusive use of PennRose and City of Memphis and Shelby County Community Redevelopment Agency. Any other party's reliance on this report is at risk unless EnSafe grants authorization. In accordance with ASTM E1527-21, this Phase I ESA is presumed to be viable for 180 days prior to the date of acquisition or intended transaction (e.g., lease or refinance). An ASTM-compliant Phase I ESA may be used for 1 year from the date of acquisition or intended transaction, provided all the components listed on the signature page are conducted or updated within 180 days prior to the date of acquisition or intended transaction.

RE: CITY DIRECTORY RESEARCH
981 Peach Avenue
Memphis,TN

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
270-400 of Decatur St
900-1050 of Delmar Ave
BEG-1100 of Peach Ave
Search Notes:
Delmar Ave is also known as 900-1050 Delmar Pl in Memphis.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Zone subtype:	AREA OF MINIMAL FLOOD HAZARD

Hydrologic Information

FEMA Flood Zone Definitions

Special Flood Hazard Areas – High Risk

Special Flood Hazard Areas represent the area subject to inundation by 1-percent-annual chance flood. Structures located within the SFHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory flood insurance purchase requirements apply in these zones.

ZONE	DESCRIPTION
A	Areas subject to inundation by the 1-percent-annual-chance flood event. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown.
AE, A1-A30	Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)
AH	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are 1–3 feet. BFEs derived from detailed hydraulic analyses are shown in this zone.
AO	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are 1–3 feet. Average flood depths derived from detailed hydraulic analyses are shown within this zone.
AR	Areas that result from the decertification of a previously accredited flood protection system that is determined to be in the process of being restored to provide base flood protection.
A99	Areas subject to inundation by the 1-percent-annual-chance flood event, but which will ultimately be protected upon completion of an under-construction Federal flood protection system. These are areas of special flood hazard where enough progress has been made on the construction of a protection system, such as dikes, dams, and levees, to consider it complete for insurance rating purposes. Zone A99 may be used only when the flood protection system has reached specified statutory progress toward completion. No BFEs or flood depths are shown.

Coastal High Hazard Areas – High Risk

Coastal High Hazard Areas (CHHA) represent the area subject to inundation by 1-percent-annual chance flood, extending from offshore to the inland limit of a primary front al dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Structures located within the CHHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory purchase requirements apply in these zones.

ZONE	DESCRIPTION
V	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards associated with storm-induced waves. Because detailed coastal analyses have not been performed, no BFEs or flood depths are shown.
VE, V1-V30	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards due to storm-induced velocity wave action. BFEs derived from detailed hydraulic coastal analyses are shown within these zones. (Zone VE is used on new and revised maps in place of Zones V1–V30.)

Hydrologic Information

Moderate and Minimal Risk Areas

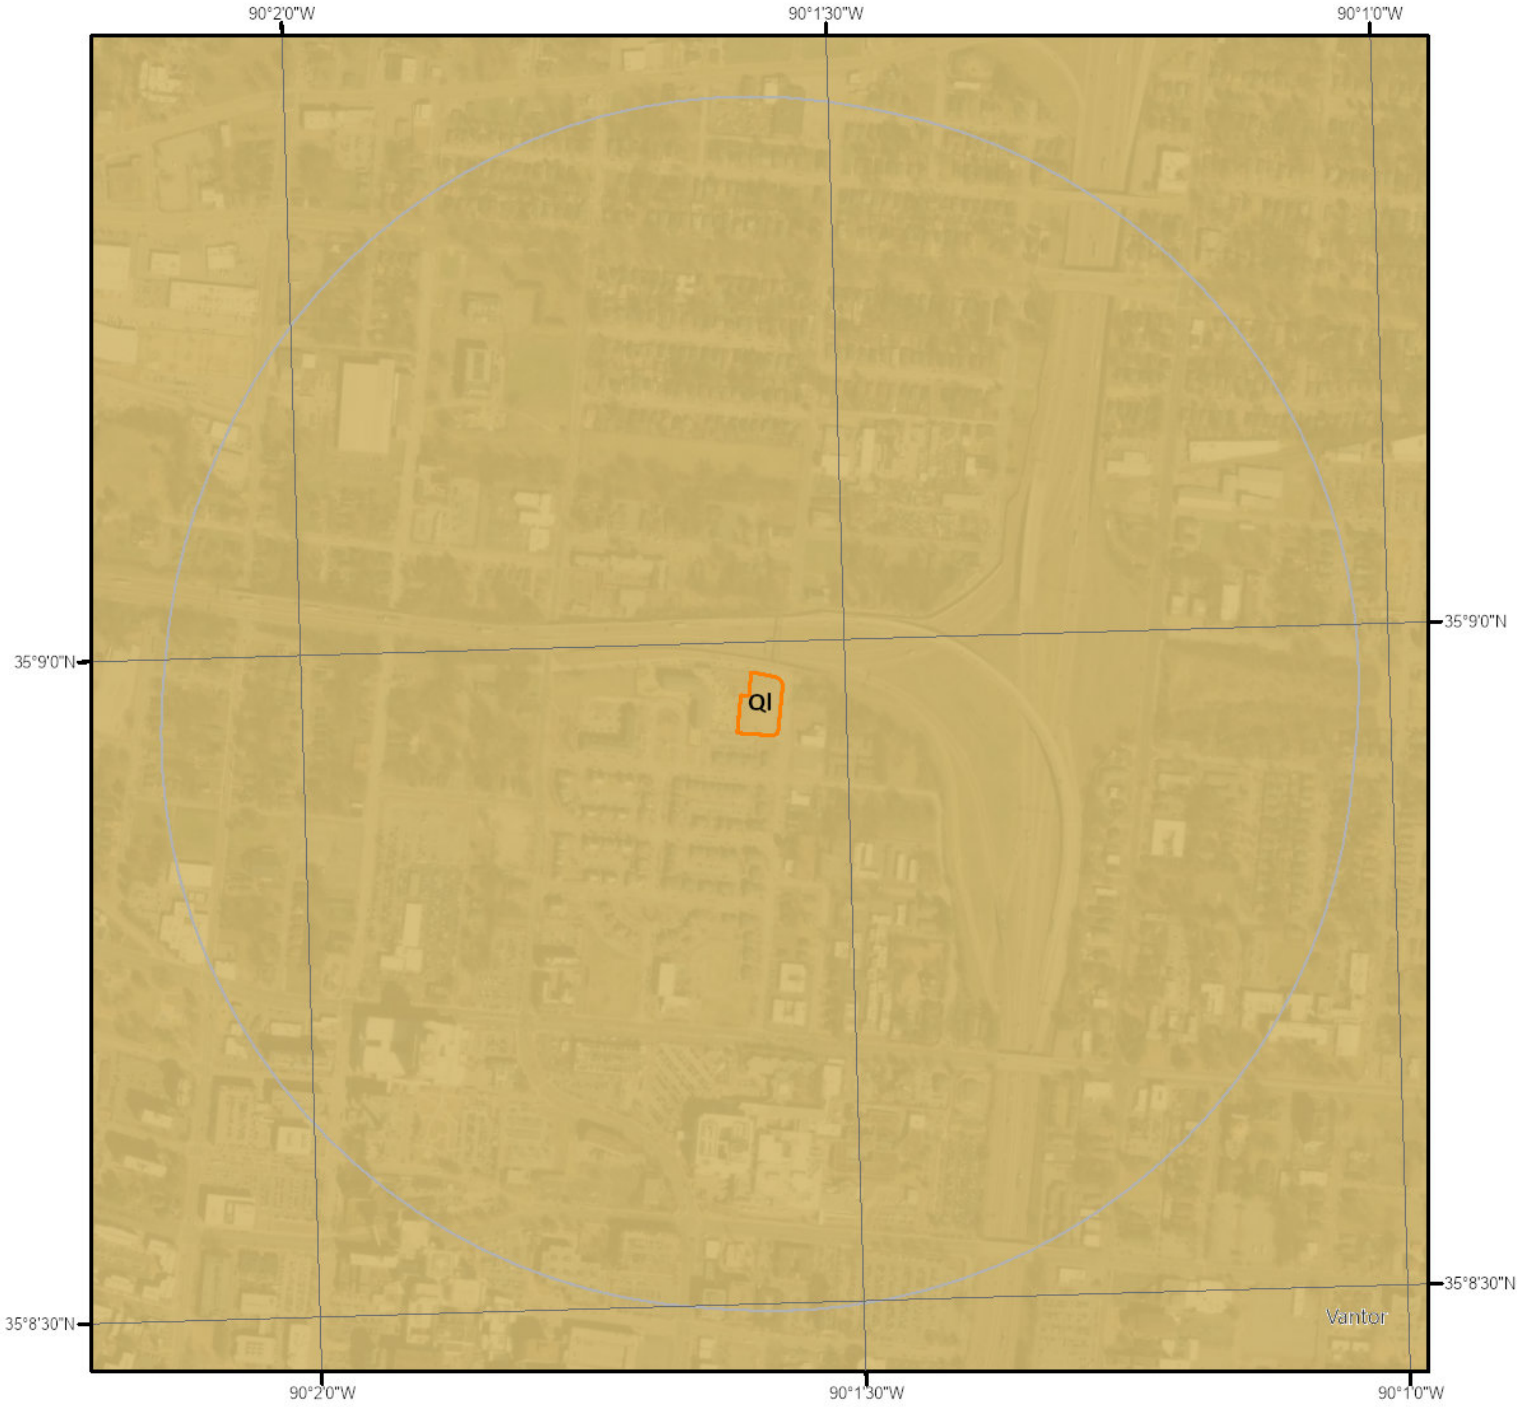
Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones.

ZONE	DESCRIPTION
B, X (shaded)	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B.)
C, X (unshaded)	Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Unstudied areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

Geologic Information



Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

N

0 0.1 0.3 Miles

ERIS

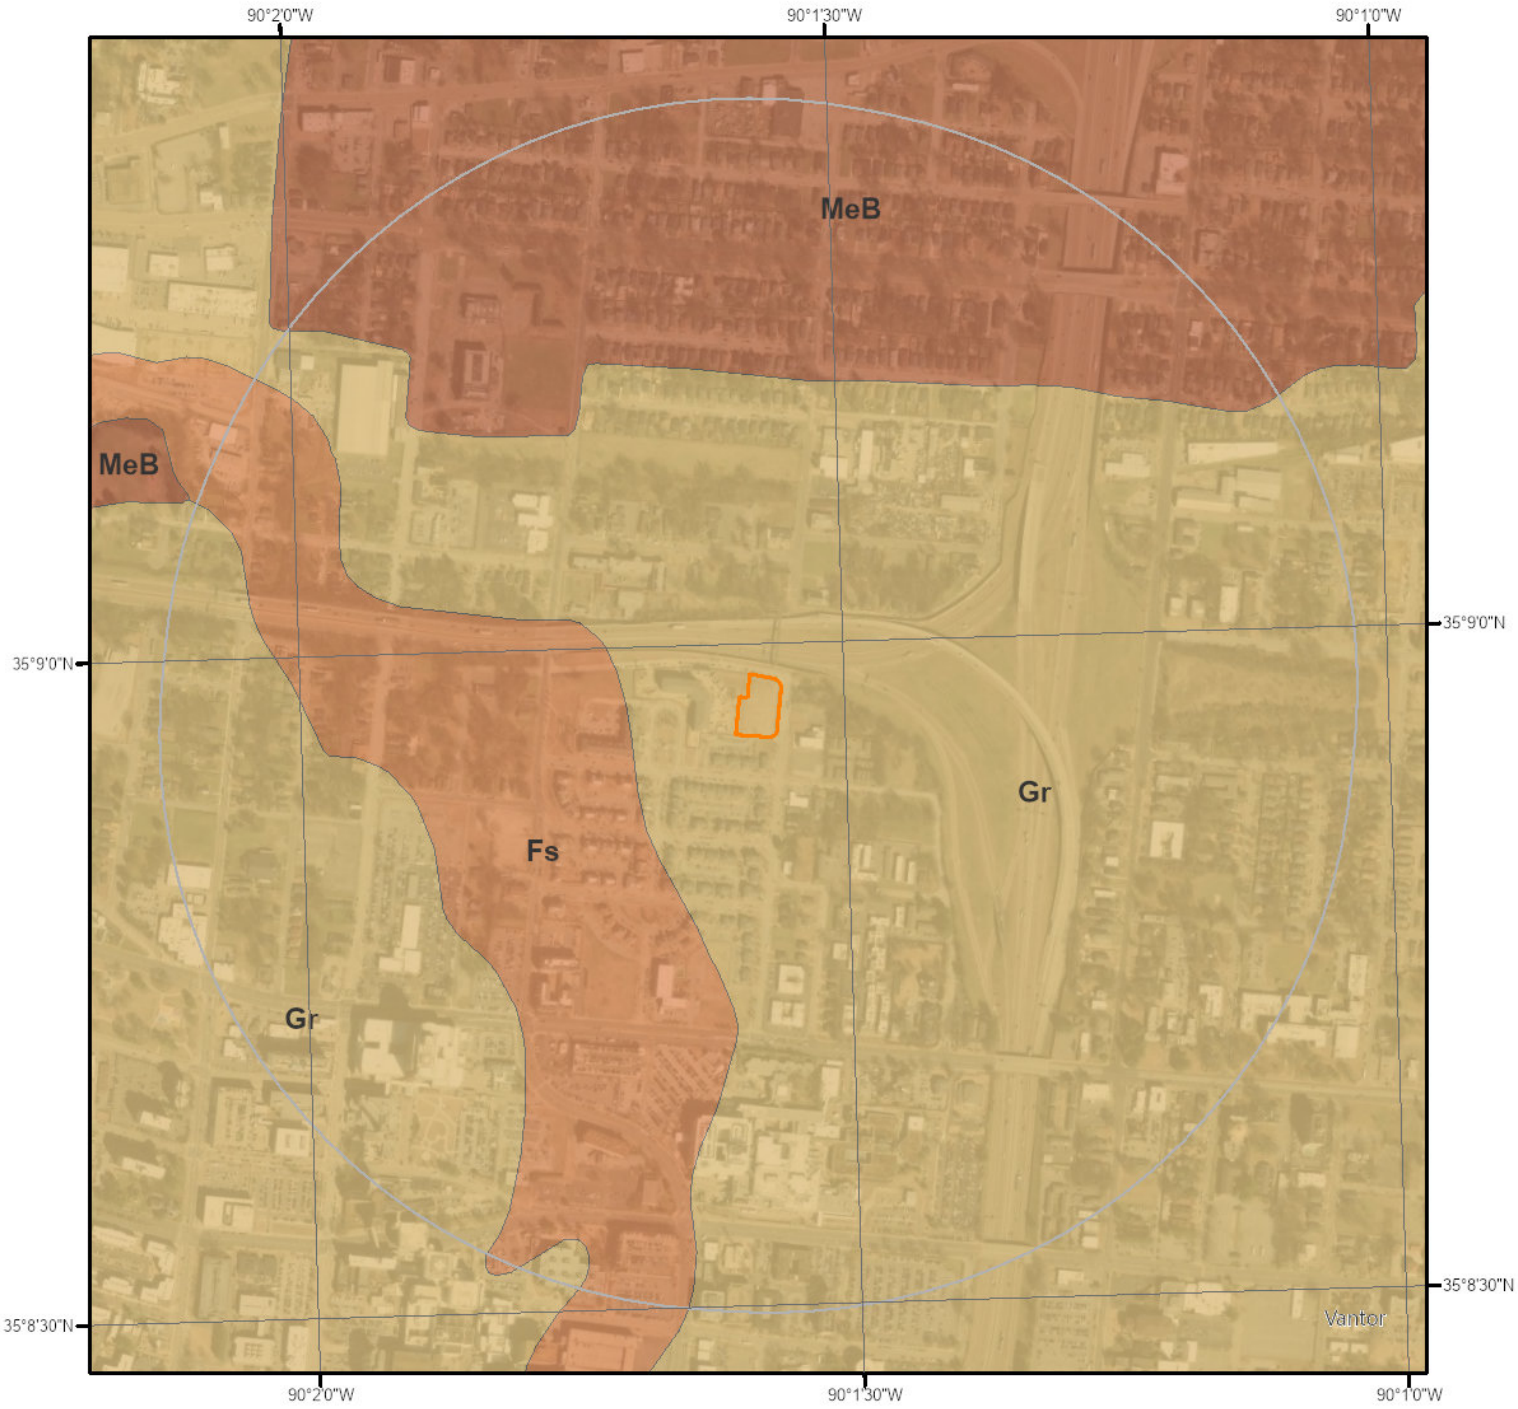
Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Ql

Unit Name:	Loess
Unit Age:	Quaternary
Primary Rock Type:	Silt
Secondary Rock Type:	
Unit Description:	Clayey and sandy silt, gray to brown, massive. Maximum thickness about 100 feet along bluffs of Mississippi River; thins eastward. (Minimum mapped thickness 4 feet.)

Soil Information



SSURGO Soils

N

0 0.1 0.3 Miles

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit Fs (15.76%)

Map Unit Name:	Filled land, silty (Udorthent, silty)
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	

Major components are printed below

Udorthents, silty(100%)

horizon H1(0cm to 152cm) — Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Fs - Filled land, silty (udorthent, silty)

Component: Udorthents, silty (100%)
Generated brief soil descriptions are created for major soil components. The Udorthents, silty is a miscellaneous area.

Map Unit Gr (66.1%)

Map Unit Name:	Graded land, silty materials (Udorthent, silty)
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	

Major components are printed below

Udorthents, silty(100%)

horizon H1(0cm to 152cm) — Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Gr - Graded land, silty materials(udorthent, silty)

Component: Udorthents, silty (100%)
Generated brief soil descriptions are created for major soil components. The Udorthents, silty is a miscellaneous area.

Map Unit MeB (18.14%)

Map Unit Name:	Memphis silt loam, 2 to 5 percent slopes, northern phase
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.

Major components are printed below

Soil Information

Memphis(100%)

horizon Ap(0cm to 18cm)	Silt loam
horizon Bt1(18cm to 46cm)	Silty clay loam
horizon Bt2(46cm to 188cm)	Silt loam
horizon C(188cm to 274cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: MeB - Memphis silt loam, 2 to 5 percent slopes, northern phase

Component: Memphis (100%)
The Memphis component makes up 100 percent of the map unit. Slopes are 2 to 5 percent. This component is on loess hills on plains. The parent material consists of fine-silty noncalcareous loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the F134XY002AL Northern Deep Loess Summit - Provisional ecological site. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SHELBY* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SHELBY* County

No Measures/Homes:	144
Geometric Mean:	0.8
Arithmetic Mean:	1
Median:	0.8
Standard Deviation:	0.8
Maximum:	4.4
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of Tennessee conducted during 1986-87. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). WQX3.0 is the newest version of the data standard that is delivered from the WQP, and this updated version holds new profiles containing USGS data added since March 11, 2024 sourced from their beta version website.

State Sources

County Water Wells **WATER WELLS**

A list of county water well locations maintained by the Division of Water Resources at the Tennessee Department of Environment and Conservation.

Oil and Gas Wells **OGW**

Oil and Gas Well Data made available by Tennessee Department of Environment and Conservation.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Status Detail: Area where engines are pulled had some staining on the ground as well as a few puddles of antifreeze from incidental spillage. Once engines and transmissions are removed they are drained into an oil tank inside the building and used to power a used oil heater. Owner agreed to move the rack onto a concrete surface, remove the stained soil and institute procedures to minimize and contain spillage. An NOV will be sent.

Federal Waste Codes: D002
Qty Generated in Tons: .5026295
Qty Treated Disposed Or R: 0
Qty Shipped Off Site in T: .5026295
Qty Received in Tons: 0
Management Category: FUEL BLENDING
Year: 2011

Waste Source Code: G19
Description: WASTES FROM OTHER INTERMITTENT EVENTS OR PROCESSES - Other one-time or intermittent processes
Waste Form Code: W219
Description: ORGANIC LIQUIDS - Other organic liquid
Waste Description: CHEMOTHERAPY WASTE
Acute Non Acute Status: Non-Acute Hazardous Waste
Waste Code Group: D010
Federal Waste Codes: D010
Qty Generated in Tons: .0094815
Qty Treated Disposed Or R: 0
Qty Shipped Off Site in T: .0094815
Qty Received in Tons: 0
Management Category: LANDFILL
Year: 2011

Waste Source Code: G19
Description: WASTES FROM OTHER INTERMITTENT EVENTS OR PROCESSES - Other one-time or intermittent processes
Waste Form Code: W801
Description: MIXED MEDIA / DEBRIS / DEVICES - Compressed gases
Waste Description: WASTE COMPRESSED GAS
Acute Non Acute Status: Non-Acute Hazardous Waste
Waste Code Group: D001
Federal Waste Codes: D001
Qty Generated in Tons: .1700054
Qty Treated Disposed Or R: 0
Qty Shipped Off Site in T: .1700054
Qty Received in Tons: 0
Management Category: OTHER TREATMENT
Year: 2011

Generated Wastes Shipped Offsite 2009

Waste Source Code: G01
Description: WASTES FROM ON-GOING PRODUCTION AND SERVICE PROCESSES - Dip, flush or spray rinsing (using solvents to clean or prepare parts or assemblies for further processing)
Waste Form Code: W211
Description: ORGANIC LIQUIDS - Paint thinner or petroleum distillates
Waste Description: VARSOL WASTE COMBUSTIBLE LIQ. NOS
Acute Non Acute Status: Non-Acute Hazardous Waste
Waste Code Group: D001
Federal Waste Codes: D001
Qty Generated in Tons: .0164272
Qty Treated Disposed Or R: 0
Qty Shipped Off Site in T: .0164272
Qty Received in Tons: 0
Management Category: SOLVENTS RECOVERY
Year: 2009

Waste Source Code: G19
Description: WASTES FROM OTHER INTERMITTENT EVENTS OR PROCESSES - Other one-time or intermittent processes
Waste Form Code: W307
Description: INORGANIC SOLIDS - Metal scale, filings and scrap (including metal drums)
Waste Description: HAZARDOUS WASTE SOLID NOS - LEAD
Acute Non Acute Status: Non-Acute Hazardous Waste
Waste Code Group: D008
Federal Waste Codes: D008
Qty Generated in Tons: .029547

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Currently on the Final NPL (F)' and/or the 'Site is Part of NPL Site (A)'. These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 18, 2026

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 18, 2026

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 18, 2026

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool. This data may also include applicable sites represented as polygons sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Not on the NPL (N)' , 'Removed from Proposed (R)', and/or 'Pre-Proposal Site (S)'. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Aug 27, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file. This data may also include applicable sites represented as polygons sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Not on the NPL (N)' , 'Removed from Proposed (R)', and/or 'Pre-Proposal Site (S)'. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Aug 27, 2025

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Nov 30, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Nov 30, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste. This list also includes RCRAInfo sites that have notified as LQGs that do not have a registered Site Manager or Certifier in RCRAInfo.

Government Publication Date: Nov 30, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month. This list also includes RCRAInfo sites that have notified as SQGs that do not have a registered Site Manager or Certifier in RCRAInfo.

Government Publication Date: Nov 30, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Nov 30, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Nov 30, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Nov 30, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made available by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jan 30, 2026

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jan 30, 2026

Land Use Controls Information System: LUCIS

The Land Use Controls Information System (LUCIS) database is sourced from the U.S. Department of the Navy (DON). This data contains information for former Base Realignment and Closure (BRAC) properties across the United States. DON's BRAC office was tasked with tracking certain base closures while requiring the prevention of risks to human health and the environment of those properties with LUCs in place. Regarding currently available LUC Sites data, the sites listing is limited to centroid point locations for the overall installation property boundaries. Formerly obtained LUC Sites data may reflect site details that applied previously for a BRAC property.

Government Publication Date: Jun 13, 2024

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Jan 18, 2026

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 30, 2025

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 8, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. The list includes FRP facilities sourced from the EPA FOIA office and from previously available Homeland Infrastructure Foundation-Level Data (HIFLD) file/s. Disclaimer: Per the EPA FOIA Office, the verification process for current requested FRP data is undergoing review and revision, and any similar reporting will be made public in Fiscal Year 2026. For this reason, the latest available FOIA file may be incomplete.

Government Publication Date: Jun 1, 2025

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jun 1, 2025

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Jun 5, 2025

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Aug 27, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Jan 30, 2026

State

Notice of Land Use Restrictions: LUR

This list of Notice of Land Use Restrictions (LUR) Documents is provided by the Tennessee Department of Environment and Conservation's (TDEC) Division of Remediation (DOR). Since January of 2024, the TDEC indicates the LUR listing as the proper source for sites with controls information and their previous DOR Sites with Institutional and Engineering Controls (IC/ECs) Report as no longer being maintained. Some LUR documents may not be provided in this list; therefore, a TDEC Public Records Request may necessary be for specific sites.

Government Publication Date: Jan 21, 2026

Promulgated Sites: SHWS

The Promulgated List made available by Tennessee's Department of Environment and Conservation (TDEC) is a List of Inactive Hazardous Substance Sites. 'Inactive hazardous substance sites that constitute an imminent, substantial danger' is an inactive hazardous substance site where there is a threat of danger to the public health, safety, or environment which is both real and presently existing. This database serves a purpose similar to that of the federal NPL, functioning as a state-level counterpart for prioritizing cleanup efforts at hazardous substance release sites.

Government Publication Date: Jan 21, 2026

Delisted State Hazardous Waste Sites: DEL SHWS

This database contains a list of sites which have removed from The Promulgated Sites Listing maintained by Tennessee's Department of Environment and Conservation (TDEC).

Government Publication Date: Jan 21, 2026

Solid Waste Disposal Facilities and Landfills: SWF/LF

A list of Solid Waste Management (SWM) Permits and Inspections in the Solid Waste Dataviewer, made available by the Tennessee Department of Environment Conservation (TDEC) Division of Solid Waste Management (DSWM).

Government Publication Date: Feb 11, 2026

Environmental Activities on USTs: LUST

The Tennessee Department of Environment and Conservation (TDEC) has made available a list of facilities where any type of environment-related activity has occurred due to a tank closure, or a suspected or confirmed release. The information in this list includes the facility's name and address when the environmental activities began, and the as well as the current status of the activities taking place.

Government Publication Date: Jan 5, 2026

Tennessee Petroleum Underground Storage Tank Fund: LUST TRUST

A list of facilities which have applied for reimbursement from the Tennessee Petroleum Underground Storage Tank Fund, made available by Tennessee Department of Environment and Conservation (TDEC).

Government Publication Date: Jan 5, 2026

Delisted Leaking Storage Tanks: DELISTED LST

This database contains a list of leaking storage tank sites and their Funds for reimbursement of costs related to assessment and cleanup that were removed from the Department of Environment and Conservation (TDEC) database.

Government Publication Date: Jan 30, 2026

Hazardous Waste Remedial Action Fund: HWRA

List of sites under the Hazardous Waste Remedial Action Fund (HWARF) program, maintained by Tennessee Department of Environment and Conservation (TDEC). The Division of Remediation uses the Fund to investigate and cleanup environmental problems caused by the release of hazardous substances into the environment.

Government Publication Date: Jan 21, 2026

Delisted Hazardous Waste Remedial Action Fund: DHWR

List of sites which once appeared on - and have since been removed from - the list of sites participating in the Hazardous Waste Remedial Action Fund, made available by Tennessee's Department of Environment and Conservation (TDEC).

Government Publication Date: Jan 21, 2026

Underground Storage Tanks: UST

A list of tank compartments that have been reported to the Division of Underground Storage Tanks in the Tennessee Department of Environment and Conservation (TDEC). Some of the compartments listed, are not regulated by state or federal regulations, because of the substance stored, the size of the compartment, its use, etc. This list is maintained by Tennessee Division of Underground Storage Tanks in TDEC.

Government Publication Date: Jan 30, 2026

Delisted Storage Tanks: DEL STORAGE TNK

List of tank compartments is maintained by the Division of Underground Storage Tanks in the Department of Environment and Conservation (DEC). The department would remove a record if the compartment is not regulated. This list contains the non-regulated tank compartments that been removed from the department's tank database.

Government Publication Date: Jan 30, 2026

Sites Remediated with Institutional Controls: INST

This list of remediated sites with institutional controls in place was previously maintained by the Tennessee Department of Environment and Conservation's (TDEC) Division of Remediation (DOR). Please refer to the LUR Report Source for current DOR information.

Government Publication Date: Oct 4, 2023

Sites Remediated with Engineering Controls: ENG

This list of remediated sites with engineering controls in place was previously maintained by the Tennessee Department of Environment and Conservation's (TDEC) Division of Remediation (DOR). Please refer to the LUR Report Source for current DOR information.

Government Publication Date: Oct 4, 2023

Voluntary Cleanup, Oversight and Assistance Program: VCP

The Voluntary Cleanup Oversight and Assistance Program (VOAP) overlooked by Tennessee's Department of Environment and Conservation (TDEC) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. This list is maintained by the Division of Remediation in Department of Environment and Conservation.

Government Publication Date: Jan 21, 2026

State Remediation Program List: SRP

The State Remediation Program (SRP) was established in 1994 within the Division of Solid Waste Management of the Tennessee Department of Environmental Conservation (DEC) for the purpose of providing owners, prospective purchasers and other interested parties the means to voluntarily investigate, clean up or monitor contaminated sites not regulated under RCRA, CERCLA or the Tennessee Division of Underground Tanks (UST). This list is maintained by the Tennessee DEC Division of Solid Waste Management - Site Remediation Program.

Government Publication Date: Jan 21, 2026

Division of Remediation Sites: REMEDIATION

This list includes applicable sites that are or have been in the Tennessee Department of Environment and Conservation's (TDEC) Division of Remediation (DOR) Programs. The DOR identifies and investigates hazardous substance sites, then uses practical and effective remedies to stabilize, remediate, contain, monitor, and maintain these sites. DOR Programs include but are not limited to the Voluntary Cleanup Oversight and Assistance Program (VOAP), Drycleaner Environmental Response Program (DCERP), and State Remediation Program (SRP).

Government Publication Date: Jan 21, 2026

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Tennessee, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 12, 2019

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Tennessee, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 14, 2017

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 21, 2025

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 21, 2025

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

Drug Establishment Annual Registration: FDA REGISTRANT

A list of drug firms which manufacture, prepare, propagate, compound, or process drugs that are commercially distributed in the U.S. or offered for import to the U.S. Listing made available by the U.S. Food and Drug Administration (FDA). Includes historical records dating back to 2000. Includes only facilities which are located in the U.S.A.

Government Publication Date: Sep 18, 2025

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's (EPA) Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. This dataset is sourced from the EPA's PFAS Analytic Tools, and it includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified as PFAS based on EPA's CompTox Chemicals Dashboard lists of PFAS with defined and undefined structures. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time. Note that some regulatory programs have specified chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard.

Government Publication Date: Dec 2, 2025

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Oct 8, 2025

Risk Management Plan (RMP) Rule: RMP

A list of facilities that are required to have a Risk Management Plan (RMP) in order to: identify the potential effects of chemical accidents, identify steps to prevent accidents and provide emergency response procedures should an accident occur. The U.S. Environmental Protection Agency (EPA) Risk Management Program Rule implements Section 112(r) of the 1990 Clean Air Act amendments for facilities that use extremely hazardous substances to develop an RMP. These plans must be revised and resubmitted to EPA every five years. This RMP database without Off-site Consequence Analysis (OCA) information is obtained from the EPA Central Data Exchange (CDX).

Government Publication Date: Aug 1, 2025

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Jan 1, 2026

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Dec 29, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2025 per agency entity dataset. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: May 30, 2025

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Aug 1, 2025

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Feb 16, 2026

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jul 21, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Nov 29, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The dataset was developed from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors, based on the North American Industry Classification System (NAICS) Codes and Standard Industrial Classification (SIC) Codes associated federal regulatory programs (e.g., Clean Water Act, Clean Air Act, and Resource Conservation and Recovery Act) at the facility level; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Feb 16, 2026

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 28, 2025

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Dec 26, 2025

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Oct 18, 2025

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jan 24, 2026

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites which once appeared on - and have since been removed from - the list of drycleaner facilities included in Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jan 24, 2026

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

Civil Enforcement Action Cases without Associated Facilities: CEA2

This database consists of civil, judicial, and administrative federal enforcement cases where there are no facilities associated with a case as tracked by the U.S. Environmental Protection Agency (EPA). The EPA's Enforcement and Compliance History Online (ECHO) system incorporates Federal Enforcement and Compliance (FE&C) data from the Integrated Compliance Information System (ICIS). ICIS tracks enforcement actions taken against companies or individuals; therefore, the ICIS case name may not correspond to an exact facility name for ICIS records linked via EPA's Facility Registry System (FRS), ECHO Facility Searches, or other program data systems.

Government Publication Date: Oct 11, 2025

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: Jul 10, 2025

Integrated Compliance Information System for Air: ICIA

The Integrated Compliance Information System (ICIS) for Air contains data regarding regulated Clean Air Act stationary sources and their compliance records, as provided by the U.S. Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) data. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners (automobiles and other mobile air pollution sources are tracked by a different EPA system). While ICIS-Air maintains data at several levels of detail on an air source, ECHO focuses on the data at the plant level. ICIS-Air records include those where the operating status is planned (has applied for a construction permit), under construction, operating, temporarily closed, seasonal, or permanently closed.

Government Publication Date: Dec 6, 2025

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Aug 8, 2025

Occupational Safety and Health Administration Enforcement Data: OSHA

The Occupational Safety and Health Administration (OSHA) Enforcement data includes information regarding the impetus for conducting the inspection, and details on citations and penalty assessments resulting from violations of OSHA standards. Additionally, accident investigation information is provided, including textual descriptions of the accident, and details regarding the injuries and fatalities which occurred. This dataset is provided by the US Department of Labor.

Government Publication Date: Sep 8, 2025

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: Oct 30, 2025

Civil Enforcement Actions: CEA

This database consists of civil, judicial, and administrative federal enforcement cases tracked by the U.S. Environmental Protection Agency (EPA). The EPA's Enforcement and Compliance History Online (ECHO) system incorporates Federal Enforcement and Compliance (FE&C) data from the Integrated Compliance Information System (ICIS). ICIS tracks enforcement actions taken against companies or individuals; therefore, the ICIS case name may not correspond to the exact facility name for ICIS records linked via EPA's Facility Registry System (FRS), ECHO Facility Searches, or other program data systems.

Government Publication Date: Oct 11, 2025

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

Criminal Enforcement Actions: CRIM

Criminal Enforcement Actions database that is maintained by the U.S. Environmental Protection Agency (EPA) which reports criminal enforcement cases for all environmental statutes.

Government Publication Date: Oct 31, 2025

EPA Dockets: DOCKETS

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. The EPA DOCKETS system was decommissioned in 2002.

Government Publication Date: Dec 22, 2005

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). The intent of the site location is to provide a general reference point to the site on a national scale. The coordinates of each site point can be the location of a site monument, the centroid of the site boundary, or a general location of the site. This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Nov 6, 2025

Permit Compliance System (PCS): PCS

Permit Compliance System (PCS) database that is maintained by US Environmental Protection Agency (EPA) provides historic water discharge permit information by state. The Permit Compliance System (PCS) is gradually being replaced by the modernized system called Integrated Compliance Information System (ICIS).

Government Publication Date: Nov 12, 2012

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the U.S. Department of Energy's (DOE) Alternative Fuels Data Center (AFDC) and National Renewable Energy Laboratory (NREL). The DOE's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Dec 16, 2025

Federal National Pollutant Discharge Elimination System (NPDES): NPDES

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online (ECHO) system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels and includes permit, inspection, violation and enforcement action information. This national dataset excludes NDPES Master General Permits.

Government Publication Date: May 3, 2025

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Dec 30, 2025

Financial Assurance Summary: FINA

This Financial Assurance Summary data provides a list of all Resource Conservation and Recovery Act (RCRA) regulated Treatment, Storage, & Disposal (TSD) sites with Financial Assurance coverage. The data shows the cost estimate for each mechanism type. A mechanism can include letters of credit, bonds, trust agreements, insurance, and self-insurance. This national listing is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Sep 9, 2025

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Biennial Reporting System (BRS): BRS

The Biennial Reporting System (BRS) contains biennial reports submitted by generators of hazardous wastes and facilities that treat, store or dispose of hazardous wastes. The reports are required by the Resource Conservation and Recovery Act (RCRA) under Title 40 of the Code of Federal Regulations (CFR) and include national and state-level data and analyses on the types and amounts of hazardous wastes generated, waste treatment methods, and waste management and minimization practices. The Biennial Report form (EPA form 8700-13A/B) must be submitted to the authorized state agency or EPA regional office by March 1 of every even-numbered year.

Government Publication Date: Sep 1, 2025

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Sep 26, 2025

Enforcement and Compliance Data (ECHO): ECHO

The Enforcement and Compliance History Online (ECHO) data focuses on compliance and enforcement-related information for regulated facilities, including permit data, inspection/compliance evaluation dates and findings, violations of environmental regulations, enforcement actions, and penalties assessed. The information contained in ECHO is made available by the U.S. Environmental Protection Agency (EPA) for information purposes only, and the data is sourced from the ECHO Exporter file. The Exporter file includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases, industry codes, and permit types.

Government Publication Date: Oct 18, 2025

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Civil Cases and Settlements: CIVIL CASES

A listing of significant civil and cleanup cases and settlements from 1998 and onwards, made available by the United States Environmental Protection Agency (US EPA). This is not a complete list of all enforcement actions taken by or on behalf of EPA. Rather, it represents a subset of enforcement cases, taken civil judicially or administratively, which may be of national interest. Most of the settlements are civil judicial consent decrees resolving alleged violations of environmental laws (e.g., the Clean Air Act, the Clean Water Act); this listing does not include: most administrative enforcement actions; most civil judicial cases resolving liability under CERCLA; criminal enforcement matters.

Government Publication Date: Mar 8, 2024

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Aug 12, 2025

National Compliance Database System - Case Listings: NCDB CASE LIST

Case listings from the National Compliance Database System (NCDB), the historical repository for national data from the United States Environmental Protection Agency's ten regional and Headquarters FIFRA/TSCA Tracking System (FTTS). Data collected in the regional FTTS was transferred to NCDB to support the need for monitoring national performance of the following programs: Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Toxic Substance Control Act (TSCA) , Emergency Planning and Right-to-Know Act, Section 313 (EPCRA) , Asbestos Hazard Emergency Response (AHERA). EPA's Integrated Compliance Information System (ICIS) is the current system of record for this data since 2006.

Government Publication Date: Sep 1, 2006

National Compliance Database Information - Facility Inspection: NCDB FAC INSP

Facility inspection information from the National Compliance Database (NCDB), the historical repository for national data from the United States Environmental Protection Agency's ten regional and Headquarters FIFRA/TSCA Tracking System (FTTS). Data collected in the regional FTTS was transferred to NCDB to support the need for monitoring national performance of the following programs: Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Toxic Substance Control Act (TSCA) , Emergency Planning and Right-to-Know Act, Section 313 (EPCRA) , Asbestos Hazard Emergency Response (AHERA). Since October 2006, the EPA has been entering new inspection information into the Integrated Compliance Information System (ICIS), the current system of record for this data.

Government Publication Date: Sep 1, 2006

Hazardous Waste Compliance Docket Facilities: DOCKET HW

This list of the Federal Agency Hazardous Waste Compliance Docket (HWCD) Facilities is maintained by the United States Environmental Protection Agency (EPA). According to the EPA, Section 120(c) of CERCLA requires EPA to establish a listing, known as the Federal Facility Hazardous Waste Compliance Docket (Docket), of Federal facilities which are managing or have managed hazardous waste; or have had a release of hazardous waste. Thus, the Docket identifies all Federal facilities that must be evaluated to determine whether they pose a risk to human health and the environment, and it makes this information available to the public. The HWCD site listing is sourced from the EPA's Federal Facility Cleanups Searchable List of Docket Facilities. Previous data may include applicable site information from the EPA's Cleanups at Federal Facilities - Docket Sites Mapping Application; however, not all docket sites are accessible from the map layer, and the Federal Facilities Restoration and Reuse Office (FFRRO) is working with the Regions to address these data issues.

Government Publication Date: Oct 3, 2025

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Jun 5, 2025

Historical Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

NPDES Biosolids Program Permit Holders: NPDES BIOSOLIDS

This Water National Pollutant Discharge Elimination System (NPDES) Biosolids Permits list is sourced from the U.S. Environmental Protection Agency's (EPA) Enforcement and Compliance History Online data. EPA's Integrated Compliance Information System (ICIS) for NPDES includes facility and compliance information for NPDES permits in the ECHO Biosolids facility universe. Per the EPA, when sewage from households and businesses (and sometimes wastewater from industrial dischargers) is sent to a wastewater treatment plant, the liquids are separated from the solids, producing a semi-solid, nutrient-rich product known as "sewage sludge" or "biosolids". The EPA typically uses the term "biosolids" to mean sewage sludge that has been treated to meet the agency's regulatory requirements and is intended to be land applied as a soil conditioner or fertilizer.

Government Publication Date: Feb 7, 2026

State

NPDES Permit Listing: NPDES

A list of National Pollutant Discharge Elimination System (NPDES) permits made available by the Tennessee Department of Environment and Conservation (TDEC). List is obtained from the TDEC DataViewer - Division of Water Resources (DWR).

Government Publication Date: Dec 31, 2022

Drycleaner Environmental Response Program Remediation Sites: PRIORITY CLEAN

Tennessee's Department of Environment and Conservation (TDEC) Division of Remediation operates a program called the Drycleaner Environmental Response Program (DCERP). This program keeps a list of DCERP remediation sites.

Government Publication Date: Jan 21, 2026

Delisted Drycleaner Environmental Response Program Remediation Sites: DELISTED DCER

The list of Drycleaner Environmental Response Program, maintained by the Tennessee's Department of Environment and Conservation Division of Remediation, would remove a record if the program finished the remediation. This list contains all such records that has finished remediation.

Government Publication Date: Jan 21, 2026

Registered Drycleaner Facilities List: DRYCLEANERS

A list of dry cleaners maintained by the Tennessee Department of Environment and Conservation (TDEC) Drycleaner Environmental Response Program (DCERP). Includes currently registered dry cleaning facilities and known dry cleaners.

Government Publication Date: Jan 23, 2026

Delisted Drycleaners List: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Department of Environmental and Conservation.

Government Publication Date: Jan 23, 2026

Registry of Contaminated Properties: CDL

The Tennessee Department of Environment and Conservation (TDEC) publishes a list of all properties under quarantine due to meth. Law enforcement places and removes the order of quarantine; TDEC has no control over additions and removals to the list. This list is maintained by the TDEC Division of Remediation (DOR).

Government Publication Date: Jan 7, 2026

Spills, Emergency Response Data: SPILLS

An inventory of spill locations reported to Tennessee Emergency Management Agency. This list made available by Tennessee Emergency Management Agency (TEMA).

Government Publication Date: Jul 22, 2015

Statewide Petroleum Incident Logging Section (SPILS) List: SPILS

Tennessee's Statewide Petroleum Incident Logging Section (SPILS) is a new program within the Tennessee Department of Environment and Conservation (TDEC)'s Division of Solid Waste Management (DSWM). The SPILS program log incidents along Tennessee's roadways where a reportable quantity of petroleum products is released to the environment, ensuring that appropriate cleanup standards are applied, remediation activities are completed, and final reports detailing the response are received and reviewed.

Government Publication Date: Nov 18, 2025

Solid Waste Management (SWM) Complaints: SWM COMPLAINT

List of Solid Waste Management (SWM) complaints in the Tennessee Department of Environment & Conservation (TDEC) Dataviewer.

Government Publication Date: Feb 20, 2026

Hazardous Waste Management Facilities: HWM

List of Hazardous Waste Management Facilities made available by Tennessee's Department of Environment and Conservation. Includes Active, Inactive, Closed, Open, Operating, and Not Operating facilities. This is not a complete list of hazardous waste management facilities permits in the state of Tennessee.

Government Publication Date: Dec 23, 2025

PFAS Source Water Sampling: PFAS SAMPLING

This source water sampling results data for Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS) is provided by the Tennessee Department of Environment & Conservation (TDEC). The TDEC is currently performing a statewide initiative to sample for 29 different PFAS compounds, in raw, untreated source water that supplies public drinking water systems. The sampling results include the 6 PFAS that the U.S. Environmental Protection Agency (EPA) has announced final Maximum Contaminant Levels (MCLs) for finished drinking water: PFOA, PFOS, PFHxS, HFPO-DA, PFBS, and PFNA. While the EPA has announced final Maximum Contaminant Levels (MCLs) for finished (i.e., treated) drinking water, these rules are not yet effective, and there are no regulatory levels for the untreated, raw source water used in this sampling effort. This data is for informational use only and is not intended for legal purposes.

Government Publication Date: Jul 27, 2025

Tribal

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

SUBORDINATION AND STANDSTILL AGREEMENT

THIS SUBORDINATION AND STANDSTILL AGREEMENT (this "Agreement") is entered into this October 1, 2023, and among (i) **CADENCE BANK,** a Mississippi banking corporation (together with its successors and/or assigns, the **"Senior Lender"), (ii)** Tennessee Housing Development Agency, a political subdivision and instrumentality of the State of Tennessee **("Tennessee Housing"), (iii) MEMPHIS HOUSING AUTHORITY,** a public housing authority organized and existing under the laws of the State of Tennessee **("Memphis Housing," and c**ollectively with Tennessee Housing, **the "Subordinate Lender"),** and (iii) **LEGENDS PARK SENIOR LLC**, a Tennessee limited liability company **(the "Company").**

Recitals

A. The Senior Lender has made or is making a construction loan to the Company in the original principal amount of $12,800,000 **(the "Project Loan").** The Project Loan is or will be secured by **a first priority mortgage lien (the "Project Mortgage") on the Company's leasehold estate in property** located at 981 Peach Avenue, Memphis, Shelby County, Tennessee **(the "Property")** executed by the Company in favor of Regions Bank, an Alabama banking corporation **(the "Fiscal Agent").** The Property is more fully described in Exhibit A **attached hereto. The Company's obligation to repay the** Project Loan is evidenced by a project loan note, dated October 1, 2023 **(the "Project Loan Note")** executed by the Company payable to the Fiscal Agent, and is due in full on April 10, 2026, unless extended pursuant to the terms of the Credit Disbursement Agreement by and between Senior Lender and the Company dated as of even date herewith **(the "Credit Disbursement Agreement").**

B. The Company has requested the Senior Lender to permit the Company to enter into that certain Loan Agreement dated as of October 10, 2023 between Memphis Housing and Company whereby Memphis Housing has made or is making various loans to the Company, which loans that are the subject of this Agreement are in the aggregate total principal amount of $1,254,608 **(the "Subordinate Loan").**

C. The Subordinate Loan is evidenced by, among other things, that certain Deed of Trust Note (National Housing Trust Funds) in the amount of $754,608 and that certain Deed of Trust Note (TN Housing Trust Funds) in the amount of $500,000, each dated as of October 10, **2023 (collectively, the "Subordinate**

Note"), made by the Company to the order of the Memphis Housing, in the aggregate total principal amount of $1,254,608.

D. The Subordinate Loan is or will be secured by that Leasehold Deed of Trust, Security Agreement and Fixture Filing (National Housing Trust Funds) and that certain Leasehold Deed of Trust, Security Agreement and Fixture Filing (TN Housing Trust Funds), each dated as of October 10, 2023 **(collectively, the "Subordinate Mortgage")** by the Company in favor of Memphis Housing.

E. The Subordinate Loan will be made from funds that are granted to Memphis Housing by Tennessee Housing pursuant to a Grant Contract (National Housing Trust Funds) by and between Tennessee Housing and Memphis Housing dated July 1, 2020, as amended on October 2, 2023 and a Working Agreement (TN Housing Trust Funds) by and between Tennessee Housing and Memphis Housing dated September 13, 2021, as amended on October 2, 2023 **(collectively, the "Tennessee Housing Grant Agreements")** and evidenced by the National Housing Trust Fund Program Rental Housing Promissory Note in the amount of $754,608 and the Tennessee Housing Trust Fund Competitive Grants Program in the amount of $500,000, each dated as of October 10, 2023 (collectively, the **"Tennessee Housing Notes"),** made by Memphis Housing to Tennessee Housing.

F. As security for the Tennessee Housing Notes, the Subordinate Mortgage is or will be assigned pursuant to that certain Collateral Assignment of Leasehold Deed Of Trust, Security Agreement and Fixture Filing (TN HTF – Edgeview at Legends Park) and that certain Collateral Assignment of Leasehold Deed of Trust, Security Agreement And Fixture Filing (NHTF – Edgeview at Legends Park), each dated as of October 10, 2023 **(collectively, the "Tennessee Housing Collateral Assignments"), made** by Memphis Housing, as assignor, to Tennessee Housing, as assignee.

G. The Senior Lender has agreed to permit the Subordinate Lender to make the Subordinate Loan and to place a subordinate mortgage lien against the Property subject to all of the conditions contained in this Agreement.

NOW, THEREFORE, in order to induce the Senior Lender to permit the Subordinate Lender to make the Subordinate Loan to the Company and to place a subordinate mortgage lien against the Property, and in consideration thereof, the Senior Lender, the Subordinate Lender and the Company agree as follows:

1. Definitions.

In addition to the terms defined in the Recitals to this Agreement, for purposes of this Agreement the following terms have the respective meanings set forth below:

"Affiliate" means, when used with respect to a Person, any corporation, partnership, joint venture, limited liability company, limited liability partnership, trust or individual controlled by, under common control with, or which controls such Person (the term **"control" for these purposes shall mean the ability,** whether by the ownership of shares or other equity interests, by contract or otherwise, to elect a majority of the directors of a corporation, to make management decisions on behalf of, or independently to select the managing partner of, a partnership, or otherwise to have the power independently to remove and then select a majority of those individuals exercising managerial authority over an entity, and control shall be conclusively presumed in the case of the ownership of 50% or more of the equity interests).

"Business Day" means any day other than Saturday, Sunday or a day on which the Senior Lender is not open for business.

"Company" means the Person named as such in the first paragraph of this Agreement and any other Person (other than the Senior Lender) who acquires title to the Property after the date of this

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

Agreement.

"Default Notice" means: (a) a copy of the written notice from the Senior Lender to the Company stating that a Project Loan Default has occurred under the Project Loan; or (b) a copy of the written notice from the Subordinate Lender to the Company stating that a Subordinate Loan Default has occurred under the Subordinate Loan. Each Default Notice shall specify the default upon which such Default Notice is based.

"Person" means an individual, estate, trust, partnership, corporation, limited liability company, limited liability partnership, governmental department or agency or any other entity which has the legal capacity to own property.

"Project Loan Default" means the occurrence of an "Event of Default" as that term is defined in the Project Loan Documents.

"Project Loan Documents" means the Credit Disbursement Agreement by and between Senior Lender and the Company dated as of October 1, 2023, the Project Loan Note, the Project Mortgage, and all other documents evidencing, securing or otherwise executed and delivered in connection with the Project Loan.

"Senior Lender" means the Person named as such in the first paragraph on page 1 of this Agreement. When any other Person becomes the legal holder of the Project Loan Note, such other Person shall automatically become the Senior Lender.

"Subordinate Lender" means the Person named as such in the first paragraph on page 1 of this Agreement. When any other Person becomes the legal holder of the Subordinate Loan, such other Person shall automatically become the Subordinate Lender.

"Subordinate Loan Default" means a default by the Company in performing or observing any of the terms, covenants or conditions in the Subordinate Loan Documents to be performed or observed by it, which continues beyond any applicable period provided in the Subordinate Loan Documents for curing the default.

"Subordinate Loan Documents" means the Subordinate Loan Agreement, the Subordinate Mortgage, the Subordinate Note, the Subordinate LURA, the Tennessee Housing Collateral Assignment, the Tennessee Housing Grant Agreements, the Tennessee Housing Notes and all other documents evidencing, securing or otherwise executed and delivered in connection with the Subordinate Loan.

"Subordinate Loan Agreement" means the Loan Agreement of even date herewith between the Memphis Housing and the Company.

"Subordinate LURA" means collectively, the National Housing Trust Fund Program Declaration of Restrictive Covenants and the Tennessee Housing Trust Fund Competitive Grants Program Declaration of Restrictive Covenants, each dated as of October 10, 2023, by and among Memphis Housing, as grant recipient, the Company and Tennessee Housing.

"Subordinate Mortgage" has the meaning as set forth in the Recitals.

"Subordinate Note" has the meaning as set forth in the Recitals.

"Tennessee Housing Collateral Assignments" has the meaning as set forth in the Recitals.

"Tennessee Housing Grant Agreements" has the meaning as set forth in the Recitals.

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

"Tennessee Housing Notes" has the meaning as set forth in the Recitals.

2. Permission to Place Mortgage Lien Against Property.

The Senior Lender agrees, notwithstanding the prohibition against inferior liens on the Property contained in the Project Loan Documents and subject to the provisions of this Agreement, to permit the Subordinate Lender to record the Subordinate Mortgage and other recordable Subordinate Loan Documents against the Property (which are subordinate in all respects to the lien of the Project Mortgage) to secure the Company's obligation to repay all of the obligations, indebtedness and liabilities of the Company to the Subordinate Lender under and in connection with the Subordinate Loan. Such permission is subject to the condition that each of the representations and warranties made by the Company and the Subordinate Lender in Section 3 is true and correct on the date of this Agreement and on the date on which the proceeds of the Subordinate Loan are disbursed to the Company. If any of the representations and warranties made by the Company and the Subordinate Lender in Section 3 is not true and correct on both of those dates, the provisions of the Project Loan Documents applicable to unpermitted liens on the Property shall apply.

3. Company's and Subordinate Lender's Representations and Warranties.

The Company makes the following representations and warranties to the Senior Lender and the Subordinate Lender makes the representations and warranties set forth in (a) and (b) below to Senior Lender:

(a) Subordinate Note. The Subordinate Note shall be deemed to contain the following provision:

> The indebtedness evidenced by this Note is and shall be subordinate in right of payment to the prior payment in full of the indebtedness evidenced by that certain Project Loan Note (the "Senior Note") in the original principal amount of $12,800,000 executed by Legends Park Senior LLC, a Tennessee limited liability company (the "Borrower"), payable to Regions Bank, an Alabama banking corporation (the "Fiscal Agent"), to the extent and in the manner provided in that certain Subordination and Standstill Agreement of even date herewith between Subordinate Lender (as defined in the Subordination Agreement), Borrower and the Senior Lender (the "Subordination Agreement"). The Mortgage securing this Note is and shall be subject and subordinate in all respects to the liens, terms, covenants and conditions of the Project Mortgage securing the Project Loan Note as more fully set forth in the Subordination Agreement. The rights and remedies of the payee and each subsequent holder of this Note under the Mortgage securing this Note are subject to the restrictions and limitations set forth in the Subordination Agreement. Each subsequent holder of this Note shall be deemed, by virtue of such holder's acquisition of this Note, to have agreed to perform and observe all of the terms, covenants and conditions to be performed or observed by the Subordinate Lender under the Subordination Agreement.

(b) Subordinate Loan. The indebtedness owed by Company to Subordinate Lender is, and shall remain, subordinate to the Project Loan and the Project Loan Documents.

(c) Relationship of Company to Subordinate Lender. Tennessee Housing is not an Affiliate of the Company. Memphis Housing is an Affiliate of the Company.

(d) Subordinate Loan Documents. The executed Subordinate Loan Documents are substantially in the same forms as those submitted to, and approved by, Senior Lender prior to the

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

date of this Agreement. Upon execution and delivery of the Subordinate Loan Documents, Company shall deliver to Senior Lender an executed copy of each of the Subordinate Loan Documents.

(e) **Project Loan Documents.** The executed Project Loan Documents are substantially in the same forms as, when applicable, those submitted to, and approved by, Senior Lender prior to the date of this Agreement. Upon execution and delivery of the Project Loan Documents, the Company shall deliver to Subordinate Lender an executed copy of each of the Project Loan Documents.

(f) **Term.** The term of the Subordinate Note does not end before the term of the Project Loan.

4. Terms of Subordination.

(a) Agreement to Subordinate. The Senior Lender and the Subordinate Lender agree that: (i) the indebtedness evidenced by the Subordinate Loan Documents is and shall be subordinated in right of payment, to the extent and in the manner provided in this Agreement to the prior payment in full of the indebtedness evidenced by the Project Loan Documents, and (ii) the Subordinate Mortgage and the other Subordinate Loan Documents are and shall be subject and subordinate in all respects to the liens, terms, covenants and conditions of the Project Mortgage and the other Project Loan Documents and to all advances heretofore made or which may hereafter be made pursuant to the Project Mortgage and the other Project Loan Documents (including but not limited to, all sums advanced for the purposes of (1) protecting or further securing the lien of the Project Mortgage, curing defaults by the Company under the Project Loan Documents or for any other purpose expressly permitted by the Project Mortgage, or (2) constructing, renovating, repairing, furnishing, fixturing or equipping the Property).

(b) Subordination of Subrogation Rights. The Subordinate Lender agrees that if, by reason of its payment of real estate taxes or other monetary obligations of the Company, or by reason of its exercise of any other right or remedy under the Subordinate Loan Documents, it acquires by right of subrogation or otherwise a lien on the Property which (but for this subsection) would be senior to the lien of the Project Mortgage, then, in that event, such lien shall be subject and subordinate to the lien of the Project Mortgage.

(c) Payments After Project Loan Default. The Company agrees that, after it receives notice (or otherwise acquires knowledge) of a Project Loan Default under the Project Loan Documents, it will not make any payments under or pursuant to the Subordinate Loan Documents (including but not limited to **principal, interest, additional interest, late payment charges, default interest, attorney's fees, or any other sums secured by the Subordinate Mortgage) without the Senior Lender's prior written consent.** The Subordinate Lender agrees that, after it receives a Default Notice from the Senior Lender with written instructions directing the Subordinate Lender not to accept payments from the Company on account of the Subordinate Loan, it will not accept any payments under or pursuant to the Subordinate Loan Documents (including but not limited to principal, interest, additional interest, late payment charges, default interest, **attorney's fees, or any other sums secured by the Subordinate Mortgage) without the Senior Lender's** prior written consent. If the Subordinate Lender receives written notice from the Senior Lender that the Project Loan **Default which gave rise to the Subordinate Lender's obligation not to accept payments has been cured,** waived, or otherwise suspended by the Senior Lender, the restrictions on payment to the Subordinate Lender in this Section 4 shall terminate, and the Senior Lender shall have no right to any subsequent payments **made to the Subordinate Lender by the Company prior to the Subordinate Lender's** receipt of a new Default Notice from the Senior Lender in accordance with the provisions of this Section 4(c).

(d) Remitting Subordinate Loan Payments to Senior Lender. If, after the Subordinate Lender receives a Default Notice from the Senior Lender in accordance with subsection (c) above, the Subordinate Lender receives any payments under the Subordinate Loan Documents, the Subordinate Lender

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

agrees that such payment or other distribution will be received and held in trust for the Senior Lender and unless the Senior Lender otherwise notifies the Subordinate Lender in writing, will be promptly remitted, in kind to the Senior Lender, properly endorsed to the Senior Lender, to be applied to the principal of, interest on and other amounts due under the Project Loan Documents in accordance with the provisions of the Project Loan Documents. By executing this Agreement, the Company specifically authorizes the Subordinate Lender to endorse and remit any such payments to the Senior Lender, and specifically waives any and all rights to have such payments returned to the Company or credited against the Subordinate Loan. The Company and Senior Lender acknowledge and agree that payments received by the Subordinate Lender, and remitted to the Senior Lender under this Section 4, shall not be applied or otherwise credited against the Subordinate Loan, nor shall the tender of such payment to the Senior Lender waive any Subordinate Loan Default which may arise from the inability of the Subordinate Lender to retain such payment or apply such payment to the Subordinate Loan.

(e) Agreement Not to Commence Bankruptcy Proceeding. The Subordinate Lender agrees that during the term of this Agreement it will not commence, or join with any other creditor in commencing any bankruptcy reorganization, arrangement, insolvency or liquidation proceedings with respect to the Company, without the Senior Lender's prior written consent.

5. Default Under Subordinate Loan Documents.

(a) Notice of Default and Cure Rights. The Subordinate Lender shall deliver to the Senior Lender a written Default Notice within five Business Days in each case where the Subordinate Lender has given a Default Notice to the Company. Subject to the terms and conditions of this Agreement, including, without limitation Senior Lender's cure rights as set forth herein, failure of the Subordinate Lender to send a Default Notice to the Senior Lender shall not prevent the exercise of the Subordinate Lender's rights and remedies under the Subordinate Loan Documents. The Senior Lender shall have the right, but not the obligation, to cure any Subordinate Loan Default within 60 days following the date of such notice; provided, however that the Subordinate Lender shall be entitled, during such 60-day period, to continue to pursue its rights and remedies under the Subordinate Loan Documents to the extent permitted under Section 5(b); further provided, in the event Senior Lender effects cure during the time period set forth herein for Senior Lender to cure a default by the Company, then Subordinate Lender shall, at such time Senor Lender cures any default by the Company, cease pursuit of Subordinate Lender's rights and remedies under the Subordinate Loan Documents. Subordinate Lender hereby agrees it shall accept cure by Senior Lender of a default by the Company under the Subordinate Loan Documents. All amounts paid by the Senior Lender in accordance with the Project Loan Documents to cure a Subordinate Loan Default shall be deemed to have been advanced by the Senior Lender pursuant to, and shall be secured by the lien of, the Project Mortgage.

(b) Subordinate Lender's Agreement to Standstill. Subject to Senior Lender's right to notice and an opportunity to cure a Subordinate Loan Default, if a Subordinate Loan Default occurs and is continuing beyond the cure date afforded Senior Lender hereunder to cure a default by the Company, the Subordinate Lender agrees that until the expiration of sixty (60) days following Senior Lender's receipt of a Default Notice from Subordinate Lender, without the Senior Lender's prior written consent, it will not accelerate the Subordinate Loan, commence foreclosure proceedings with respect to the Property, collect rents, appoint (or seek the appointment of) a receiver or institute any other collection or enforcement action.

(c) Cross Default. The Company and the Subordinate Lender agree that a Subordinate Loan Default shall constitute a Project Loan Default under the Project Loan Documents and the Senior Lender shall have the right to exercise all rights or remedies under the Project Loan Documents in the same manner as in the case of any other Project Loan Default. If the Subordinate Lender notifies the Senior Lender in writing that any Subordinate Loan Default of which the Senior Lender has received a Default Notice has

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

been cured or waived, as determined by the Subordinate Lender in its sole discretion, then provided that Senior Lender has not conducted a sale of the Property pursuant to its rights under the Project Loan Documents, any Project Loan Default under the Project Loan Documents arising solely from such Subordinate Loan Default shall be deemed cured, and the Project Loan shall be reinstated, provided, however, that the Senior Lender shall not be required to return or otherwise credit for the benefit of the Company any default rate interest or other default related charges or payments received by the Senior Lender during such Project Loan Default.

6. Default Under Project Loan Documents.

(a) Notice of Default and Cure Rights. The Senior Lender shall deliver to the Subordinate Lender a Default Notice within five Business Days in each case where the Senior Lender has given a Default Notice to the Company. Failure of the Senior Lender to send a Default Notice to the Subordinate Lender shall not prevent the exercise of the Senior Lender's rights and remedies under the Project Loan Documents, subject to the provisions of this Agreement. The Subordinate Lender shall have the right, but not the obligation, to cure any such Project Loan Default as provided below. Subordinate Lender may have up to 30 days from the date of the Default Notice to cure any monetary default under the Project Loan Documents; provided, however, that the Senior Lender shall be entitled during such 30-day period to continue to pursue its remedies with respect to the Property. Subordinate Lender may have up to 60 days from the date of the Default Notice to cure a non-monetary default if during such 60-day period Subordinate Lender keeps current all payments required by the Project Loan Documents. In the event that such a non-monetary default creates an unacceptable level of risk relative to the Property, or Senior Lender's secured position relative to the Property, as determined by Senior Lender in its sole discretion, then Senior Lender may exercise during such 60-day period all available rights and remedies to protect and preserve the Property and the rents, revenues and other proceeds from the Property. All amounts paid by the Subordinate Lender to the Senior Lender to cure a Project Loan Default shall be deemed to have been advanced by the Subordinate Lender pursuant to, and shall be secured by the lien of, the Subordinate Mortgage.

(b) Cross Default. The Subordinate Lender agrees that, notwithstanding any contrary provision contained in the Subordinate Loan Documents, a Project Loan Default shall not constitute a default under the Subordinate Loan Documents if no other default occurred under the Subordinate Loan Documents until either (i) the Senior Lender has accelerated the maturity of the Project Loan, or (ii) the Senior Lender has taken affirmative action to exercise its rights under the Project Mortgage to collect rent, to appoint (or seek the appointment of) a receiver or to foreclose on (or to exercise a power of sale contained in) the Project Mortgage. At any time after a Project Loan Default is determined to constitute a default under the Subordinate Loan Documents, the Subordinate Lender shall be permitted to pursue its remedies for default under the Subordinate Loan Documents, subject to the restrictions and limitations of this Agreement. If at any time the Company cures any Project Loan Default to the satisfaction of the Senior Lender, as evidenced by written notice from the Senior lender to the Subordinate Lender, any default under the Subordinate Loan Documents arising from such Project Loan Default shall be deemed cured and the Subordinate Loan shall be retroactively reinstated as if such Project Loan Default had never occurred.

7. Conflict.

The Company, the Senior Lender and the Subordinate Lender each agrees that, in the event of any conflict or inconsistency between the terms of the Project Loan Documents, the Subordinate Loan Documents and the terms of this Agreement, the terms of this Agreement shall govern and control solely as to the following: (a) the relative priority of the security interests of the Senior Lender and the Subordinate Lender in the Property; (b) the timing of the exercise of remedies by the Senior Lender and the Subordinate Lender under the Project Mortgage and the Subordinate Mortgage, respectively; and (c) solely as between the Senior Lender and the Subordinate Lender, the notice requirements, cure rights, and the other rights

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

and obligations which the Senior Lender and the Subordinate Lender have agreed to as expressly provided in this Agreement. The Company acknowledges that the terms and provisions of this Agreement shall not, and shall not be deemed to: extend the Company's time to cure any Project Loan Default or Subordinate Loan Default, as the case may be; give the Company the right to notice of any Project Loan Default or Subordinate Loan Default, as the case may be other than that, if any, provided, respectively under the Project Loan Documents or the Subordinate Loan Documents; or create any other right or benefit for Company as against Senior Lender or Subordinate Lender.

8. Rights and Obligations of the Subordinate Lender Under the Subordinate Loan Documents and of the Senior Lender under the Project Loan Documents.

Subject to each of the other terms of this Agreement, all of the following provisions shall supersede any provisions of the Subordinate Loan Documents covering the same subject matter:

(a) Protection of Security Interest. The Subordinate Lender shall not, without the prior written consent of the Senior Lender in each instance, take any action which has the effect of increasing the indebtedness outstanding under, or secured by, the Subordinate Loan Documents, except that the Subordinate Lender shall have the right to advance funds to cure Project Loan Defaults pursuant to Section 6(a) above and advance funds pursuant to the Subordinate Mortgage for the purpose of paying real estate taxes and insurance premiums, making necessary repairs to the Property and curing other defaults by the Company under the Subordinate Loan Documents.

(b) Condemnation or Casualty. In the event of a taking or threatened taking by condemnation or other exercise of eminent domain of all or a portion of the Property (collectively, a "**Taking**"); or the occurrence of a fire or other casualty resulting in damage to all or a portion of the Property (collectively, a "Casualty"), at any time or times when the Project Mortgage remains a lien on the Property the following provisions shall apply:

(1) The Subordinate Lender hereby agrees that its rights (under the Subordinate Loan Documents or otherwise) to participate in any proceeding or action relating to a Taking and/or a Casualty, or to participate or join in any settlement of, or to adjust, any claims resulting from a Taking or a Casualty shall be and remain subordinate in all respects to the Senior Lender's rights under the Project Loan Documents with respect thereto, and the Subordinate Lender shall be bound by any commercially reasonable settlement or adjustment of a claim resulting from a Taking or a Casualty made by the Senior Lender; provided, however, this subsection and/or anything contained in this Agreement shall not limit the rights of the Subordinate Lender to file any pleadings, documents, claims or notices with the appropriate court with jurisdiction over the proposed Taking and/or Casualty; and

(2) all proceeds received or to be received on account of a Taking or a Casualty, or both, shall be applied (either to payment of the costs and expenses of repair and restoration or to payment of the Project Loan) in the manner determined by the Senior Lender in its commercially reasonable discretion; provided, however, that if the Senior Lender elects to apply such proceeds to payment of the principal of, interest on and other amounts payable under the Project Loan Documents, any proceeds remaining after the satisfaction in full of the principal of, interest on and other amounts payable under the Project Loan Documents shall be paid to, and may be applied by, the Subordinate Lender in accordance with the applicable provisions of the Subordinate Loan Documents, provided however, the Senior Lender agrees to consult with the Subordinate Lender in determining the application of Casualty proceeds, provided further however that in the event of any disagreement between the Senior Lender and the Subordinate Lender over

the application of Casualty proceeds, the decision of the Senior Lender, in its commercially reasonable discretion, shall prevail.

(c) No Modification of Subordinate Loan Documents. The Company and the Subordinate Lender each agrees that, until the principal of interest on and all other amounts payable under the Project Loan Documents have been paid in full, it will not, without the prior written consent of the Senior Lender in each instance, increase the amount of the Subordinate Loan, increase the required payments due under the Subordinate Loan, decrease the term of the Subordinate Loan, increase the interest rate on the Subordinate Loan, or otherwise amend the Subordinate Loan terms in a manner that creates an adverse effect upon the Senior Lender under the Project Loan Documents. Any unauthorized amendment of the Subordinate Loan Documents or assignment of the Subordinate Lender's interest in the Subordinate Loan without the Senior Lender's consent shall be void ab initio and of no effect whatsoever, and Subordinate Lender agrees that it shall not transfer or assign the Subordinate Loan or the Subordinate Loan Documents other than to a governmental entity without the prior written consent of the Senior Lender.

9. Closing, Modification or Refinancing of Project Loan.

The Subordinate Lender consents to any agreement or arrangement in which the Senior Lender waives, postpones, extends, reduces or modifies any provisions of the Project Loan Documents, including any provision requiring the payment of money. Subordinate Lender further agrees that its agreement to subordinate hereunder shall extend to any new mortgage debt which is for the purpose of refinancing all or any part of the Project Loan (including reasonable and necessary costs associated with the closing and/or the refinancing) and, in the event of new mortgage debt, Subordinate Lender shall execute and deliver to Senior Lender a new subordination agreement on the same terms and conditions as this Subordination Agreement.

Notwithstanding the foregoing, without the prior written consent of Subordinate Lender, the Subordinate Lender's agreement and consent as provided in this Section 9 shall not apply to any modification, amendment, refinance or replacement of the Project Loan or any Project Loan Document that has the effect of increasing the outstanding principal balance of the Project Loan in excess of the original outstanding principal balance of the Project Loan plus any unpaid interest, default interest and costs and expenses incurred in connection with any such modification, amendment, refinance or replacement.

10. Default by the Subordinate Lender or Senior Lender.

If the Subordinate Lender or Senior Lender defaults in performing or observing any of the terms, covenants or conditions to be performed or observed by it under this Agreement, the other, non-defaulting lender shall have the right to all available legal and equitable relief.

11. Notices.

Each notice, request, demand, consent, approval or other communication (hereinafter in this Section referred to collectively as "notices" and referred to singly as a "notice") which the Senior Lender or the Subordinate Lender is required or permitted to give to the other party pursuant to this Agreement shall be in writing and shall be deemed to have been duly and sufficiently given if: (a) personally delivered with proof of delivery thereof (any notice so delivered shall be deemed to have been received at the time so delivered); or (b) sent by Federal Express (or other similar national overnight courier) designating early morning delivery (any notice so delivered shall be deemed to have been received on the next Business Day following receipt by the courier); or (c) sent by United States registered or certified mail, return receipt requested, postage prepaid, at a post office regularly maintained by the United States Postal Service (any

DocuSign Envelope ID: 9619A7C4-A859-434C-80EE-549E176F33E1

notice so sent shall be deemed to have been received two days after mailing in the United States), addressed to the respective parties as follows:

Either party may, by notice given pursuant to this Section, change the person or persons and/or address or addresses, or designate an additional person or persons or an additional address or addresses for its notices, but notice of a change of address shall only be effective upon receipt.

13. General.

(a) Assignment/Successors. This Agreement shall be binding upon the Company, the Senior Lender and the Subordinate Lender and shall inure to the benefit of the respective legal successors and assigns of the Senior Lender and the Subordinate Lender.

(b) No Partnership or Joint Venture. The Senior Lender's permission for the placement of the Subordinate Loan Documents does not constitute the Senior Lender as a joint venturer or partner of the Subordinate Lender. Neither party hereto shall hold itself out as a partner, agent or Affiliate of the other party hereto.

(c) Senior Lender's and Subordinate Lender's Consent. Wherever the Senior Lender's consent or approval is required by any provision of this Agreement, such consent or approval may be granted or denied by the Senior Lender in its sole and absolute discretion, unless otherwise expressly provided in this Agreement. Wherever the Subordinate Lender's consent or approval is required by any provision of this Agreement, such consent or approval may be granted or denied by the Subordinate Lender in its sole and absolute discretion, unless otherwise expressly provided in this Agreement.

(d) Further Assurances. The Subordinate Lender, the Senior Lender and the Company each agree, at the Company's expense, to execute and deliver all additional instruments and/or documents reasonably required by any other party to this Agreement in order to evidence that the Subordinate Mortgage is subordinate to the lien, covenants and conditions of the Project Mortgage, or to further evidence the intent of this Agreement.

(e) Amendment. This Agreement shall not be amended except by written instrument signed by all parties hereto.

(f) Governing Law. This Agreement shall be governed by the laws of the State in which the Property is located.

(g) Severable Provisions. If any provision of this Agreement shall be invalid or unenforceable to any extent, then the other provisions of this Agreement, shall not be affected thereby and shall be enforced to the greatest extent permitted by law.

(h) Term. The term of this Agreement shall commence on the date hereof and shall continue until the earliest to occur of the following events: (i) the payment of all of the principal of, interest on and other amounts payable under the Project Loan Documents; (ii) the payment of all of the principal of, interest on and other amounts payable under the Subordinate Loan Documents, other than by reason of payments which the Subordinate Lender is obligated to remit to the Senior Lender pursuant to Section 4 hereof; (iii) the acquisition by the Senior Lender of title to the Property pursuant to a foreclosure or a deed in lieu of foreclosure of, or the exercise of a power of sale contained in, the Project Mortgage; or (iv) the acquisition by the Subordinate Lender of title to the Property pursuant to a foreclosure or a deed in lieu of foreclosure of, or the exercise of a power of sale contained in, the Subordinate Mortgage, but only if such acquisition of title does not violate any of the terms of this Agreement.

(i) Sale of Project Loan. Nothing in this Agreement shall limit Senior Lender's (including any assignee or transferee of Senior Lender) right to sell or transfer the Project Loan, or any interest in the Project Loan. The Project Loan or a partial interest in the Project Loan (together with this Agreement and the other Project Loan Documents) may be sold one or more times without prior notice to Company.

(j) Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be considered an original for all purposes; provided, however, that all such counterparts shall together constitute one and the same instrument.

Grantor: MEMPHIS HOUSING AUTHORITY
Division of Remediation Site Number: 79-846S1
Tax Parcel Identification Number: 051017 00021

AMENDED NOTICE OF LAND USE RESTRICTIONS

Notice is hereby given that pursuant to Tennessee Code Annotated Section 68-212-225, the Commissioner of the Tennessee Department of Environment and Conservation ("TDEC") has determined that this land use restriction is an appropriate remedial action at the below-described property for the environmental conditions identified. The Register of Deeds shall record this Notice and index it in the grantor index under the name of the below-referenced Grantor. Tenn. Code Ann. Section 68-212-225(d). The effective date of this Notice of Land Use Restrictions shall be the date upon which the Notice has been recorded with the Register of Deed's Office of Shelby County.

Witnesseth:

WHEREAS, the Grantor, the Memphis Housing Authority is the owner of real property located at 981 Peach Avenue, in Memphis, Shelby County, Tennessee, State of Tennessee, the same being identified as Tax Parcel No. 051017 00021 (the eastern portion of what has historically referred to Tax Parcel No. 051017 00018), and which is more particularly described in Exhibit A, referred to herein as the "Property," and,

WHEREAS, the Property is shown on a survey drawn by Kenneth E. Francis, Jr. (Tennessee Certificate #1567), dated January 3, 2023, attached hereto as Exhibit B and incorporated herein by reference; and

WHEREAS, the Property was included within a larger tract of property that was covered by an existing brownfield voluntary agreement and pursuant to that brownfield voluntary agreement, a notice of land use restrictions was recorded on the larger tract of property (Instrument Number 12005040) filed with the office of the Shelby County Register of Deeds;

WHEREAS, Grantor, also sometimes referred to herein as the "Voluntary Party," on or about October 3, 2023, entered into a Brownfield Voluntary Agreement with TDEC pursuant to Tennessee Code Annotated section 68-212-224 for the purpose of addressing the real or perceived threat of the presence of hazardous substances, solid waste, or other pollutants at the Property; and

WHEREAS, in accordance with work plans approved by TDEC and the terms of the Brownfield Voluntary Agreement for the Property, TDEC has determined that this Notice of Land Use Restrictions is an appropriate remedial action for the protection of human health and the environment for the contamination identified herein, so long as these land use restrictions are instituted and observed for the Property; and,

WHEREAS, the Grantor, for itself and its successors and/or assigns, including without limitation any agents, representatives, contractors, subcontractors, or employees thereof, has agreed to impose certain land use restrictions on the Property as set forth hereinafter and has agreed to comply with, preserve, and maintain these restrictions in perpetuity as described herein. Any person who owns or leases a property subject to land use restrictions under Tennessee Code Annotated Section 68-212-225 shall abide by the restrictions.

NOW, THEREFORE, in consideration of the foregoing, the Grantor hereby declares that the Property should be held, sold, and conveyed subject to the following land use restrictions in place of the existing land use restrictions heretofore in place for the Property:

I. LOCATION OF CONTAMINATION

The Property is located at 981 Peach Avenue, Memphis, Shelby County, Tennessee, and is referred to in the Brownfield Voluntary Agreement as the Peach Avenue/Block A East Site. A survey of the Property was conducted by Kenneth E. Francis, Jr. (Tennessee Certificate #1567), dated January 3, 2023, and is attached as Exhibit B.

A description of environmental conditions existing at the Site appears as part of collective Exhibit C. Also, attached as part of Exhibit C is a site map depicting the location of sampling activities and tables with the results of laboratory analysis.

II. RESTRICTIONS

The Property is hereby released from the operation and effect of that certain Notice of Land Use Restrictions dated January 9, 2012, and recorded in the office of the Shelby County Register of Deeds (Instrument Number 12005040) on or about January 13, 2012.

The purpose of these land use restrictions is to ensure the protection of human health and the environment by preventing certain uses or activities that could result in exposure to contamination present at the Site through direct contact, ingestion, or inhalation. Unless otherwise specified, the following restrictions apply to the entire Property. These restrictions shall run with the land and bind the Grantor, successors, and assigns, including without limitation any agents, representatives, contractors, subcontractors, or employees thereof. The Grantor agrees that the use of Property will be restricted as follows:

Activity Controls

Activities on the Property are prohibited as follows:

- The groundwater beneath the Property shall not be used, accessed, extracted, or otherwise disturbed unless required by a Government agency of competent jurisdiction or otherwise approved by TDEC. This Land Use Restriction prohibits (1) the installation of groundwater wells for any purpose other than environmental monitoring and (2) the installation of groundwater wells intended for use as a potable water source. Any approval granted by TDEC shall be in writing and must contain a reference to this instrument.

Invasive Activity Controls

- The Grantor, its successors, or assigns shall not conduct any soil disturbance activity (including digging, drilling, excavation, grading of the soil) except in accordance with a Soil Management Plan approved by TDEC. This restriction does not include standard maintenance activities such as parking lot, patio, sidewalk, lawn, or drain maintenance or the replacement of any soil coverings (such as parking lots, patios, or sidewalks) provided that such coverings are promptly replaced or restored.

Vapor Mitigation System

- The building constructed at the Property is depicted on the site map attached as Exhibit D. The Grantor, its successors, or assigns shall not begin construction of any new building(s) or expand the footprint of the existing building at the Property without evaluating whether environmental conditions pose a threat of vapor intrusion into the new building(s) or expansion, sharing its findings with TDEC, and receiving TDEC's written approval. If a vapor mitigation system is determined by TDEC to be warranted based upon the data evaluation in order to safely allow occupancy of such impacted building(s) or expansion, construction or expansion of any impacted building(s) is prohibited until such structures are equipped with an appropriate passive or active mitigation system as proposed by the Property owner and approved by TDEC. Such system, either passive or active, shall have associated with it an appropriate period of verification sampling and operation and maintenance performance and reporting, with specific requirements determined by TDEC. No one shall disturb, modify, damage, or remove any vapor mitigation features at any structure at the Property unless approved in advance by TDEC and pursuant to a TDEC-approved work plan. Any approval granted by TDEC shall be in writing and must contain a reference to this instrument.

  The Grantor, its successors, or assigns shall be responsible for any costs incurred by TDEC and related to: 1) its review and oversight of work associated with the evaluation of whether environmental conditions pose a threat of vapor intrusion into any new building or expansion of any existing building; 2) its review and approval of any proposal for a vapor mitigation system; and 3) its work and oversight during any period of verification sampling and Operation and Maintenance performance and reporting,

III. GENERAL PROVISIONS

1. Access by the Department

The Property meets the definition of an inactive hazardous substance site or brownfield project as they are defined in Tennessee Code Annotated Section 68-212-202(a). In addition to any rights already possessed by the Department for access, this Notice of Land Use Restriction grants TDEC a right of reasonable access of the Property in connection with implementation or enforcement of this Notice of Land Use Restriction.

2. Compliance Enforcement

Any owner of the Property or any unit of local government having jurisdiction over any part of the Property may enforce this Notice of Land Use Restrictions by means of a civil action. The Commissioner of TDEC may enforce this Notice of Land Use Restrictions through the issuance of an Administrative Order or by means of a civil action, including one to obtain an injunction against present or threatened violations of the restriction. Any person who fails, neglects, or refuses to comply with a land use restriction commits a Class B misdemeanor and is subject to the assessment of a civil penalty of up to ten thousand dollars ($10,000) per day. Tenn. Code Ann. § 68-212-213. Nothing in this Notice of Land Use Restrictions shall restrict the Commissioner of TDEC from exercising any authority under applicable law.

3. Written Notice of the Presence of Contamination

The Grantor, its successors, or assigns agrees to include in any instrument conveying any interest in the Property or any portion thereof, including but not limited to deeds, leases, and subleases (excluding mortgages, liens, similar financing interests, and other non-possessory encumbrances), the following notice provision (with blanks to be filled in):

NOTICE: THE INTEREST CONVEYED HEREBY IS SUBJECT TO A NOTICE OF LAND USE RESTRICTIONS RECORDED IN THE REGISTERS OFFICE OF SHELBY COUNTY ON _____, 2025, INSTRUMENT NUMBER _____.

4. Written Notice of Conveyance of Property

The Grantor, its successor, or assigns agrees to provide notice to TDEC of any conveyance (voluntary or involuntary) of any ownership interest or any conveyance of any leasehold interest in the Property (excluding mortgages, liens, similar financing interests, and other non-possessory encumbrances). The Grantor, its successor, or assigns must provide TDEC with the notice within 30 days of the conveyance and include the name and business address of the transferee. The term "Transferee", as used in this Notice of Land Use Restrictions, shall mean any future owner of any possessory interest in the Property or any portion thereof, including, but not limited to, owners of an interest in fee simple, easement holders, or lessees. This notice shall not be required for individual conveyances if there is

a management company or homeowners association (HOA) that is responsible for complying with this Notice of Land Use Restrictions.

By taking title to an interest in or occupancy of the Property, any subsequent owner, lessee, or other party is required to comply with all the restrictions set forth in this Notice of Land Use Restrictions as required by Tenn. Code Ann. Section 68-212-225(f), unless otherwise exempted by applicable law.

5. Term

This Notice of Land Use Restrictions shall run with and bind the Property and shall be binding upon all parties having right, title, or interest in the Property or any part thereof, their heirs, successors, assigns, grantees, and lessees unless this Notice of Land Use Restrictions is made less stringent or canceled as set forth under the paragraph entitled "Amendment and Termination."

6. Amendment and Termination

After public notice and an opportunity for public input as provided in Tennessee Code Annotated Section 68-212-225(e), this Notice of Land Use Restrictions may be made less stringent or canceled by the Commissioner of TDEC where the risk has been eliminated or reduced so that less restrictive land use controls are protective of human health and the environment.

The Grantor, its successors, or assigns may request that TDEC approve a modification or termination of the Notice of Land Use Restrictions. The request shall contain information demonstrating the proposed modification or termination shall, if implemented, protect human health and the environment. TDEC shall review any submitted information and may request additional information. Information to support a request for modification or termination may include one or more of the following:

a) a proposal to perform additional remedial work;
b) new information regarding the risks posed by the residual contamination;
c) information demonstrating that contamination identified in this Notice of Land Use Restrictions has diminished;
d) information demonstrating that an engineered feature or structure is no longer necessary;
e) information demonstrating that the proposed modification would not adversely impact the remedy and is protective of human health and the environment; or
f) other appropriate supporting information.

The Grantor, its successors, or assigns seeking approval of other land uses or to cancel or make a land use restriction incorporated herein less stringent shall be responsible for any costs incurred by TDEC in the review and oversight of work associated with the restriction modification.

7. If the Grantor, its successors, or assigns fail comply with this Notice of Land Use Restrictions, and the Department, in its sole discretion, determines that such default is curable, the Department shall provide the Grantor, its successors, or assigns written notice of the default and a period of at least 30 days for the Grantor, its successors, or assigns, or any third party with authority to act on behalf of or in the place of such the Grantor, its successors, or assigns, to cure the default. The Grantor, its successors, or assigns agree that the Department is not required to provide notice and opportunity to cure for successive or repeated defaults, or if the Department determines, it its sole discretion, that a default poses an imminent, substantial danger to the public health or safety, or to the environment. The Department shall not be deemed to have waived any rights or remedies available at law or under this Notice of Land Use Restrictions by providing the opportunity to cure any default.

8. Severability

   Invalidation of any of these covenants or restrictions by judgement or court order shall in no way affect any other provisions, which shall remain in full force and effect.

   The administrative record for the Property referenced in this Notice of Land Use Restrictions is maintained by the Tennessee Department of Environment and Conservation, Division of Remediation. For further information concerning the Property refer to Site Number 79-846S1.

17. Reciprocal Easement Agreement of record as Instrument No. 08115218 as amended by that certain First Amendment of record as Instrument No. 08140501, as affected by that certain Second Amendment of record as Instrument No. 10097967, as affected by that certain Third Amendment of record as Instrument No. 11111904, as affected that certain Fourth Amendment of record as Instrument No. 12143715 in the Shelby County Register's Office, Shelby County, Tennessee affects the subject property is not a plottable matter.

18. Declaration of Trust (Grant) Projects of record in Instrument Nos. 6H8752, CJ7792, as re-recorded at CM9304 and CJ7763 as re-record in CM3305 in the Shelby County Register's Office, Shelby County, Tennessee affect the subject property and are not plottable matters.

19. Regulatory and Operating Agreement of record in Instrument No. 08115217 in the Shelby County Register's Office, Shelby County, Tennessee affects the subject property and is not a plottable matter.

20. Easement for street purposes from the United States of America to the City of Memphis of record in Book 1533, Page 510 in the Shelby County Register's Office, Shelby County, Tennessee affects the subject property in that it created a portion of the right-of-way of Delmar Avenue.

21. Uniform Gas and Water Easement of record in Book 3241, Page 325 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property and is not shown.

22. Easement Contract of record in Book 3623, Page 17 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property and is not shown.

23. Easement Contract of record in Book 6009, Page 173 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property and is not shown.

24. Lack of direct access to a controlled highway (Interstate 40). Peach Avenue is located in Interstate 40 right-of-way.

25. Partial Release from Declaration of Trust of record in Instrument No. 22107422 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property.

26. Notice of Land Use Restrictions of record in Instrument No. 12005040 in the Shelby County Register's Office, Shelby County, Tennessee affect the subject property. A Designated area of buried contaminated soil shown on Exhibit D was located and flagged by others and is located as shown on C.O.S. A.

MISCELANEOUS NOTES:

1. Survey prepared for Powrose.
2. Bearings are relative to Tennessee State Plane Coordinates (NAD83).
3. Property is in the name of Memphis Housing Authority.
4. Property is vacant and there is no visible address.
5. This survey was prepared from the information provided in Commitment for Title Insurance by First American Title Insurance Company Commitment Number No. TNFA21-7520 with an effective date of December 28, 2022.
6. The subject property has access to a dedicated public right-of-way.
7. There is no visible evidence of cemeteries on the property.
8. There is no evidence of earth moving work or building construction within recent months.
9. There is no evidence of recent street or sidewalk construction. There are no proposed changes in street lines either completed or proposed by and available from the controlling jurisdiction.
10. There is no visible evidence of the site being used as a solid waste dump, sump or sanitary landfill.
11. At the time of the field survey there was no indication of wetlands delineated by the appropriate authorities. The surveyor did not perform an inspection for wetlands and makes no certification as to the existence or absence of wetlands on the site.
12. All utilities, drain lines and sewer lines are located from available records and field locations of above ground visible evidence only.
13. By map scaling and graphic plotting only the subject property is not located in a Special Flood Hazard Area (shaded) per Flood Insurance Rate Map No. 47157C0270 F with a revised date of September 28, 2007. Property is located in Zone X.
14. There may be underground or non-visible utilities, drain lines or sewer lines across this property that are not shown. The appropriate utility companies should be contacted for more specific locations and information on underground utilities.
15. Subsurface and environmental conditions were not examined or considered as part of this survey.
16. Governmental jurisdictional areas, if any, which might impact the use of the premises were not located. No liability is assumed by the undersigned for any loss resulting from the exercise of any government jurisdiction affecting the use of the premises.

SURVEYOR'S CERTIFICATE

To: First American Title Insurance Company

This is to certify that this map or plat and the survey on which it is based were made in accordance with the 2021 Minimum Standard Detail Requirements for ALTA/NSPS Land Title Surveys, jointly established and adopted by ALTA and NSPS, and includes Items 1, 2, 3, 4, 6(a)(b), 7(c)(i)(ii)(a), 8, 9, 11(b), 13, 14, 15, 17, 18, and 19 of Table A thereof.

The field work was completed on February 19, 2021.

Date of Plat or Map: January 03, 2023

EXHIBIT C

NOTICE OF LAND USE RESTRICTIONS

DESCRIPTION OF ENVIRONMENTAL CONDITIONS

Several environmental consultants have performed environmental assessment activities in association with the redevelopment of the former Dixie Homes site by and on behalf of the Memphis Housing Authority. Environmental assessment activities in that time frame also included environmental assessment activities at the Property. Environmental conditions identified during the older environmental assessment activities and environmental assessment activities conducted by EnSafe in 2022 and 2023 are detailed below.

In October and November 2007, Hess Environmental Services conducted soil sampling across the Former Dixie Homes redevelopment site, which included the Property. Soil samples were analyzed for asbestos, lead, polynuclear aromatic hydrocarbons (PAHs), Resource Conservation and Recovery Act (RCRA) 8 Metals, hexavalent chromium, and volatile organic compounds (VOCs). The results of the laboratory analysis for the Property are found in the tables excerpted from the Hess report and attached hereto. Data related to other parcels at Legends Park are redacted. Three (3) soil samples had detections of asbestos:

Chrysotile Detections

Detected %	Borings:	Sample ID
3%	334	576
2%	336	578
<1%	340	584

Asbestos was not detected in other samples collected at the Property. Lead was detected in all six composite soil samples at the Property, but did not exceed its U.S. EPA residential regional screening level (RSL) of 200 milligrams per kilogram (mg/kg).

Acenaphthene, acenaphthylene, anthracene, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, chrysene, dibenzo (a,h)anthracene, fluoranthene, fluorene, indeno(1,2,3-cd)pyrene, 2-methylnaphthalene, naphthalene, phenanthrene, and pyrene were detected in soil. Only one PAH, benzo(a)pyrene, exceeded its residential U.S. EPA regional screening level of 0.11 mg/kg in five (5) of six (6) composite soil samples collected for PAH analysis. Detected concentrations, Boring IDs, and Sample IDs are listed below.

Benzo(a)Pyrene Exceedances of Residential RSL:

Detected Concentration (mg/kg)	Borings	Sample ID
0.163	333 to 336	20071009 579
0.627	337-340	20071009 585
0.187	341-344	20071009 594

0.257	345 to 348	20071010 602
0.219	357 to 360	20071109 621

Notes:
RSL Regional Screening Level
mg/kg milligrams per kilogram or parts per million
Residential RSL is 0.11 mg/kg
Industrial RSL is 2.1 mg/kg

Benzo(a)pyrene did not exceed the residential screening level of 0.11 mg/kg in the sample collected for SVOC analysis (Borings 353 to 356; Sample ID 20071109 615). Acetone, benzene, ethylbenzene, toluene, 1,2,4-trimethylbenzene, 1,3,4-trimethylbenzene, m,p-xylene, and o-xylene were detected.

VOCs were below their residential RSLs.

Arsenic, barium, cadmium, chromium, lead, and mercury were detected in soil at the Property. Arsenic (8.56 mg/kg at Borings 353-356 (Sample ID 20071109 616) was above its residential (0.68 mg/kg) and industrial RSL (3 mg/kg) but was detected below its current literature-based background concentration (20 mg/kg) recognized by the Division of Remediation.

See the Results of Comprehensive Soil Sampling, Dixie Homes Public Housing, TN1-5 and TN1-9, HES Project No. 1539.T52 Memphis, Tennessee, prepared by Hess Environmental Services, Inc., dated January 7, 2008. Excerpted figures and tables from the report are attached.

In December 2022, EnSafe performed a Phase II environmental site assessment at the Subject Property. Soil, groundwater, and soil gas samples were collected. Soil and groundwater samples were analyzed for VOCs, PAHs, RCRA 8 metals, and EPH. Soil gas was analyzed using EPA Method TO-15.

Ten (10) soil samples were collected from five (5) borings at the Property. Arsenic, barium, cadmium, chromium, lead, mercury, and silver were the metals detected. The detected concentrations in soil are presented in the excerpted Table 1. Arsenic [As] and chromium [Cr] concentrations in soil were above residential (0.68 mg/kg [As]; 0.3 mg/kg [Cr]) and/or industrial (3 mg/kg [As]; 6.3 mg/kg [Cr]) RSLs in all ten (10) soil samples. Arsenic was below the current Tennessee background concentration (20 mg/kg) recognized by the Division of Remediation in all soil samples. Chromium exceeded the Tennessee background concentration (20 mg/kg) recognized by the Division of Remediation in three (3) soil samples (20.2 mg/kg at SB02 (28 to 32 feet bgs); 26.3 mg/kg (24 to 28 feet bgs); and 23 mg/kg at SB04 (28 to 32 feet bgs); however, Tennessee background concentrations are based on a statistical study of naturally occurring metals concentrations sampled throughout the state of Tennessee and are established by concentrations within the 75 percent quartile. Detected concentrations of chromium in soil sampled at the Site are not statistically higher than Tennessee background concentrations.

Acetone, benzene, n-butylbenzene, ethylbenzene, isopropylbenzene, methyl ethyl ketone, toluene, 1,2,4-trimethylbenzene, m,p-xylene, o-xylene, and xylene (Total) were detected and were below their residential RSLs.

Acenaphthene, acenaphthylene, anthracene, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(g,h, i)perylene, benzo(k)fluoranthene, chrysene, dibenzo(a,h)anthracene, fluoranthene, fluorene, indeno(1,2,3-cd)pyrene, 2-methylnaphthalene, naphthalene, phenanthrene, and pyrene were detected in soil. Only benzo(a)pyrene (0.126 mg/kg) exceeded its residential U.S. EPA RSL of 0.11 mg/kg in soil sampled from 4 to 8 feet bgs at SB02.

Diesel range organics, oil range organics, and extractable petroleum hydrocarbons (total) were detected in soil but did not exceed the Tennessee Department of Environment and Conservation Division of Underground Storage Tank (DUST) initial screening level (ISL) of 500 mg/kg for extractable petroleum hydrocarbons.

The five (5) borings were completed as temporary monitoring wells, and groundwater was sampled. Barium, selenium, acetone, toluene, acenaphthene, 1-methylnaphthalene, naphthalene, diesel range organics, oil range organics, and extractable petroleum hydrocarbons (Total) were detected in the five (5) groundwater samples collected. The results of the laboratory analysis of the groundwater samples are found in excerpted Table 2. None of the detections exceeded their U.S. EPA maximum contaminant level or regional screening level for tap water.

Five (5) soil gas samples were collected and analyzed using TO-15 across the Property. The results of the laboratory analysis of the soil gas samples are found in excerpted Table 3. Acetone, benzene, bromodichloromethane, 1,3-butadiene, carbon tetrachloride, chloroform, chloromethane, cyclohexane, 1,4-dichlorobenzene, dichlorodifluoromethane, ethylbenzene, n-heptane, n-hexane, 2-hexanone, isopropanol, methyl ethyl ketone, methyl-tert-butyl ether, methylene chloride, naphthalene, tetrachloroethene, toluene, 1,1,2-trichlorotrifluoroethane, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, and xylene (total) were detected. Benzene (13.8 micrograms per cubic meter) exceeded its residential VISL of 12 micrograms per cubic meter, and naphthalene (26.8 micrograms per cubic meter) exceeded its residential (2.7 micrograms per cubic meter) and commercial (12 micrograms per kilogram) VISLs in soil gas at SG01. Elevated concentrations of VOCs in soil gas and the risk thresholds indicate that vapor mitigation should be considered for future development within the sample area of SG-01. SG01 is in the southeast corner of the Property and is not in the area of the building constructed during redevelopment activities. See the Phase II Environmental Site Assessment Report, prepared by EnSafe Inc. (December 30, 2021).

In March 2023, EnSafe performed soil sampling to ensure asbestos and lead did not remain on site. This report summarizes the laboratory results for soil samples collected for lead and asbestos analysis. Sample locations are shown in the excerpted Figure 1. The results of the laboratory analysis of the soil samples are found in excerpted Table 1. Lead

was below its residential RSL in all soil samples collected. Asbestos was not detected in all the soil samples. See Lead and Asbestos Sampling Report, Edgeview at Legends Park (Block A), 945 Peach Avenue, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846, prepared by EnSafe Inc. (March 27, 2023).

In March 2023, EnSafe performed soil gas sampling within the planned building footprint and analyzed the samples using EPA Method TO-15. Sample locations are shown on Figure 1. The results of the laboratory analysis of the soil gas samples are found in excerpted Table 1. The following contaminants were detected in soil gas and remain onsite: acetone, benzene, carbon disulfide, chloromethane, cyclohexane, dichlorodifluoromethane, ethanol, ethylbenzene, heptane, n-hexane, 2-hexanone, isopropanol, methyl ethyl ketone, methyl isobutyl ketone, methylene chloride, propene, tetrahydrofuran, toluene, trichlorofluoromethane, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, total xylenes, m&p-xylene, o-xylene, and 4-ethyltoluene. The laboratory results were evaluated using EPA's vapor intrusion screening level (VISL) .calculator. All locations were below 10X-6 for carcinogenic risk and were below a hazard quotient of 0.1; therefore, vapor mitigation was not required for the building based on conditions at the Property. See Soil-Gas Sampling Report, Edgeview at Legends Park (Block A), 945 Peach Avenue, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846 dated March 27, 2023.

In April 2023, EnSafe performed surface soil sampling to determine if VOCs, PAHs, and RCRA 8 metals remained in soil at the Site. Concentrations of chromium exceeded the background of 20 mg/kg at one location (SB28). PAH results were assessed as benzo(a)pyrene equivalency (BEQ), which was compared to the TDEC DOR residential soil screening value (1.15 mg/kg). The BEQ results were below the residential screening value for all soil samples, except SB25 from 0 to 1-foot bgs, and SB42 from 0 to 1-foot bgs and from 1 to 3 feet bgs. VOCs did not exceed their EPA regional screening levels. Detected concentrations in surface soil are shown in excerpted Table 1 and shown on excerpted Figure 2. For additional details, please review the report titled *Soil Sampling for Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons, and Metals, Edgeview at Legends Park, Legends Park, Block A, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846 dated May 15, 2023.*

Based on the analytical results, soil excavations were conducted at three areas:

- SB25: Removal of PAH-impacted soil and elevated soil gas at the identified impacted location SB25/SG01.
- SB28: Removal of chromium-impacted soil at identified location SB28.
- SB42: Removal of PAH-impacted soil at identified location SB42.

Soil samples were collected before the excavations were initiated to confirm the extent of the impacted soil. Detected concentrations in soil at the excavation boundary are summarized in excerpted Table 7 and shown in excerpted Figure 3. Onsite soil was reworked to fill the excavations. For additional details, please review the report titled *Soil Excavation Report, Edgeview at Legends Park, Legends Park, Block A, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846A dated October 17, 2025.*

Notes:
CAS No. = Chemical Abstracts Service number
ft = feet
NE = Not Established
RSL Residential Soil = US EPA Regional Screening level (RSL) HQ=0.1 for Residential Soil (November 2022)
RSL Industrial Soil = US EPA Regional Screening level (RSL) HQ=0.1 for Industrial Soil (November 2022)
TN EKG Value = Tennessee soil background value
J = Estimated value
U = Non-Detect
Bold = Detected Value
Shaded/Bold = exceeds screening value
a = exceeds RSL Industrial Soil
b = exceeds RSL Residential Soil
c = exceeds TN EKG Value
* = Tennessee Department Environment and Conservation Benzo(a)pyrene Equivalency (BEQ) Screening Level for residential land use provided via email on May 5, 2023.
Red exceeds BEQ for residential use of 1.15 mg/kg.

Relative Potency Factors for Carcinogenic Polycyclic Aromatic Hydrocarbons

Compound	RPF
Benzo(a)pyrene	1
Benz(a)anthracene	0.1
Benzo(b)fluoranthene	0.1
Benzo(k)fluoranthene	0.01
Chrysene	0.001
Dibenz(a,h)anthracene	1
Indeno(1,2,3-c,d)pyrene	0.1

The current arsenic background concentration in TN is 20 mg/kg (Tennessee Department of Environment and Conservation Division of Remediation (DoR) Arsenic Naturally Occurring Background Concentrations (TDEC DoR August 3, 2021).
The current residential RSL for lead is 200 mg/kg.

Willie F. Brooks Jr Shelby County Register of Deeds: Instrument# 25100713 Page 41 of 45

Notes:
CAS No. = Chemical Abstracts Service number
ft = feet
NE = Not Established
RSL Residential Soil = US EPA Regional Screening level (RSL) HQ=0.1 for Residential Soil (November 2022)
RSL Industrial Soil = US EPA Regional Screening level (RSL) HQ=0.1 for Industrial Soil (November 2022)
TN BKG Value = Tennessee soil background value
J = Estimated value
U = Non-Detect
Bold = Detected Value
Shaded/Bold = exceeds screening value
a = exceeds RSL Industrial Soil
b = exceeds RSL Residential Soil
c = exceeds TN BKG Value
* = Tennessee Department Environment and Conservation Benzo(a)pyrene Equivalency (BEQ) Screening Level for residential land use provided via email on May 5, 2023.
Red exceeds BEQ for residential use of 1.15 mg/kg.

Relative Potency Factors for Carcinogenic Polycyclic Aromatic Hydrocarbons

Compound	RPF
Benzo(a)pyrene	1
Benz(a)anthracene	0.1
Benzo(b)fluoranthene	0.1
Benzo(k)fluoranthene	0.01
Chrysene	0.001
Dibenz(a,h)anthracene	1
Indeno(1,2,3-c,d)pyrene	0.1

The current arsenic background concentration in TN is 20 mg/kg (Tennessee Department of Environment and Conservation Division of Remediation (DoR) Arsenic Naturally Occurring Background Concentration (TDEC DoR August 3, 2021).
The current residential RSL for lead is 200 mg/kg.

USER QUESTIONNAIRE AND PROPOSAL CHECKLIST
ASTM E1527-21 Phase I Environmental Site Assessment

Mark X	1. Applicability — Per ASTM E1527-21, if the reason for the Phase I ESA is not provided, EnSafe shall assume the purpose is to qualify for one of the landowner liability protections listed in a., b., or c. (below).
	Please identify from the lists below all applicable reasons for requesting this Phase I Environmental Site Assessment: ***Reasons applicable to the "All Appropriate Inquiries" Final Rule (40 Code of Federal Regulations Part 312):*** a. Person seeking to establish the innocent landowner defense to CERCLA liability b. Person seeking to establish bona fide prospective purchaser landowner liability protection to CERCLA liability c. Person seeking to establish the contiguous property owner landowner liability protection to CERCLA liability d. Person conducting site characterization and assessments with the use of a CERCLA grant (Brownfields) *If one of the above is applicable, please complete the "User Responsibilities" questions in Section 2.*
	Additional reasons for performing a Phase I Environmental Site Assessment: e. As part of due diligence prior to purchase f. Obtaining financing g. Selling a property h. Originating or renewing a lease i. Terminating a lease or vacating a property j. In anticipation of a property/business ownership transaction k. Establishing baseline conditions at a property l. Identifying potential business environmental risks associated with a property *A business environmental risk is defined by ASTM E1527-21 as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to required components within the scope of an ASTM Phase I ESA. Business environmental risks are commonly associated with ASTM "non-scope issues" listed in Section 4. If Box l. is selected in this section, please complete Section 4.*

Yes	No	2. User Responsibilities
		These are tasks under the "All Appropriate Inquiries" Final Rule at 40 Code of Federal Regulations Part 312 that must be performed by or on behalf of the party seeking to qualify for a landowner liability protection to CERCLA liability. EnSafe is required to request the intended "User" of the Phase I ESA provide the information from those tasks, as it may be material in identifying recognized environmental conditions. Although the User of the Phase I ESA is not required to provide that information to EnSafe, the User remains responsible for their completion. For any boxes that are checked "Yes" please provide the additional information that you would like EnSafe to consider as part of the Phase I ESA. If the User of the Phase I ESA is not seeking a landowner liability protection to CERCLA liability but has pertinent information, answering the following questions will assist EnSafe.
☑	☐	a. Are there any environmental cleanup liens or activity and land-use limitations in place or filed or recorded against the property under federal, tribal, state, or local law, based on review of recorded land titles and judicial lien records? *If you haven't obtained the information through transaction-related title insurance documents, title abstracts, etc., would you like EnSafe to obtain and review land title records and judicial records at an additional cost (determined based on the number of parcels)? If so, please contact us for a quote.*
☐	☑	b. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
☐	☑	c. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? In other words, what is the relationship of the purchase price to the fair market value of the property, if the property were not contaminated? If you conclude that there is a difference, is the lower purchase price related to contamination that is known or believed to be present at the property?

USER QUESTIONNAIRE AND PROPOSAL CHECKLIST
ASTM E1527-21 Phase I Environmental Site Assessment

☑ ☐	d. Are you aware of commonly known or reasonably ascertainable information about the property that would help EnSafe identify conditions indicative of releases or threatened releases? For example, (i.) The past uses of the property? (ii.) Specific chemicals are or have been used or stored at the property? (iii.) Spills or other chemical releases that have occurred at the property? (iv.) Environmental cleanups that have taken place at the property? (v.) Do you have other information relevant to the Phase I ESA?
☑ ☐	e. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?
Mark X	**3. Special Reporting Requirements (if applicable)**
	Specify whether you, your client, and/or lender have special requirements for the Phase I ESA?
☒	a. No additional requirements apply to this Phase I ESA.
☐	b. Additional requirements apply and have been attached or discussed.
Mark X	**4. ASTM Non-Scope Considerations**
	If you would like EnSafe to include any of the following issues as part of the Phase I ESA, please check the appropriate box, and an EnSafe representative will contact you, as necessary, to discuss further and determine whether modifications to the attached cost estimate will be necessary.
☐	a. Asbestos-Containing Materials
☐	b. Radon
☐	c. Lead-Based Paint
☐	d. Lead in Drinking Water
☐	e. Wetlands
☐	f. Regulatory Compliance — Environmental
☐	g. Regulatory Compliance — Health and Safety
☐	h. Indoor Air Quality
☐	i. Mold
☐	j. Substances not Defined as Hazardous Substances (aka emerging contaminants such as certain per- and polyfluoroalkyl substances [PFAS])[1]
☐	k. Vapor Intrusion
☐	l. Biological Agents
☐	m. Cultural and Historic Resources
☐	n. Ecological Resources
☐	o. Endangered Species
☐	p. Industrial Hygiene
☐	q. Other (please specify)

[1] Effective July 8, 2024, the United States Environmental Protection Agency designated two PFAS — PFOA [perfluorooctanoic acid] and PFOS [perfluorooctane sulfonic acid] — as hazardous substances under CERCLA; thus, they are included within the scope of an ASTM E1527-21 Phase I ESA. Other PFAS not defined as hazardous substances under CERCLA shall remain a Non-Scope Consideration.

USER QUESTIONNAIRE AND PROPOSAL CHECKLIST
ASTM E1527-21 Phase I Environmental Site Assessment

Yes	No	5. Additional Requirements
☐	☑	Is this Phase I ESA being conducted: a. To satisfy environmental policy requirements of the Small Business Administration (SBA), or is SBA otherwise involved in lender or development aspects of this property?
☐	☑	b. To document compliance with Housing and Urban Development standards at 24 Code of Federal Regulations 58.5(i)(2) or 50.3(i)?

6. Site Contact(s)

Please provide contact information for EnSafe to gain access to the property and identify a Key Site Manager *(someone who has good knowledge of the uses and physical characteristics of the property)*.

Name: Deborah Payne
Contact Info: dpayne@memphisha.org

7. Report Addressed

If the report must be addressed to someone other than the proposal recipient, please specify the following information for each person/company/entity to which the report must be addressed.

Name: Matthew Battin
Title: Developer
Company: Pennrose LLC
Address: 1301 N 31st St
City, State, Zip: Philadelphia, PA 19121
Phone: (484) 364-9850
Email: mbattin@pennrose.com

8. Report Distribution

Reports will be provided electronically, unless otherwise specified. Email reports to: mbattin@pennrose.com

If hard copies are requested, please provide name, company, and shipping address:

9. Property Location Description

Please provide any additional descriptions of the subject property, parcel number, and/or "as-is" map showing the property boundaries and developments below or in a separate attachment.

See survey provided.

10. Form Completed By

Check if same as #7 ☑ **Date:** 03/24/2026 **Signature:** Matthew Battin

HELPFUL DOCUMENTS

Please review the below list of documents and, to the best of your knowledge, indicate if any exist and, if so, whether copies can be provided prior to the site reconnaissance or made available for review during the site reconnaissance.

Document Type	Available	Not Available
1. Environmental site assessments	☑	☐
2. Environmental site investigations	☑	☐
3. Environmental compliance audits	☐	☑
4. Environmental permits (e.g., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits, air permits)	☑	☐
5. Registrations for underground and aboveground storage tanks	☐	☑
6. Safety data sheets	☐	☑
7. Community right-to-know plans (Tier 1, Tier 2, Toxic Release Inventory)	☐	☑
8. Safety plans	☐	☑
9. Spill prevention, control, and countermeasures plan	☐	☑
10. Storm water pollution prevention plan	☐	☑
11. Reports regarding hydrogeologic conditions at the subject property	☐	☑
12. Reports regarding any self-directed or other (e.g., voluntary) cleanup activities conducted at the subject property	☐	☑
13. Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the subject property or relating to environmental liens encumbering the subject property	☐	☑
14. Hazardous waste generator notices	☐	☑
15. Geotechnical studies	☐	☑
16. Risk Assessments	☐	☑
17. Recorded Activity and Land-Use Limitations or Environmental Liens	☐	☑
18. Pending, threatened, or past litigation, administrative proceedings, and notices from government entity regarding violation of environmental laws or liability relating to hazardous substances or petroleum products	☐	☑

Additional Information:

Property is subject to a Brownfield Voluntary Agreement with TDEC, which has previously been provided, along with related documents (i.e., former ESAs, Phase II studies, soil management plan, etc.).

INTERVIEW QUESTIONNAIRE

This interview questionnaire has been prepared to help us collect information about the subject property. Please review this form and complete as much as possible to the best of your ability. A list of documents that will help us assess the subject property are included as the last page.

1. Facility Name: Edgeview at Legends Park II

2. Physical Address: 981 Peach Avenue

3. City, County, State: Memphis, Shelby, Tennessee

4. Property Size (acres) 1.09 acres

5. Current property owner:

- **a.** Name/Affiliation: Memphis Housing Authority
- **b.** Phone/Email: (901) 544-1141
- **c.** Date of ownership: April 1, 1953

6. Current tenant/lessee/occupant:

- **a.** Name/Affiliation: Legends Park Senior, LLC
- **b.** Phone/Email:
- **c.** Date of ownership:

7. Previous property owner(s) and contact information: United States Home and Housing Finance Agency and Public Housing Administration

8. Previous tenant(s)/lessee(s) and contact information: Legends Park Senior, LLC

9. Who provides the following services to the subject property: N/A

- **a.** Building Heat:
  - **i.** Source/type(s) of fuel:
  - **ii.** Entity providing service:
- **b.** Building Cooling:
  - **i.** Source/type(s) of fuel:
  - **ii.** Entity providing service:
- **c.** Electricity (if different from above):
- **d.** Natural gas/propane (if different from above):
- **e.** Potable water:
- **f.** Sanitary sewer:

  If Septic system, please describe
- **g.** Other Services:

10. Have you observed or are you aware of any of the following activities or items at the subject property? If yes, provide details (examples listed). Depending on the details provided, EnSafe may follow up with additional questions.

Owner Questions			
Activity/Item	**Current (Y/N)**	**Former (Y/N)**	**Details (for example)**
Aboveground storage tanks	N	N	Contents, capacity/size, age, removal date
Underground storage tanks	N	N	Contents, capacity/size, age, removal date
Hazardous substances	N	N	Types (solvents, paint), uses, quantities
Petroleum products	N	N	Types (gasoline, oil), uses (fueling, vehicle maintenance), quantities
Batteries	N	N	Automotive/industrial
Pesticides, herbicides, seed treatment, fertilizer	N	N	Container type and size, storage location, mixing areas, rinsate disposal areas
Secondary containment	N	N	Uses (tank farms, drum storage), size
Drums, totes, intermediate bulk containers, super sacs	N	N	Uses, sizes, material (steel, polyethylene), quantities, storage location/methods (inside/covered, on bare ground)
Unauthorized dumping/disposal	N	N	Source, location, date of occurrence

INTERVIEW QUESTIONNAIRE

Owner Questions			
Activity/Item	**Current (Y/N)**	**Former (Y/N)**	**Details (for example)**
Unidentified substance containers	N	N	Location
Wells	N	N	Type (monitoring, irrigation, injection, potable water supply), depth, age, active/inactive
Drains	N	N	Type (trench, grated), discharge (sanitary sewer, storm sewer, ditch, subsurface)
Sumps, oil-water separator, clarifier	N	N	Size, materials received, source, disposal/cleanout method
Stained soil or pavement	N	N	Source
Distressed vegetation	N	N	From a source other than lack of water
Interior stains on walls or floors	N	N	Source
Pits, ponds, or lagoons	N	N	Origin (manmade, natural), use (waste disposal, recreational, none), size, fill methods
Solid waste	N	N	Fill material from an unknown source, buried debris, stockpiled debris, construction/demolition debris
Hazardous waste generation	N	N	EPA ID, waste codes/types, sources, accumulation/ storage methods
Wastewater	N	N	Source, disposal type/method

Person completing form (Name/Title/Company): Deborah Payne/Memphis Housing Authority

Contact information (Phone/e-mail): (901) 544-1827 / dpayne@memphisha.org

Relation to property (Owner, occupant, property manager, etc.) _____

Date - March 25, 2026

Additional Information:

Question #2

The address for the future development site has not been assigned and the address listed is the address for Edgeview Phase I.

Questions # 6 & 8:

Until the parcel is subdivided, Legends Park Senior LLC is listed as both the previous and current tenant of the parcel. Once subdivided, the current tenant will change to Legends Park Senior II, LLC.

Helpful Documents:

Ensafe has been provided with the most recent documents associated with the site.

STATE OF TENNESSEE

DEPARTMENT OF ENVIRONMENT AND CONSERVATION

DIVISION OF REMEDIATION

AMENDED AND RESTATED BROWNFIELD VOLUNTARY AGREEMENT

This Amended and Restated Brownfield Voluntary Agreement ("Agreement") addresses property located at 981 Peach Avenue, Memphis, Shelby County, Tennessee (the "Site"). The Site has been assigned site number 79-846S1 and will be referred to as the Peach Avenue/Block A East Site. This Agreement supersedes and replaces the Brownfield Voluntary Agreement dated October 3, 2023 ("Original BVA") as of the Effective Date.

I. INTRODUCTION

This Agreement is made and entered into as of the last date of execution shown herein below by and between the Tennessee Department of Environment and Conservation (hereinafter referred to as "TDEC" or the "Department") the Memphis Housing Authority ("MHA"), a body corporate and politic of the State of Tennessee, Legends Park Senior LLC, a limited liability company organized under and existing pursuant to the laws of the State of Tennessee, and Pennrose, LLC, a limited liability company organized under and existing pursuant to the laws of the State of Pennsylvania. (hereinafter collectively referred to as the "Voluntary Parties") for the purpose of addressing the Site (as defined herein), which has the real or perceived threat of the presence on the Site of hazardous substances, solid waste, or any other pollutant. The administrative record for the Site addressed in this Agreement is maintained by the Department's Division of Remediation.

David W. Salyers, P.E., is the duly appointed Commissioner of the Department. James S. Sanders, Director of the Department's Division of Remediation, has been delegated the authority to enter into this Agreement.

Pursuant to Tennessee Code Annotated § 68-212-224, the Commissioner is authorized to enter into an Agreement with a party who is willing and able to conduct an investigation and/or remediation of a hazardous substance site or Brownfield Project and who did not generate, transport or release the contamination that is to be addressed at the Site.

The Department and the Voluntary Parties agree to undertake all actions required by this Agreement. The purpose of this Agreement is to set forth a scope and schedule of activities at the above-referenced Site and respond to the actual, threatened, or perceived release of hazardous substances at the Site. In addition, this Agreement is intended to settle and resolve the potential liability of the Voluntary Parties for the real or perceived threat of the presence of hazardous substances, solid waste, or any other pollutant at the Site which might otherwise result.

II. REQUIREMENTS

A. SITE LOCATION AND HISTORY

The "Site" is located at 981 Peach Avenue, in Memphis, Shelby County, Tennessee. A legal description of the Site, an area map showing the location of the Site, and a survey map showing the Site are attached as collective Exhibit A, which is incorporated herein by reference. The Site has historically been included as part of a larger parcel of property (that has historically been referred to as Legends Park Block A and identified as 945 Peach Avenue) that was addressed in a Brownfield Voluntary Agreement for Site Number 79-846 - effective date September 9, 2009 (hereafter referred to as the 2009 BVA). The 2009 BVA addressed the presence of hydrocarbons and dry-cleaning solvents in soil gas and groundwater south (hydraulically upgradient) of the Site. The Site that is addressed in this Agreement is a portion of Legends Park Block A, consisting of approximately 3.820 acres.

The 2009 BVA required the recording of land use restrictions for the property, including the Site. The restrictions included the prohibition of water wells and use of groundwater on the property, the management of any discovered contaminated soils in accordance with a Tennessee Department of Environmental Conservation (TDEC)-approved soil management plan, and the installation of soil vapor mitigation systems for buildings constructed at the property if needed. The Notice of

Land Use Restrictions was recorded in the office of the Shelby County Register of Deeds on January 9, 2012 (Instrument No.12005040).

The Site has been developed since at least 1897 with single and multi- family residential buildings. The Site was part of the former Dixie Homes public housing development from 1937 until 2006 when the public housing development was cleared for the Legends Park redevelopment. A city directory for the year 1921 contains a reference to Minkie Jos, apparently a clothes cleaner and presser operation, as having been located at the Site. No additional information was provided in database records reviewed.

The surrounding area has been developed with residential, commercial, and light industrial properties since at least 1897, including another clothes cleaner and presser operation. Based on TDEC records reviewed, petroleum polyaromatic hydrocarbon impacted soils were used as geotechnical fill material on the west-adjoining property. To limit the risk of exposure to the petroleum polyaromatic hydrocarbons, the impacted soils were located beneath an orange "witness barrier" (i.e., safety fencing) and clean fill material on property adjoining the Site.

B. ELIGIBILITY

As required by Tennessee Code Annotated § 68-212-224(a)(4), as of the effective date of this Agreement, the Department has determined that the Site is not listed or been proposed for listing on the federal National Priorities List by the United States Environmental Protection Agency ("EPA").

The Site was accepted into the Brownfield Projects Voluntary Cleanup Oversight and Assistance Program on February 9, 2023. Pennrose, LLC and Legends Park Senior LLC were recognized by the Department as "successor parties" to the 2009 Brownfield Voluntary Agreement with regard to the Site. By entering into this Agreement, the Voluntary Parties each certify to the best of such Voluntary Party's knowledge that pursuant to Tennessee Code Annotated § 68-212-224(a)(1) the Voluntary Party did not generate, transport, or release the contamination that is to be addressed at the Site. As required by Tennessee Code Annotated § 68-212-224(a)(2), a summary description of all known existing environmental investigations, studies, reports, or documents concerning the

Site's environmental condition has been submitted to the Department by the Voluntary Party (a copy of the Summary is attached hereto as Exhibit B).

From the effective date of this Agreement, the requirements of this Agreement shall replace the requirements of the 2009 BVA with regard to the Site. However, nothing in this Agreement should be construed as affecting any obligation of MHA or any other party to the 2009 BVA with respect to the portion of Legends Park Block A not addressed in this Agreement.

C. FINANCIAL REQUIREMENTS

Tennessee Code Annotated § 68-212-224 requires consideration of a fee to enroll in the Voluntary Cleanup Oversight and Assistance Program. The Commissioner has set the following schedule of fees that may apply to all sites working in cooperation with the Department to recover the expense of oversight. These fees are in place of hourly time charges and normal travel costs during the first 150 hours of oversight for the project.

Program Entry	$ 3,000
Site Characterization	$ 2,500
Remediation	$ 3,000
Risk Assessment	$ 2,500
Beneficial Use Determination	$ 2,500
Vapor Intrusion Evaluation	$ 2,500
Voluntary Agreement/Consent Order	$ 4,000
Land Use Restrictions	$ 1,000
Institutional and Engineering Controls Compliance	$ 750

In addition to the fees identified previously, an annual longevity fee of $4,000 will be charged to the Voluntary Party on the anniversary of the date the site was accepted into the Voluntary Program until a letter requiring no further action has been issued or this Agreement has been terminated. The applicable Voluntary Party shall pay each bill referenced in this Section C within sixty (60) days of receipt by such Voluntary Party.

Applicable fees and financial requirements must be timely paid by the applicable Voluntary Party to remain in the Voluntary Cleanup Oversight and Assistance Program and to receive a letter of no further action under Section G of this Agreement. For the purpose of this Agreement, timely payment means the Department receiving payment from the Voluntary Party within 60 days of the first billing of a financial requirement or according to a payment plan agreed in writing between Voluntary Party and the Department.

Notwithstanding the foregoing, any and all cost recovery assessments arising from actions to comply with a recorded Notice of Land Use Restrictions imposed pursuant to and recorded on the Site under the terms of this Agreement, shall be due from and payable only from the particular Voluntary Party or Successor Party submitting the report to be reviewed and/or requesting the related oversight action by TDEC that gives rise to the associated fees.

D. IDENTIFICATION AND DOCUMENTATION OF MATTERS ADDRESSED

Real or perceived hazardous substances, solid wastes or other pollutants are determined to be present on this Site to an extent that may or may not have yet been fully characterized. Pursuant to Tennessee Code Annotated § 68-212-224(a)(2) the Voluntary Party has submitted to the Commissioner a summary description of all known existing environmental investigations, studies, reports or documents concerning the site's environmental condition. Based on the information submitted to the Department by or on behalf of the Voluntary Party, and the Department's own review of this information, the Parties hereto agree that the environmental conditions identified below and in the reports identified in the summary description appearing Exhibit B attached hereto, along with any final reports generated pursuant to this Agreement as reviewed and approved by the Department, are to be addressed under this Agreement (collectively referred to as the "*Matters Addressed in this Agreement*"):

Several environmental consultants have performed environmental assessment activities in association with the redevelopment of the former Dixie Homes site by and on behalf of the Memphis Housing Authority. Environmental assessment activities in that time frame also included environmental assessment activities at the Site. Environmental conditions identified during the

older environmental assessment activities and environmental assessment activities conducted by EnSafe in 2022 and 2023 are detailed below.

In October and November 2007, Hess Environmental Services conducted soil sampling across the Former Dixie Homes redevelopment site which included the Site. Soil samples were analyzed for asbestos, lead, polynuclear aromatic hydrocarbons (PAHs), Resource Conservation and Recovery Act (RCRA) 8 Metals, hexavalent chromium, and volatile organic compounds (VOCs). One (1) soil sample (Boring 340, Sample ID 584) on or near the western side of the Site had a detection of 1% Chrysotile asbestos. Asbestos was not detected in other samples collected at the Site. Lead was detected in all six composite soil samples at the Site but did not exceed its U.S. EPA residential regional screening level (RSL) of 200 milligrams per kilogram (mg/kg). Only one PAH, benzo(a)pyrene, exceeded its residential U.S. EPA regional screening level of 0.11 mg/kg in five (5) of six (6) composite soil samples collected for PAH analysis. Detected concentrations, Boring IDs, and Sample IDs are listed below.

Benzo(a)Pyrene Exceedances of Residential RSL

Detected Concentration (mg/kg)	Borings	Sample ID
0.163	333 to 336	20071009 579
0.627	337-340	20071009 585
0.187	341-344	20071009 594
0.257	345 to 348	20071010 602
0.219	357 to 360	20071109 621

Notes:
RSL Regional Screening Level
mg/kg milligrams per kilogram or parts per million
Residential RSL is 0.11 mg/kg
Industrial RSL is 2.1 mg/kg

Benzo(a)pyrene did not exceed the residential screening level of 0.11 mg/kg in the sample collected for SVOC analysis (Borings 353 to 356; Sample ID 20071109 615). Arsenic, barium, cadmium, chromium, lead, and mercury were detected in soil at the Site. Arsenic (8.56 mg/kg at

Borings 353-356 (Sample ID 20071109 616) was above its residential (0.68 mg/kg) and industrial RSL (3 mg/kg) but was detected below its literature-based background concentration of 20 milligrams per kilogram (mg/kg) recognized by the Division of Remediation. See the *Results of Comprehensive Soil Sampling, Dixie Homes Public Housing, TN1-5 and TN1-9, HES Project No. 1539.T52 Memphis, Tennessee* prepared by Hess Environmental Services, Inc. dated January 7, 2008.

In December 2022, EnSafe performed a Phase II environmental site assessment at the Site. Soil, groundwater, and soil gas samples were collected. Soil and groundwater samples were analyzed for VOCs, PAHs, RCRA 8 metals, and EPH. Soil gas was analyzed for EPA Method TO-15.

Ten (10) soil samples were collected from five (5) borings at the Site. Arsenic concentrations exceeded their residential and/or industrial Regional Screening Level (RSL) in all samples but did not exceed its literature-based background concentration of 20 milligrams per kilogram (mg/kg) recognized by the Division of Remediation. Chromium concentrations also exceeded its residential and/or industrial RSL in all soil samples detected, but exceeded its literature-based background concentration of 20 milligrams per kilogram (mg/kg) recognized by the Division of Remediation in three samples:

Location/Depth	**Concentration**
SB02 at 28 to 32 feet below ground surface (bgs)	20.2 mg/kg
SB03 at 24 to 28 feet bgs	26.3 mg/kg
SB04 at 28 to 32 feet bgs	23.0 mg/kg

Only benzo(a)pyrene (0.126 mg/kg), exceeded its residential U.S. EPA RSL of 0.11 mg/kg in soil sampled from 4 to 8 feet bgs at SB02.

Diesel range organics, oil range organics, and extractable petroleum hydrocarbons (total) were detected in soil but did not exceed the Tennessee Department of Environment and Conservation Division of Underground Storage Tank (DUST) initial screening level (ISL) of 500 mg/kg for extractable petroleum hydrocarbon.

The five (5) borings were completed as temporary monitoring wells and groundwater was sampled. None of the detections in groundwater exceeded their U.S. EPA maximum contaminant level or regional screening level for tap water.

Five (5) soil gas samples were collected and analyzed using TO-15 across the Site. Benzene (13.8 micrograms per cubic meter) exceeded its residential VISL of 12 micrograms per cubic meter and naphthalene (26.8 micrograms per cubic meter) exceeded its residential (2.7 micrograms per cubic meter) and commercial (12 micrograms per kilogram) VISLs in soil gas at SG01. Elevated concentrations of VOCs in soil gas and the risk thresholds indicate that vapor mitigation should be considered for future development within the sample area of SG-01. SG01 is in the southeast corner of the Site and is not in the area of the building constructed during redevelopment activities. See the *Phase II Environmental Site Assessment Report*, prepared by EnSafe Inc. (December 30, 2021).

In March 2023, EnSafe performed soil sampling to assess the presence of asbestos and lead at the Site. Lead was detected below its residential RSL in all soil samples collected. Asbestos was not detected in all the soil samples. See *Lead and Asbestos Sampling Report, Edgeview at Legends Park (Block A), 945 Peach Avenue, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846*, prepared by EnSafe Inc. (March 27, 2023).

In March 2023, EnSafe performed soil gas sampling within the planned building footprint and analyzed using EPA Method TO-15. The laboratory results were evaluated using EPA's vapor intrusion screening level (VISL) calculator. All locations were below 10X-6 for carcinogenic risk and were below a hazard quotient of 0.1; therefore, vapor mitigation was not required for the building based on conditions at the Site. See *Soil-Gas Sampling Report, Edgeview at Legends Park (Block A), 945 Peach Avenue, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846* dated March 27, 2023.

In April 2023, EnSafe performed soil sampling to determine if VOCs, PAHs, and RCRA 8 metals remained in surface soil at the Site. Concentrations of arsenic exceeded the background of 20 mg/kg at one sample location at SB28 from 0-to-1-foot bgs. Concentrations (49.1 mg/kg) of chromium also exceeded its background of 20 mg/kg at SB28 at 0-to-1 foot bgs. A soil removal

action completed in January of 2024, resulted in the excavation and offsite disposal of soil at sampling point SB28.

PAH results were assessed as benzo(a)pyrene equivalency (BEQ) which was compared to the Division of Remediation residential soil screening value (1.15 mg/kg). The BEQ results were below the residential screening value for all soil samples, except SB25 from 0 to 1-foot bgs and SB42 from 0 to 1-foot bgs and from 1 to 3 feet bgs. See *Soil Sampling for Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons, and Metals, Edgeview at Legends Park, Legends Park, Block A, Memphis, Tennessee 38105 TDEC DoR Site ID: 79-846* dated May 15, 2023. A soil removal action completed in January of 2024, resulted in the excavation and offsite disposal of soil at sampling points SB25 and SB42.

The Voluntary Parties are proposing to develop this Site as a senior living facility. The Memphis Housing Authority is (and will remain) the fee owner of the Site. It is also the co-developer of the senior living facility. Legends Park Senior LLC will be the long-term leaseholder of the Site. Pennrose, LLC is the co-developer of the senior living facility.

Pursuant to this Agreement, the Voluntary Parties are not being required to fully remediate the pre-existing environmental conditions noted above, but each is required to take certain actions specified in this Agreement to ensure that the identified environmental impacts and conditions do not pose a threat to human health or the environment during and after completion of the redevelopment.

The Voluntary Parties agree that criteria required in Tennessee Code Annotated § 68-212-206(d) shall be used in determining containment and cleanup actions, including monitoring and maintenance options to be followed under this Agreement.

E. AGREED LIABILITY RELIEF

As the current owner or operator, or upon becoming an owner or operator of the Site, each Voluntary Party may occupy the status of a "liable party" pursuant to the definition of that term contained in Tennessee Code Annotated § 68-212-202(4). The Commissioner is authorized by

Tennessee Code Annotated § 68-212-224 to determine an apportionment of liability pursuant to factors in Tennessee Code Annotated § 68-212-207 as well as other equitable factors in an Agreement. Further, Tennessee Code Annotated § 68-212-224(a)(5) provides that the Commissioner is authorized to limit the liability of a participant in a voluntary agreement or consent order entered into pursuant to Tennessee Code Annotated § 68-212-224. Such voluntary agreement or consent order may limit the liability of such participant to the obligations set forth therein and exempt the participant from any further liability under any statute administered by the Department for investigation, remediation, monitoring, and/or maintenance of contamination identified and addressed in the voluntary agreement or consent order. The Commissioner may extend this liability protection to successors in interest or in title to the participant, contractors conducting response actions at the Site, developers, future owners, tenants, and lenders, fiduciaries, or insurers (collectively "Successor Parties"). The Commissioner agrees that the implementation of the actions agreed upon in Section G will constitute satisfaction of the apportioned liability of the Voluntary Parties under all environmental statutes administered by the Department for the *"Matters Addressed in this Agreement"*.

The Voluntary Parties and any of the Successor Parties, however, remain potentially responsible for any release of hazardous substances or other pollutants that occurs at the Site after the effective date of this Agreement while it owns or operates the Site or for environmental conditions other than *Matters Addressed in this Agreement*.

In accordance with the above referenced authority, the Department agrees that other than with respect to the obligations set forth in this Agreement, including without limitation the implementation of the actions agreed upon in Section G to the extent applicable to each Voluntary Party and any Successor Party, the Voluntary Parties and any Successor Parties shall bear no liability to the State of Tennessee under any statute administered by the Department for investigation, remediation, monitoring, treatment, and/or maintenance of environmental conditions identified in and addressed in Section D of this Agreement; provided, however, that to the extent that any Voluntary Party or Successor Parties has or maintains an interest in the Site, or possesses and/or controls all or a portion of the Site, its liability protections herein are contingent upon its continued adherence and enforcement of any land use restrictions imposed pursuant to or as a result of this Agreement. Nothing in this Agreement shall be construed as limiting the liability

or potential liability of any Voluntary Party for environmental conditions occurring after the effective date of this Agreement or for environmental conditions not identified and addressed in this Agreement. This liability protection and all other benefits conferred by this Agreement are extended to all future "Successor Parties" conditioned upon performance of the obligations contained in this Agreement and compliance with the Land Use Restrictions (hereinafter defined); provided, that such liability protection to other persons does not apply to the extent that such liability arose prior to the effective date of this Agreement. For the avoidance of doubt, a breach of this Agreement by a successor-in-interest or a successor-in-title will not alter the liability protection provided to a predecessor-in-interest or in-title.

F. ADMINISTRATIVE SETTLEMENT; THIRD PARTY LIABILITY

Tennessee Code Annotated § 68-212-224(a)(6), subject to the notice requirements provided therein, provides that this Agreement also constitutes an administrative settlement for purposes of Section 113(f) of CERCLA, 42 U.S.C. § 9613(f), for inactive hazardous substance sites. The Voluntary Parties and Successor Parties (as hereinafter defined) have, as of the effective date of this Agreement, resolved their liability to the State of Tennessee for *Matters Addressed in this Agreement*.

The Voluntary Parties shall not be liable to third parties for contribution regarding *Matters Addressed in this Agreement*; provided that, the Voluntary Parties gave the third party actual or constructive notice of this Agreement, and the third party was given an actual or constructive opportunity to comment upon this Agreement. The Voluntary Parties have demonstrated to the Department that constructive notice was accomplished by publishing a summary of the Original BVA in the Commercial Appeal at least thirty (30) days prior to its effective date.

Nothing in this Agreement shall impair the rights of third parties with respect to tort liability claims for damage to person or property arising from the contamination addressed by this Agreement.

G. AGREED ACTIONS TO BE TAKEN

The Voluntary Parties agree to conduct the following activities in order to address remedial action(s) recommended, including any monitoring and/or maintenance associated with such activities. The Voluntary Parties shall conduct all activities required by this Agreement in accordance with all applicable work plans, as approved by TDEC, all applicable laws and regulations, and any appropriate guidance documents. The Department has determined that the actions in this Agreement constitute "reasonable steps" with respect to *Matters Addressed in This Agreement.*

The Voluntary Party agrees as specified below to conduct the following activities:

1. The Voluntary Parties shall record or cause to be recorded a Department-approved Notice of Land Use Restrictions ("NLUR") within thirty (30) days of a request from the Department, in writing, that the NLUR be recorded. Upon recording, a copy of the NLUR shall be mailed to all local governments having jurisdiction over any part of the subject property. Additionally, a copy of the recorded NLUR shall be provided to the Department. Any party receiving liability protection under this Agreement that seeks approval for restricted uses or seeks to cancel or make a restriction less stringent shall be responsible for any costs incurred by the Department in the review and oversight of work associated with the restriction modification.

2. Voluntary Parties agree to:

    - To implement a TDEC-approved soil management plan (as may be amended) during the redevelopment activities (including land disturbance activities) planned for the Site and to implement the health and safety plan submitted to the Department with the soil management plan. For the Site, the most recently approved soil management plan replaces any other soil management plan that may have been previously approved for the Site pursuant to the 2009 BVA.

- To prepare and implement a soil management plan to be approved by the Department for land disturbance activities occurring after the completion of development activities at the Site.
- Upon completion of the land disturbance work associated with the redevelopment of the Site, the Voluntary Parties agrees to submit to the Department a report on the land disturbance work, including any waste manifests evidencing offsite disposal, if any, of soils or other materials.
- Environmental assessment activities conducted by or on behalf of the Voluntary Parties have demonstrated that vapor intrusion mitigation is not required for the building to be constructed as part of the planned development. However, the Voluntary Parties are incorporating vapor intrusion mitigation into the building to be constructed as part of the planned redevelopment at the Site). A plan for the design of the vapor intrusion mitigation system was submitted to the Department on or about February 7, 2023. The Department approved that plan, with comments, by a letter dated August 6, 2023. The Voluntary Parties shall submit a report to the Department evidencing the installation of the vapor intrusion mitigation system, including the details of the installation, compliance with any manufacturer's specifications and photographs evidencing the installation work.
- Before constructing any additional building or the expansion of the existing building (the location of the existing building is depicted on the site map attached hereto as Exhibit C), an assessment of the risk of vapor intrusion shall be conducted pursuant to a plan approved by the Department. If a vapor mitigation system is determined by TDEC to be warranted based upon the data evaluation in order to safely allow occupancy of such additional buildings or an expansion to the planned building, such construction or expansion is prohibited until such structure(s) are equipped with an appropriate passive or active mitigation system as proposed by the Property owner and approved by TDEC. Such system, either passive or active, shall have associated with it an appropriate period of verification sampling and operation and maintenance performance and reporting, with specific requirements determined by TDEC.

Upon completion of all tasks set forth in this Agreement, the Department shall issue to the Voluntary Parties a letter stating the requirements of this Agreement have been fulfilled and no further action is required of the Voluntary Parties concerning contamination identified and addressed in this Agreement. Upon the request of a Voluntary Party from time to time, the Department shall issue an interim status letter identifying what specific obligations remain to achieve completion of the work under this Agreement. Issuance of a no further action letter shall not relieve the Voluntary Party receiving such letter of any responsibilities for operation and maintenance activities or continued adherence to and enforcement of land use restrictions, if any, pursuant to Tennessee Code Annotated § 68-212-225. The Department reserves the right to require any Voluntary Party to take additional action for contamination caused by such Voluntary Party occurring after the date of this Agreement or for environmental conditions other than *Matters Addressed in this Agreement*.

H. ADDITIONAL REQUIREMENTS

1. Any Voluntary Party may request a time extension for any deadline included in this Agreement prior to the deadline. The time extension may be granted through mutual consent for good cause shown.

2. Any Voluntary Party and Successor Parties agree not to disturb, move, or remove any areas of hazardous substances, solid waste, or other pollutant(s) that are subject to liability protection under this Agreement without written approval by the Department unless the activities are being conducted under the terms and conditions of this Agreement or necessitated by the normal day-to-day activities of any on-going business.

3. Pursuant to Tennessee Code Annotated § 68-212-222, whether or not permits are required for onsite cleanup activities related to *Matters Addressed in this Agreement*, such activities shall meet the standards that would apply if such permits were required.

4. The Department acknowledges that the Voluntary Parties may conduct additional

development activities at the Site in addition to preparing the Site for potential development for Successor Parties and that the Voluntary Parties enter into this Agreement in order to facilitate the potential development of the Site or Successor Parties' potential development of the Site. The Department further acknowledges that one or more Successor Parties may develop different portions of the Site. Accordingly, any Successor Party may assume the obligations and liability protections provided under this Agreement upon such Successor Party' acquisition of property interests in the Site. The Voluntary Party or any Successor Party that transfers its interest at the Site or no longer conducts operations at the Site shall be relieved of any further obligations under this Agreement.

I. SITE ACCESS

During the effective period of this Agreement, and until the Department's issuance of a No Further Action Letter upon the Voluntary Parties' completion of all activities under this Agreement, each Voluntary Party, and any Successor Party shall, to the extent it is in control of the Site, provide the Department and its representatives or designees access during normal business hours to the Site to the extent that such Voluntary Party has the power and authority to grant such access. Nothing herein shall limit or otherwise affect the Department's right of entry, pursuant to any applicable statute, regulation, or permit. The Department and its representative shall comply with all reasonable health and safety plans published by any Voluntary Party, Successor Party or their contractors and used by Site personnel for the purpose of protecting life and property.

J. SUBMISSION OF INFORMATION, REPORTS, OR STUDIES

The Department may deny submission or approval of any reports or studies performed by or on behalf of the Voluntary Parties and submitted under the terms of this Agreement that do not contain the following statement:

> "I certify under penalty of law, including but not limited to penalties for perjury, that this document and all attachments were prepared by me, or under my direction or supervision. The submitted information contained in this document and on any attachment is true, accurate and complete to the best of my knowledge, information, and belief. I am aware

that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for intentional violation. As specified in Tennessee Code Annotated § 39-16-702(a)(4), this declaration is made under penalty of perjury."

K. RESERVATION OF RIGHTS

1. This Agreement shall not be construed as waiving any right or authority available to the Commissioner to assess responsible parties other than any Voluntary Party or Successor Parties for liability for civil penalties or damages incurred by the State, including any natural resource damage claims which the Department or the State of Tennessee may have under Section 107 of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") or any other statute, rule, regulation, or common law.

2. Nothing in this Agreement shall be construed as limiting or waiving any right or authority available to the Commissioner to require a liable party to address contamination occurring after the effective date of this Agreement or for environmental conditions other than *Matters Addressed in this Agreement.*

3. Nothing in this Agreement shall be interpreted as limiting the Voluntary Parties' right to preserve the confidentiality of attorney work product or client-attorney communication. Tennessee Code Annotated § 68-212-202 et seq. contains no provisions for confidentiality or proprietary information. Therefore, records, reports, test results, or other information submitted to the Department under this Agreement shall be subject to public review. Any and all records, reports, test results or other information relating to a hazardous substance site or the possible hazardous substance at the Site submitted under this Agreement may be used by the Department for all purposes set forth in Tennessee Code Annotated § 68-212-201, et seq.

4. Any Voluntary Party or any of their Successor Parties may terminate this Agreement as it pertains to such terminating party at any time upon written notice to the Department during the time period that such party owns the Site and/or conducts operations at the Site. Upon such termination, the terminating party shall have no further obligations hereunder other than payment of outstanding oversight costs, if any, accrued to the date of notice of

termination and adherence to any notice of land use controls filed under Tennessee Code Annotated § 68-212-225; provided, that the terminating party and the Department shall have and retain all authority, rights, and defenses as if this Agreement had never existed between the terminating party and the Department.

5. [Reserved.]

6. In the event any Voluntary Party or Successor Party does not fulfill all the requirements established in this Agreement, the Commissioner may seek to enforce the Agreement through any legal remedy.

7. If any provision of this Agreement is held to be invalid or unenforceable by a court of competent jurisdiction, then the remaining provisions of this Agreement will remain in full force and effect.

8. Nothing in this Agreement shall be interpreted as limiting the liability for the improper management and/or disposal of contaminated material removed from the Site.

9. If any Voluntary Party or any Successor Party breaches this Agreement, and the Department, in its sole discretion, determines that the breach is curable, the Department shall provide the Voluntary Party or any designated Successor Party written notice of the breach and a period of at least 30 days for such Voluntary Party or Successor Party, or any third party with authority to act on behalf of or in the place of such Voluntary Party or Successor Party, to cure the breach. The Voluntary Party and any Successor Party agree that the Department is not required to provide notice and opportunity to cure for successive or repeated breaches, or if the Department determines, it its sole discretion, that a breach poses an imminent, substantial danger to the public health or safety or to the environment. The Department shall not be deemed to have waived and rights or remedies available at law or under this Agreement by providing the opportunity to cure any breach of this Agreement.

The individuals signing below on behalf of each Voluntary Party represents that they are duly authorized agents, capable of entering into a binding Agreement on behalf of the Voluntary

Party. By entering into this Agreement, these individuals certify that the Voluntary Party did not generate or did not cause to generate, transport, or release contamination that is to be addressed at this Site.

The Effective Date of this Agreement is the last date of execution shown below.

EXHIBIT A

TO AMENDED AND RESTATED **BROWNFIELD VOLUNTARY AGREEMENT**

LEGAL DESCRIPTION, AREA MAP AND SITE SURVEY

LEGAL DESCRIPITION

All that certain lot or parcel of land situate in the County of Shelby, State of Tennessee, and being more particularly described as follows:

SAID LAND BEING a part of Block "A" Plat Book 249, Page 31, Shelby County, Tennessee Records, and being more particularly described as follows:

A tract of land situated in Memphis, Shelby County, Tennessee being part of the Memphis Housing Authority property of record in Book 3094, Page 267 and being part of Block A of Legends Park Planned Development of record in Plat Book 240, Page 6 in the Shelby County Register's Office and being more particularly described as follows:

BEGINNING at a point in the proposed west line of Decatur Street (55' R.O.W.) being 5.08 feet southwardly from the extension of Peach Avenue (part of Interstate 40 – R.O.W. varies); thence South 09 degrees 07 minutes 34 seconds West along said west line a distance of 265.99 feet to a point; thence North 80 degrees 52 minutes 23 seconds West a distance of 337.96 feet to a point; thence South 09 degrees 13 minutes 58 seconds West a distance of 165.55 feet to a point in the north line of Delmar Avenue (60' R.O.W.); thence North 80 degrees 52 minutes 04 seconds West along said north line a distance of 39.08 feet to a point of curvature; thence northwestwardly along a curve to the right having a radius of 30.00 feet, a central angle of 90 degrees 06 minutes 03 seconds, a chord bearing of North 35 degrees 49 minutes 02 seconds West, a chord distance of 42.46 feet, a distance along its arc of 47.18 feet to a point of tangency in the east line of Red Sox Lane East (50' R.O.W).; thence North 09 degrees 13 minutes 59 seconds East along said east line a distance of 175.02 feet to a point of curvature; thence northwestwardly along said east line and along a curve to the left having a radius of 93.00 feet, a central angle of 90 degrees 06 minutes 16 seconds, a chord bearing of North 35 degrees 49 minutes 09 seconds West, a chord distance of 131.64 feet, a distance along its arc of 146.25 feet to a point of tangency; thence North 80 degrees 52 minutes 23 seconds West a distance of 142.56 feet to a point; thence North 05 degrees 08 minutes 58 seconds East a distance of 130.20 feet to a point in the south line of said Peach Avenue; thence North 89 degrees 34 minutes 15 seconds East along said south line a distance of 108.92 feet to a point of curvature; thence eastwardly along said south line and along a curve to the right having a radius of 1248.24 feet, a central angle of 15 degrees 06 minutes 49 seconds, a chord bearing of South 82 degrees 52 minutes 20 seconds East, a chord distance of 328.31 feet, a distance along its arc of 329.26 feet to a point of tangency; thence South 75 degrees 18 minutes 56 seconds East along said south line a distance of 212.01 feet to a point; thence South 33 degrees 03 minutes 27 seconds East a distance of 7.55 feet to the POINT OF BEGINNING and containing 166,421 square feet or 3.820 acres of land, more or less.

RECORD DESCRIPTION

Lot 1, Phase 6 - Block "A" Legends Park P.D. of record in Plat Book ___ Page ___ in the Shelby County Register's Office, to which plat reference is hereby made for a more particular description of said property.

ZONING DATA

Zoning information to be provided by Insurer.

PLAT REFERENCE NOTE

THE BUILDING SETBACK LINES, STORM WATER DETENTION AREAS, AND EASEMENTS SHOWN HEREON WERE DEDICATED BY PLAT OF RECORD IN PLAT BOOK ___, PAGE ___ IN THE SHELBY COUNTY REGISTER'S OFFICE UNLESS OTHERWISE SHOWN.

SCHEDULE B - PART II NOTES

13. Matters appearing on Plat of Book 249, Page 31 in the Shelby County Register's Office, Shelby County, Tennessee affect the subject property by eliminating the right-of-way for Legends Row and creating the right-of-way for Redsox Lane.

14. Matters appearing on Plat of Book 240, Page 6 in the Shelby County Register's Office, Shelby County, Tennessee affect the subject property. The minimum setback lines shown hereon were established by said plat.

15. Matters appearing on Plat of Book 250, Page 24 in the Shelby County Register's Office, Shelby County, Tennessee do not affect the subject property.

16. Matters appearing on Plat of Book 239, Page 35 in the Shelby County Register's Office, Shelby County, Tennessee do not affect the subject property.

17. Reciprocal Easement Agreement of record as Instrument No. 08115216 as amended by that certain First Amendment of record as Instrument No. 08148051, as affected by that certain Second Amendment of record as Instrument No. 10097967, as affected by that certain Third Amendment of record as Instrument No. 11111904, as affected that certain Fourth Amendment of record as Instrument No. 12143719 in the Shelby County Register's Office, Shelby County, Tennessee affects the subject property is not a plottable matter.

18. Declaration of Trust (Grant) Projects of record in Instrument Nos. BH8752, CJ7792, as re-recorded at CM9304 and CJ7793 as re-record in CM9305 in the Shelby County Register's Office, Shelby County, Tennessee effect the subject property and are not plottable matters.

19. Regulatory and Operating Agreement of record in Instrument No. 08115217 in the Shelby County Register's Office, Shelby County, Tennessee affects the subject property and is not a plottable matter.

20. Easement for street purposed from the United States of America to the City of Memphis of record in Book 1533, Page 510 in the Shelby County Register's Office, Shelby County, Tennessee affects the subject property in that it created a portion of the right-of-way od Delmar Avenue.

21. Uniform Gas and Water Easement of record in Book 3241, Page 325 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property and is not shown.

22. Easement Contract of record in Book 3623, Page 17 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property and is not shown.

23. Easement Contract of record in Book 6009, Page 173 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property and is not shown.

24. Lack of direct access to a controlled highway (Interstate 40). Peach Avenue is located in Interstate 40 right-of-way.

25. Partial Release from Declaration of Trust of record in Instrument No. 22107422 in the Shelby County Register's Office, Shelby County, Tennessee does not affect the subject property.

26. Notice of Land Use Restrictions of record in Instrument No. 12005040 in the Shelby County Register's Office, Shelby County, Tennessee affect the subject property. A Designated area of buried contaminated soil shown on Exhibit D was located and flagged by others and is located as shown on C.O.S. A.

MISCELANEOUS NOTES:

1. Survey prepared for Pennrose.
2. Bearings are relative to Tennessee State Plane Coordinates (NAD83).
3. Property is in the name of Memphis Housing Authority.
4. Property is vacant and there is no visible address.
5. This survey was prepared from the information provided in Commitment for Title Insurance by First American Title Insurance Company Commitment Number No. TNFA21-7820 with an effective date of December 28, 2022.
6. The subject property has access to a dedicated public right-of-way.
7. There is no visible evidence of cemeteries on the property.
8. There is no evidence of earth moving work or building construction within recent months.
9. There is no evidence of recent street or sidewalk construction. There are no proposed changes in street lines either completed or proposed by and available from the controlling jurisdiction.
10. There is no visible evidence of the site being used as a solid waste dump, sump or sanitary landfill.
11. At the time of the field survey there was no indication of wetlands delineated by the appropriate authorities. The surveyor did not perform an inspection for wetlands and makes no certification as to the existence or absence of wetlands on the site.
12. All utilities, drain lines and sewer lines are located from available records and field locations of above ground visible evidence only.
13. By map scaling and graphic plotting only the subject property is not located in a Special Flood Hazard Area (shaded) per Flood Insurance Rate Map No. 47157C0270 F with a revised date of September 28, 2007. Property is located in Zone X.
14. There may be underground or non-visible utilities, drain lines or sewer lines across this property that are not shown. The appropriate utility companies should be contacted for more specific locations and information on underground utilities.
15. Subsurface and environmental conditions were not examined or considered as part of this survey.
16. Governmental jurisdictional areas, if any, which might impact the use of the premises were not located. No liability is assumed by the undersigned for any loss resulting from the exercise of any government jurisdiction affecting the use of the premises.

SURVEYOR'S CERTIFICATE

To: First American Title Insurance Company

This is to certify that this map or plat and the survey on which it is based were made in accordance with the 2021 Minimum Standard Detail Requirements for ALTA/NSPS Land Title Surveys, jointly established and adopted by ALTA and NSPS, and includes Items 1, 2, 3, 4, 6(a)(b), 7(a)(b1)(c), 8, 9, 11(a), 13, 14, 16, 17, 18, and 19 of Table A thereof.

The field work was completed on February 19, 2021.

TO AMENDED AND RESTATED **BROWNFIELD** VOLUNTARY **AGREEMENT**

SUMMARY OF TECHNICAL REPORTS FOR THE SITE

The following summary is a listing of technical reports for environmental investigations and assessments for the Site that are in the possession of the Voluntary Parties. This summary is intended to fulfill the statutory disclosure requirements associated with the Brownfield agreement application process. All reports listed below are on file at the offices of the Tennessee Department of Environment and Conservation.

TO BROWNFIELD VOLUNTARY AGREEMENT

SUMMARY OF TECHNICAL REPORTS FOR THE SITE

The following summary is a listing of technical reports for environmental investigations and assessments for the Site that are in the possession of the Voluntary Party. This summary is intended to fulfill the statutory disclosure requirements associated with the brownfield voluntary agreement application process. All reports listed below are on file at the Tennessee Department of Environment and Conservation.

Document Title	Author — Date	Summary of Results
Comprehensive Soil Sampling, Dixie Homes Public Housing, TN1-5 and TN1-9,	Hess Environmental Services, January 7, 2008	Hess Environmental Services conducted soil sampling across the former Dixie Homes redevelopment project site which included the Site. One (1) soil sample (Boring 340, Sample ID 584) at or near the western side of the Site had a detection of 1% Chrysotile asbestos. Asbestos was not detected in other samples collected at the Site. Lead was detected in all six composite soil samples at the Site but did not exceed its U.S. EPA residential regional screening level (RSL) of 400 milligrams per kilogram (mg/kg). Only one (1) PAH, benzo(a)pyrene, exceeded its residential U.S. EPA regional screening level in five (5) of six (6) composite soil samples collected for PAH analysis. Benzo(a)pyrene did not exceed the residential screening level of 0.11 mg/kg in the sample collected for SVOC analysis (Borings 353 to 356; Sample ID 20071109 615). Arsenic, barium, cadmium, chromium, lead, and mercury were detected in soil at the Site. Arsenic was above its residential (0.68 mg/kg) and industrial RSL (3 mg/kg) but was detected below its literature-based background concentration (20 mg/kg).
Phase I Environmental Site Assessment	EnSafe Inc. December 30, 2021	The following recognized environmental condition and controlled recognized environmental condition was identified in connection with the Site: A Brownfield Voluntary Agreement (BVA) is in place for TDEC/DoR Site ID 79-846, which includes the Site and adjoining properties west and south of the Site. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and dry-cleaning solvents in soil gas. Additionally, numerous properties in the surrounding area have reported releases of hazardous substances and/or petroleum products. Given the BVA and number of properties in the area of the Site with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a recognized environmental condition for the Site. The Site is subject to a recorded Notice of Land Use Restrictions that 1) restricts the installation of water wells and use of groundwater at the Site, 2) in the event of the discovery of contaminants in soil at the Site, the soil must be managed in accordance with a TDEC-approved soil management plan, 3) requires PAH contaminated soils be managed in a manner specified, and 4) requires the installation of soil vapor mitigation

Document Title	Author — Date	Summary of Results
		systems on buildings constructed on properties in close proximity to the Site. The existence of the land use restrictions was identified as a controlled recognized environmental condition.
Phase II Environmental Site Assessment	EnSafe Inc. December 30, 2021	In a report dated December 30, 2021, EnSafe detailed the collection of soil, groundwater, and soil gas samples. Chromium concentrations exceeded its residential and/or industrial RSL in all soil samples detected, but only exceeded the TDEC DoR background concentration of 20 mg/kg in three samples at depths from 23 to 32 feet below ground surface. Benzo(a)pyrene exceeded its residential RSL in one location SB02 from 4 to 8 feet bgs. Five groundwater samples did not exceed MCLs or RSLs for tap water. Soil gas samples were collected five locations. Exceedances were noted SG01.
Phase I Environmental Site Assessment	EnSafe Inc. September 21, 2022	The following recognized environmental condition and controlled recognized environmental condition in connection with the Site: A Brownfield Voluntary Agreement (BVA) is in place for TDEC/DoR Site ID 79-846, which includes the Site and adjoining properties west and south of the Site. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and dry-cleaning solvents in soil gas. Additionally, numerous properties in the surrounding area have reported releases of hazardous substances and/or petroleum products. Given the BVA and number of properties in the area of the Site with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a recognized environmental condition for the Site. The Site is subject to a recorded Notice of Land Use Restrictions that 1) restricts the installation of water wells and use of groundwater at the Site, 2) in the event of the discovery of contaminants in soil at the Site, the soil must be managed in accordance with a TDEC-approved soil management plan, 3) requires PAH contaminated soils be managed in a manner specified, and 4) requires the installation of soil vapor mitigation systems on buildings constructed on properties in close proximity to the Site. The existence of the land use restrictions was identified as a controlled recognized environmental condition.
Soil Sampling for Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons, and Metals	EnSafe Inc. May 15, 2023	In April 2023, EnSafe performed soil sampling to determine if VOCs, PAHs, and RCRA 8 metals remained in surface soil at the Site. Concentrations of arsenic exceeded background (20 mg/kg) at one sample location, SB28, at 0 to 1-foot bgs. Concentrations (49.1 mg/kg) of chromium also exceeded its background of 20 mg/kg at SB28 at 0 to 1-foot bgs. PAH results were assessed using benzo(a)pyrene equivalency (BEQ) and compared to the TDEC DoR residential soil screening value (1.15 mg/kg). The BEQ results exceeded the residential screening value at SB25 from 0 to 1-foot bgs and SB42 from 0 to 1-foot bgs and from 1 to 3 feet bgs. SB25 was collocated with SG01 (the area of elevated soil gas).
Lead and Asbestos Sampling Report	EnSafe Inc. March 27, 2023	In March 2023, EnSafe performed soil sampling to assess the presence of asbestos and lead at the Site. Lead was detected below its residential RSL in all soil samples collected. Asbestos was not detected in all the soil samples.

Document Title	Author — Date	Summary of Results
Soil-Gas Sampling Report	EnSafe Inc. March 27, 2023	In March 2023, EnSafe performed soil gas sampling within the planned building footprint and analyzed using EPA Method TO-15. The laboratory results were evaluated using EPA's VISL calculator. All locations were below 10^{-6} for carcinogenic risk and were below a hazard quotient of 0.1; therefore, vapor mitigation is not required for the planned building based on conditions at the Site.
Phase I Environmental Site Assessment	EnSafe Inc. January 31, 2023	The following recognized environmental condition and controlled recognized environmental condition in connection with the Site: A Brownfield Voluntary Agreement (BVA) is in place for TDEC/DoR Site ID 79-846, which includes the Site and adjoining properties west and south of the Site. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and dry-cleaning solvents in soil gas. Additionally, numerous properties in the surrounding area have reported releases of hazardous substances and/or petroleum products. Given the BVA and number of properties in the area of the Site with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a recognized environmental condition for the Site. The Site is subject to a recorded Notice of Land Use Restrictions that 1) restricts the installation of water wells and use of groundwater at the Site, 2) in the event of the discovery of contaminants in soil at the Site, the soil must be managed in accordance with a TDEC-approved soil management plan, 3) requires PAH contaminated soils be managed in a manner specified, and 4) requires the installation of soil vapor mitigation systems on buildings constructed in close proximity to the Site. The existence of the land use restrictions was identified as a controlled recognized environmental condition.
Phase I Environmental Site Assessment	EnSafe Inc. June 16, 2023	The following recognized environmental condition and controlled recognized environmental condition in connection with the Site: A Brownfield Voluntary Agreement (BVA) is in place for TDEC/DoR Site ID 79-846, which includes the Site and adjoining properties west and south of the Site. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and dry-cleaning solvents in soil gas. Additionally, numerous properties in the surrounding area have reported releases of hazardous substances and/or petroleum products. Given the BVA and number of properties in the area of the Site with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a recognized environmental condition for the Site. The Site is subject to a recorded Notice of Land Use Restrictions that 1) restricts the installation of water wells and use of groundwater at the Site, 2) in the event of the discovery of contaminants in soil at the Site, the soil must be managed in accordance with a TDEC-approved soil management plan, 3) requires PAH contaminated soils be managed in a manner specified, and 4) requires the installation of soil vapor mitigation

Document Title	Author — Date	Summary of Results
		systems on buildings constructed in close proximity to the Site. The existence of the land use restrictions was identified as a controlled recognized environmental condition.
Soil Removal Report	EnSafe Inc. September 2025	In January 2024, EnSafe sampled soil to determine the extent of soil excavation to be performed at SB25, SB28, and SB42. The extents were determined and on January 29, 2024, the soil removal action was conducted. Soil was directly loaded into trucks and transported to the Waste Management Landfill in Robinsonville, Mississippi.
Vapor Mitigation As-Built Report	EnSafe Inc. September 2025	Based on the findings of the March 2023 vapor assessment in the building footprint, a vapor mitigation system was not required. However, the developer elected to install a passive venting system. The system consisted of horizontal piping surrounded by washed pea gravel. A 20-millimeter-thick sealed vapor barrier was installed on top of the gravel and horizontal trenches. The piping exited the concrete pipe and traveled upwards through the roofline of the building. The six vertical termination points were 3 feet above the roofline, positioned away from HVAC air intakes, and installed with a passive whirlybird wind turbine.

1.0 INTRODUCTION

EnSafe Inc. has been contracted by PennRose to complete the Soil Removal Report for the property at 981 Peach Avenue, Block A, Legends Park (Site) in Memphis, Tennessee (Site ID#: 79-846). The Memphis Housing Authority (MHA) is the current owner, but has leasedthe Site to Legends Park Senior LLC for construction of affordable senior housing.

The Site is under the Tennessee Department of Environment and Conservation (TDEC), Division of Remediation (DoR) Brownfield program (TDEC DOR #79-846A). The Proposed Development Site consists of 3.8 acres.

1.1 Site Description

The 3.8-acre Site was vacant grass-covered land with no structures. Based on a review of historical resources and a Phase I Environmental Site Assessment (ESA) performed by EnSafe (dated September 21, 2022), the Site has been developed since at least 1897 with single- and multi-family residences and was part of the Dixie Homes public housing development from 1937 until the area was cleared for redevelopment as the Legends Park Subdivision in 2006. A former clothes cleaner and potential dry cleaner was identified at the Site in the 1921 city directory, but no further information regarding operations at the cleaners was discovered. No impact from a drycleaning operation was detected during environmental assessment activities.

Original plans called for the excavation and placement of impacted soils beneath engineered barriers (e.g., building foundation). The original plans were modified to excavate impacted soils in selected locations and dispose of them in a manner required by law. A Soil Management Plan was submitted to TDEC DoR in December 2023, that specified the modified plan. The Soil Management Plan was approved by TDEC DoR on January 7, 2024. This report details the soil removal action and the disposal of the excavated soils consistent with the approved Soil Management Plan.

1.2 Investigation History

1.2.1 Phase II ESA

EnSafe completed a Phase II ESA at the Site in December 2021 to investigate potential soil, groundwater, and soil gas impacts associated with possible historical operations at the Site and surrounding area properties. Results are summarized below. Locations of exceedances for soil and soil gas are shown on Figure 1 in Attachment A.

Soil

Samples were collected from five soil borings at two depths for analysis of volatile organic compounds (VOCs), polyaromatic hydrocarbons (PAHs), Resource Conservation and Recovery Act (RCRA) 8 Metals, and Extractable Petroleum Hydrocarbons (EPH). Analytical results for the soil samples were compared to the November 2021 U.S. EPA Regional Screening Levels (RSLs) for both residential and industrial land use with a lifetime target cancer risk of 1E-6 and a target hazard quotient of 0.1, and the September 2006 TDEC Department of Underground Storage Tanks (DUST) Initial Screening Levels (ISLs). Metals were also compared to the TDEC Hazardous Trace Elements in Tennessee Soils Background Levels ([TNSBL], TDEC 2001). TNSBLs are based on a statistical study of naturally occurring metals concentrations sampled throughout the state of Tennessee and are established by concentrations within the 75 percent quartile. Soil analytical results are shown in Table 1 in Attachment B.

VOCs and EPH were not detected above screening levels in soil collected at the Site. A PAH (benzo(a)pyrene) exceeded its residential RSL in soil sampled from 4 to 8 feet below ground surface at the northeast corner of the Site (SB02). Arsenic and chromium concentrations in soil were above residential and/or industrial RSLs in all ten soil samples. Arsenic was below its TNSBL in all soil samples, and chromium exceeded its TNSBL in three soil samples. Though the detected concentration of chromium in soil exceeded its TNSBL, the results are likely within the upper 25 percent quartile and are not statistically higher than the TNSBL.

1.2.2 2023 Lead and Asbestos Soil Sampling

In March 2023, soil samples were collected for the presence of asbestos and/or lead by a Tennessee-licensed asbestos inspector in a grid pattern across the Site, as shown on Figure 2 in Attachment A. Twenty-four surface soil samples (0 to 1 foot below ground surface) were collected using hand auger techniques and wet methods. In the area where soil is being removed for construction (cut), twelve subsurface soil samples were also collected from the 1 to 3-foot interval using hand auger techniques. Soil samples were containerized, labeled, and preserved for submittal under chain-of-custody to two laboratories for analysis.

Samples for asbestos analysis were submitted to Crisp Analytical in Carrolton, Texas. Asbestos samples were analyzed using polarized light microscopy (PLM), Environmental Protection Agency (EPA) Method 600. Samples for lead analysis were submitted to Waypoint Analytical in Memphis, Tennessee for analysis using EPA Method 6010.

Analytical results are provided for both analyses in Table 2 in Attachment B. Asbestos was not detected in any of the soil samples collected. Only one soil sample (LEGSSB1103, 60.1 milligrams per kilogram) was slightly above the TNSBL for lead of 45 milligrams per kilogram. None of the samples exceeded the U.S. EPA residential Regional Screening Level for lead of 400 milligrams per kilogram. Based on the analytical results, no further action is required for lead and asbestos in site soil.

1.2.3 2023 Surface Soil Sampling

Additional soil samples were collected in April 2023. Samples were collected in a grid pattern as shown on Figure 2 in Attachment A. Twenty-four surface soil samples (0 to 1 foot below ground surface [bgs]) were collected using hand auger techniques. In the area where soil is being removed for construction (cut), eleven subsurface soil samples were also collected from 1 to 3 feet, 3 to 4 feet, 4 to 5 feet, and/or 8 to 9 feet intervals using hand auger techniques. Soil samples were containerized, labeled, and preserved for submittal under chain-of-custody to Waypoint Analytical in Memphis, Tennessee. Soil samples were analyzed for VOCs, PAHs, and RCRA 8 metals. All detected VOCs were reported below their respective residential and industrial RSLs in the samples collected.

Concentrations of arsenic exceed both residential and industrial RSLs in all of the collected soil samples, except sample location SB43 at 3 to 4 feet, which exceeded only the residential RSL. Arsenic concentrations at SB26 at 0-1 feet bgs, SB26 at 1-3 feet bgs, SB28 at 0-1 feet bgs, SB40 at 0-1 feet bgs, SB44 at 0-1 feet bgs, and SB46 at 0-1 feet bgs exceeded the industrial RSL but did exceed the TNSBL. Boring SB28 at 0-1 feet was the only location to exceed its TNBSL of 20 milligrams per kilogram (mg/kg). Barium concentrations at SB25 at 1-3 feet bgs, SB28 at 0-1 feet bgs, SB35 at 8-9 feet bgs, and SB44 at 0-1 feet bgs were the only locations to exceed the TNSBL of 144 mg/kg; however, all barium concentrations are below the residential and industrial RSLs. All cadmium concentrations are below the residential and industrial RSLs and TNSBL, except at SB28 at 0-1 feet bgs, which exceeded the residential RSL and TNSBL. Chromium concentrations exceeded the TNSBL of 20 mg/kg at SB28 at 0-1 feet bgs and SB44 at 0-1 feet bgs; however, all chromium concentrations are below the residential and industrial RSLs. Lead concentrations exceeded the TNSBL of 45 mg/kg at SB28 at 0-1 feet bgs, SB29 at 1-3 feet bgs, SB31 at 0-1 feet bgs, and SB41 at 0-1 feet bgs; however, all lead concentrations are below the residential and industrial RSLs. The concentration of mercury at SB28 at 0-1 feet bgs exceeded the TNSBL of 0.18 mg/kg; however, all mercury concentrations are below the residential and industrial RSLs. The elevated metals concentrations appear to be primarily in the surficial soils, with the highest concentrations detected in SB28 at 0-1 feet bgs as indicated on Figure 2 in Attachment A.

Benzo(a)anthracene exceeded the residential RSL in soil samples collected at SB25 at 0-1 feet bgs, SB42 at 0-1 feet bgs, and SB42 at 1-3 feet bgs. Concentrations of benzo(a)pyrene (BaP) exceeded both residential and industrial RSLs in the soil sample collected from SB25 at 0-1 feet bgs and only the residential RSL in the soil samples collected from SB27 at 0-1 feet bgs, SB28 at 0-1 feet bgs, SB30 at 0-1 feet bgs, SB31 at 0-1 feet bgs, SB34 at 0-1 feet bgs, SB35 at 0-1 feet bgs, SB36 at 0-1 feet bgs, SB36 at 3-4 feet bgs, SB37 0-1 feet bgs, SB38 0-1 feet bgs, SB38 at 1-3 feet bgs, SB40 at 0-1 feet bgs, SB41 0-1 feet bgs, SB42 at 0-1 feet bgs, SB42 at 1-3 feet bgs, and SB43 at 0-1 feet bgs. Benzo(a)fluoranthene concentrations exceeding the residential RSL were collected from soil samples at SB25 at 0-1 feet bgs and SB42 at 1-3 feet bgs. Dibenz(a,h)anthracene concentrations exceed the residential RSL of 0.11 mg/kg at SB25 at 0-1 feet bgs, SB42 at 0-1 feet bgs, and SB42 at 1-3 feet bgs. All indeno(1,2,3-cd)pyrene concentrations are below the residential and industrial RSLs, except at SB25 at 0-1 feet bgs, which exceeds the residential RSL. PAHs at the highest concentrations were detected in SB25 at 0-1 feet bgs.

Toxicity Equivalence Factors for BaP

Compound	TEF
Benzo(a)pyrene	1
Benzo(a)anthracene	0.1
Benzo(b)fluoranthene	0.1
Benzo(k)fluoranthene	0.01
Chrysene	0.001
Dibenz(a,h)anthracene	1
Indeno(1,2,3-cd)pyrene	0.1

Benzo(a)pyrene Data Evaluation

A comparison of the cumulative toxicity for the suite of detected PAHs was performed because not all PAHs have the same toxicity or ability to cause illness and adverse health effects. The most toxic chemicals in the group are BaP and dibenz(a,h)anthracene. Because they are the most toxic, these PAHs are the standard by which other PAHs are assessed. To provide an overall assessment of the potential risks from the entire class of PAHs, a U.S. EPA-accepted toxicity equivalency factor (TEF) calculation was employed. The concentrations of other PAHs measured in the environment are converted to a BaP equivalent concentration based on how toxic they are relative to these two compounds. This is accomplished by multiplying their reported concentrations by their respective TEF values (listed to the right). These converted TEF concentrations are then summed to determine the BaP equivalency (BEQ) concentration for each sample. The BEQ results can then be assessed by comparing the calculated value against the TDEC Division of Remediation-provided residential BEQ soil screening value. The calculated BEQ results are shown on Table 3 in Attachment B. The calculation of the residential BEQ screening level was provided by TDEC Division of Remediation via email on May 5, 2023. The BEQ results from the 35 soil samples across the Site were compared to the 1.15 mg/kg residential BEQ screening level. BEQ concentrations exceeded the 1.15 mg/kg screening level in three samples, SB25 from 0 to 1-foot bgs (3.605 mg/kg), SB42 from 0-1-foot bgs (1.681 mg/kg), and SB42 from 1 to 3 feet bgs (2.093 mg/kg). The two locations are shown on Figure 2 in Attachment A.

Groundwater

Five temporary groundwater wells were sampled during the Phase II ESA in December 2021 for analysis of VOCs, PAHs, RCRA 8 Metals, and EPH. Groundwater analytical results were compared to the U.S. EPA RSLs for tap water with a lifetime target cancer risk of 1E-6 and a target hazard quotient of 0.1, U.S. EPA Maximum Contaminant Levels (MCLs), and TDEC ISLs and are shown in Table 4. VOCs, PAHs, RCRA 8 Metals, and EPH were not detected above screening levels in groundwater collected at the Site.

Soil Gas

Five soil gas samples were collected and analyzed for VOCs in December 2021. The soil gas analytical results were evaluated using the U.S. EPA vapor intrusion screening level (VISLs) for residential and commercial target sub-slab and near-source soil gas concentrations with a target lifetime carcinogenic risk of 10E-6 and a target noncarcinogenic hazard quotient of 0.1 and are shown in Table 5 in Attachment B. Benzene and naphthalene were detected above residential and/or commercial VISLs in soil gas collected at the southeast corner of the Site (SG01).

Risk screening was performed using the U.S. EPA VISL Risk Calculator. Input parameters for the U.S. EPA VISL calculator included location-specific concentrations and default exposure assumptions for risk screening. TDEC generally requires response actions (which could include a sealed vapor barrier, mitigation system, monitoring, etc.) when risk is above 1E-05 and/or hazard is above 1.0. For the residential exposure scenario, carcinogenic risk ranged from 6.61E-07 to 1.20E-05, and hazard (non-carcinogenic risk) ranged from 0.00442 to 0.315. One soil gas location (SG01) exceeded the carcinogenic risk of 1E-05.

In February and March 2023, seven soil gas sampling points were advanced to 3-5 feet below the ground surface using a hammer drill in the proposed building footprint. Analytical results for the soil gas samples were compared to the November 2022 U.S. EPA Vapor Intrusion Screening Levels (VISL) for residential air. In accordance with TDEC guidance, detected chemicals were evaluated based on the cumulative target lifetime carcinogenic risk of 10E-6 and a target noncarcinogenic hazard quotient of 0.1. Laboratory detections for the soil gas samples are summarized in Table 6 in Attachment B. Twenty-three VOCs were detected in soil gas sampled from the seven locations at the Site, and no VOCs were reported above U.S. EPA residential VISLs.

Risk screening was performed using the U.S. EPA VISL Risk Calculator. Input parameters for the U.S. EPA VISL calculator included location-specific concentrations and default exposure assumptions for risk screening; VISL risk outputs are summarized in Table 6 in Attachment B. TDEC generally

requires response actions (which could include a vapor barrier, mitigation system, monitoring, etc.) when risk is above 1E-05 and/or the hazard quotient is above 1.0. For the residential exposure scenario, carcinogenic risk ranged from 2.49E-10 to 2.38E-07 and the hazard quotient ranged from 0.00963 to 0.0386.

2.0 SOIL REMOVAL ACTION

EnSafe performed oversight, extent sampling, and coordinated transport and disposal of three areas:

- **SB25:** Performed removal of PAH-impacted soil and elevated soil gas at the identified impacted location SB25/SG01.
- **SB28:** Performed removal of arsenic- and chromium-impacted soil at identified location SB28.
- **SB42:** Performed removal of PAH-impacted soil at identified location SB42.

Soil samples were collected before the excavations were initiated to confirm the extent of the impacted soil. The extent samples were collected on January 10, 2024, around locations SB25, SB28, and SB42 as shown on Figure 3 in Attachment A. The results are presented on Table 7 in Attachment B. Laboratory reports are provided in Attachment C. An exceedance of the BEQ level of 1.15 mg/kg was detected at one location, SB42 at 1.78 mg/kg. An additional extent sample (SB42C-03A) was collected on January 24, 2024, and the BEQ concentration (0.13 mg/kg) was below the approved 1.15 mg/kg threshold. Laboratory reports are provided in Attachment C. All samples were processed and shipped in accordance with standard quality assurance methods, including chain-of-custody procedures. Laboratory analysis was performed by Waypoint Analytical.

On January 29, 2024, EnSafe was onsite when impacted soils at SB25, SB28, and SB42 were removed from the three locations for offsite disposal. The soil was directly loaded into dump trucks for transport and disposal at the Waste Management Tunica County Landfill in Robinsonville, Mississippi. Manifests are shown in Attachment D. Onsite soil was reworked to fill the excavation.

Notes:
All results are milligrams per kilogram (mg/kg) or parts per million (ppm).
December 2021 analytical results were collected by EnSafe and are summarized in the *Phase II Environmental Site Assessment Report, Block A, Legends Park Subdivision, Memphis, Tennessee* , dated December 30, 2021.
U.S. EPA = United States Environmental Protection Agency
TDEC = Tennessee Department of Environment and Conservation
RCRA = Resource Conservation and Recovery Act
Res RSL = U.S. EPA Regional Screening Level for Residential Soil, hazard quotient = 0.1 (November 2021)
Ind RSL = U.S. EPA Regional Screening Level for Industrial Soil, hazard quotient = 0.1 (November 2021)
ISL = Tennessee Underground Storage Tank System Assessment Closure Initial Screening Levels for Residential Soil (September 2006)
TN BKG = Background Hazardous Trace Elements in Tennessee Soils, TDEC Report of Investigation No 49 (2001)
NE = Not Established
— = Not Detected
J = Estimated
a = exceeds Res RSL
b = exceeds Ind RSL
c = exceeds ISL
d = exceeds TN BKG

Notes:

CAS No. = Chemical Abstracts Service number

ft = feet

NE = Not Established

RSL Residential Soil = US EPA Regional Screening level (RSL) HQ=0.1 for Residential Soil (November 2022)

RSL Industrial Soil = US EPA Regional Screening level (RSL) HQ=0.1 for Industrial Soil (November 2022)

TN BKG Value = Tennessee soil background value

J = Estimated value

U = Non-Detect

Bold = Detected Value

Shaded/Bold = exceeds screening value

a = exceeds RSL Industrial Soil

b = exceeds RSL Residential Soil

c = exceeds TN BKG Value

* = Tennessee Department Environment and Conservation Benzo(a)pyrene Equivalency (BEQ) Screening Level for residential land use provided via email on May 5, 2023.

Red exceeds BEQ for residential use of 1.15 mg/kg.

Relative Potency Factors for Carcinogenic Polycyclic Aromatic Hydrocarbons

Compound	RPF
Benzo(a)pyrene	1
Benz(a)anthracene	0.1
Benzo(b)fluoranthene	0.1
Benzo(k)fluoranthene	0.01
Chrysene	0.001
Dibenz(a,h)anthracene	1
Indeno(1,2,3-c,d)pyrene	0.1

Lab Report Number: 24-010-0197
Client Project Description: Legends Park
198 N. Pauline-Memphis, TN
Project No. 0888836801

Dear Mr. Wesley Goodnight:
Waypoint Analytical, LLC. received sample(s) on 1/10/2024 for the analyses presented in the following report.

The above referenced project has been analyzed per your instructions. The analyses were performed in accordance with the applicable analytical method. Where the laboratory was not responsible for the sampling stage (refer to the chain of custody) results apply to the sample as received.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance.

The results are shown on the attached Report of Analysis(s). Results for solid matrices are reported on an as-received basis unless otherwise indicated. This report shall not be reproduced except in full and relates only to the samples included in this report.

Please do not hesitate to contact me or client services if you have any questions or need additional information.

Sincerely,

Rebekah Ross

Rebekah Ross
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis.

Client: Ensafe
Project: Legends Park
Lab Report Number: 24-010-0197
Date: 1/17/2024

CASE NARRATIVE

Volatile Organic Compounds - GC/MS Method 8260B
Analyte: 2-Chloroethyl vinyl ether
QC Batch No: L727593/L727461
This target analyte was flagged for recoveries outside QC limits in the associated LCS/LCSD. Data for this analyte is flagged "M" to indicate that results should be considered minimum concentration due to the potential for a low bias.

Semivolatile Organic Compounds - GC/MS (SIM) Method 8270D SIM
Sample 99315 (LEGSSB42C-03)
QC Batch No: L727510/L727270
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.

Ref: Analytical Testing
Lab Report Number: 24-024-0046
Client Project Description: Legends Park
198 N. Pauline-Memphis, TN
Project No. 0888836801

Dear Mr. Wesley Goodnight:
Waypoint Analytical, LLC. received sample(s) on 1/24/2024 for the analyses presented in the following report.

The above referenced project has been analyzed per your instructions. The analyses were performed in accordance with the applicable analytical method. Where the laboratory was not responsible for the sampling stage (refer to the chain of custody) results apply to the sample as received.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance.

The results are shown on the attached Report of Analysis(s). Results for solid matrices are reported on an as-received basis unless otherwise indicated. This report shall not be reproduced except in full and relates only to the samples included in this report.

Please do not hesitate to contact me or client services if you have any questions or need additional information.

Sincerely,

Rebekah Ross

Rebekah Ross
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis.

Re: *Phase I Environmental Site Assessment Report*
981 Peach Avenue, Block A of the Legends Park Subdivision — Memphis, Tennessee

Dear Mr. Thomas:

EnSafe Inc. is pleased to provide the enclosed *Phase I Environmental Site Assessment Report* for the above-referenced property. If you have any questions or require additional information, please contact me at 901-937-4268 or aharris@ensafe.com.

Respectfully submitted,

EnSafe Inc.

Environmental Professional Statement:
We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

EnSafe Inc. performed a Phase I Environmental Site Assessment (ESA) of the 981 Peach Avenue, Block A of the Legends Park Subdivision property in Memphis, Shelby County, Tennessee (subject property), in general conformance with the ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation E1527-13 (ASTM 2013).[1] The goal of this Phase I ESA is to identify evidence of *recognized environmental conditions*.[2] The findings, conclusions, and environmental professional opinion in this Phase I ESA report result from interviews; historical, government, and physical setting resource review; and subject property reconnaissance on June 7, 2023.

This environmental assessment has identified the following associated with the subject property:

- The subject property is within Block A of Legends Park, a 4.77-acre undeveloped property bounded by Peach Avenue to the north, Ayers Street to the west, Decatur Street to the east, and Delmar to the south. Block A of Legends Park currently has an address of 0 Peach Avenue on the Shelby County Tax Assessor and Registrar's websites, however, the address historically associated with Block A of Legends Park has been 945 Peach Avenue. Block A of Legends Park is being subdivided and the resulting subject property will have an address of 981 Peach Avenue.

- The subject property consists of 3.82 acres of a larger 4.77-acre vacant parcel identified as Shelby County Parcel 051017 00018 and is located within the 30.91-acre Legends Park Subdivision (former Dixie Homes housing complex). The subject property is adjoined to the north by Peach Avenue then Interstate 40, to the east by Decatur Street then multi-family residences and a church, to the south by multi-family townhomes, Red Sox Lane, and apartment buildings, and to the west by a portion of the vacant larger parcel.

- The subject property has been developed since at least 1897 with single and multi-family residential buildings. The subject property was part of the former Dixie Homes public housing development from 1937 until 2006 when the area was cleared for redevelopment as the Legends Park Subdivision.

- The Brownfields Voluntary Agreement (BVA) Site 79-846 includes the subject property. The BVA executed on September 29, 2009, outlines environmental conditions identified hydraulically upgradient (south) of the site that include: 1) chlorinated solvent and petroleum impacts to groundwater; and 2) the presence of hydrocarbons and drycleaning solvents in soil gas. Because the site may not have been fully characterized, a Notification of Land Use Restrictions has been imposed. As it applies to the subject property, the land use restrictions 1) prohibit the installation of water wells and use of groundwater at the subject property, 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in accordance with a Tennessee Department of Environment and Conservation (TDEC) approved soil management plan, and 3) may require

[1] ASTM issued E1527-21 on November 1, 2021; however, EnSafe will continue to use E1527-13 until the United States Environmental Protection Agency approves the use of E1527-21 to comply with the requirements for all appropriate inquiries under 40 Code of Federal Regulations 312.

[2] ASTM defines a *recognized environmental condition* as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment."

the installation of soil vapor mitigation systems for buildings constructed at the subject property.

- Minkie Jos, former clothes cleaner and presser, has been identified at the subject property in environmental database records and in a city directory for the year 1921 (EnSafe 2020). No additional information was provided in the database records; however, it is important to note that historical documents identify a storefront at this address, which could potentially have been operated as a dry cleaner.

- On the south-adjoining property, one address (311 Decatur Street) was identified in the 1932 city directory as Gordon Cleaners and Dyers, former clothes cleaner and presser. No additional information was identified in historical records reviewed; however, it is important to note that historical fire insurance maps identify a storefront at this address in 1907, and Gordon Cleaners and Dyers may have operated as a dry cleaner.

- The west- and south-adjoining properties are located within BVA Site ID 79-846. Based on TDEC records reviewed, petroleum polyaromatic hydrocarbon-impacted soils were used as geotechnical fill material on the west-adjoining property. To prevent exposure to petroleum polyaromatic hydrocarbons, the soil is contained beneath an orange "witness barrier" (i.e., safety fencing) and clean fill material.

- The surrounding area has been developed with residential, commercial, and light industrial properties since at least 1897. Various commercial/light industrial businesses such as gasoline stations, automobile repair and service shops, and dry cleaners have operated on surrounding area properties that are expected to have used and possibly stored hazardous substances and/or petroleum products including solvents and other hazardous substances/petroleum products. A total of 13 sites, beyond the subject property and adjoining properties, were identified on environmental databases as having documented releases of hazardous substances and/or petroleum products.

- Five soil gas samples were collected throughout the subject property in 2021. Benzene and naphthalene were detected at concentrations exceeding the United States Environmental Protection Agency residential Vapor Intrusion Screening Levels in one sample location (SG01) on the southeast portion of the subject property. Additionally, concentrations in SG01 exceeded the acceptable residential carcinogenic risk quotient of 1E-05 with a result of 1.20E-05. Seven additional soil gas samples were collected within a proposed building footprint at the subject property, on the northwest and west central portion of the subject property. Each of the detected concentrations was below residential and commercial Vapor Intrusion Screening Levels and below both the carcinogenic risk and hazard quotients of 1E-5 and 0.1, respectively. Soil vapor concentrations in the currently proposed building footprint are below levels which would prompt TDEC to require response actions; however, the intended use of the subject property and location of additional future structures will dictate further recommendations for soil vapor mitigation.

- In May 2023, soil samples were collected from across the subject property at various intervals (e.g., 0 to 1-foot below ground surface and 1 to 3-feet below ground surface) and analyzed for volatile organic compounds, polycyclic aromatic hydrocarbons (PAHs), and metals. Analytical results identified concentrations of PAHs which exceeded residential RSLs. A subsequent risk assessment found benzo(a)pyrene equivalency to be below the residential

screening value for all soil samples, except SB25 from 0 to 1-foot bgs and SB42 from 0 to 1-foot bgs and from 1 to 3-feet bgs. Under the new subject property BVA, subject property soils will be managed in accordance with a Soil Management Plan, which states that the PAH-impacted soils identified in the May 2023 report will either be moved directly under areas of hardscape or transported offsite for disposal during construction activities.

This assessment has revealed evidence of the following *recognized environmental condition* and *controlled recognized environmental condition* in connection with the subject property.[3]

- BVA Site ID 79-846 includes the subject property and adjoining properties to the west and south. The BVA outlines environmental conditions identified upgradient of these properties that include: 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and drycleaning solvents in soil gas. Additionally, numerous sites in the subject property surrounding area have reported releases of hazardous substances and/or petroleum products. Given the BVA and number of sites in the subject property area with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination, which constitutes a *recognized environmental condition* for the subject property.

- As of this report's writing, a new BVA with land use restrictions was submitted to TDEC that 1) prohibits the installation of shallow wells and use of onsite groundwater at the subject property, except for environmental monitoring and remediation, 2) following construction of the proposed building, any additional building(s) or building expansion will require evaluation of potential vapor intrusion, and the evaluation will be shared with TDEC, and 3) if warranted, a vapor mitigation system will be proposed and approved by TDEC. Additionally, the subject property Soil Management Plan states that PAH-impacted soil identified at the subject property during construction activities will be placed beneath hardscape or transported offsite for disposal. Therefore, the current and proposed subject property land use restrictions are considered a *controlled recognized environmental condition*.

This Executive Summary is an excerpt of a detailed Phase I ESA report that includes elements necessary for proper interpretation, including any limitations, exceptions, and deletions to ASTM 2013 and established scope of work. As such, the Executive Summary should not be used independently of the Phase I ESA report and its supporting documentation.

[3] ASTM defines a *controlled recognized environmental condition* as "a *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

1.0 INTRODUCTION

EnSafe Inc. was retained by PennRose to conduct a Phase I Environmental Site Assessment (ESA) of 981 Peach Avenue in Block A of the Legends Park Subdivision property in Memphis, Shelby County, Tennessee (subject property), as shown on Figure 1 (Appendix A). The subject property is within Block A of Legends Park, a 4.77-acre vacant property bounded by Peach Avenue to the north, Ayers Street to the west, Decatur Street to the east, and Delmar to the south. Block A of Legends Park currently has an address of 0 Peach Avenue on the Shelby County Tax Assessor and Registrar's websites, however, the address historically associated with Block A of Legends Park has been 945 Peach Avenue. Block A of Legends Park is being subdivided and the resulting subject property will have an address of 981 Peach Avenue.

The subject property consists of 3.82 acres of a 4.77-acre vacant grass-covered parcel identified as Shelby County Parcel 051017 00018, which occupies approximately the east half of a city block bound by Peach Avenue, Decatur Street, Delmar Avenue, and Ayers Street. Additionally, the subject property is within the 30.91-acre Legends Park Subdivision (former Dixie Homes housing complex). Figure 2 (Appendix A) is a Site Vicinity Map, which shows the subject property and adjoining properties.

1.1 Purpose

The subject property was assessed with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and petroleum products. This assessment is intended to constitute all appropriate inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined in 42 United States Code Section 9601 (35)(B) and promulgated at 40 Code of Federal Regulations Part 312 (AAI Final Rule). As such, the assessment is intended to permit the designated *user* to satisfy one of the requirements to qualify for the innocent landowner, bona fide prospective purchaser, or contiguous property owner limitations on CERCLA liability (hereinafter, the Landowner Liability Protections).

The ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation E1527-13 (ASTM 2013) is the current industry standard used to define good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate.[1] The goal of a Phase I ESA is to identify

[1] ASTM issued E1527-21 on November 1, 2021, and the United States Environmental Protection Agency approved its use to comply with the requirements for AAI under 40 Code of Federal Regulations 312 on December 15, 2022; ASTM E1527-13 may be used until February 13, 2024.

evidence of *recognized environmental conditions,* defined by ASTM as, "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

In accordance with ASTM 2013, this Phase I ESA was also intended to identify the following:

- *Controlled recognized environmental condition:* "a *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by a regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

- *Historical recognized environmental condition:* "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

- *Business environmental risk:* "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."

- *De minimis condition:* "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." A condition found to be *de minimis* is not a *recognized environmental condition* or *controlled recognized environmental condition*.

1.2 Scope of Services

The Phase I ESA includes the following:

- Visual assessment of the subject property June 7, 2023, by Mr. Steffen Matthews, of EnSafe under the direction of Ms. Allison Harris of EnSafe; resumes are included in Appendix B.

- Interviews with personnel discussed in Section 3.1.

- Review of standard and additional federal, state, and local environmental records sources for the subject property and properties within ASTM 2013 approximate minimum search distances (AMSDs). Database search information is provided in Appendix C.

- Review of the historical resources (i.e., United States Geological Survey topographic maps, aerial photographs, fire insurance maps, and city directories), land-use records included in a prior Phase I ESA, and regulatory files available through the Tennessee Department of Environment and Conservation (TDEC), dated February 2022 (EnSafe, February 2022).

- Review of regulatory information available from the United States Environmental Protection Agency (U.S. EPA) Envirofacts website, regulatory reports response from the City of Memphis Division of Fire Services, and a summary of the TDEC records request. Select information is provided in Appendix E.

- Review of historical, physical setting, and regulatory information from Phase I ESAs of the subject property dated November 2020, February 2022, September 2022, and January 2023 (EnSafe, November 2020, February 2022, September 2022, and January 2023). The January 2023 Phase I ESA is included in Appendix F of this Phase I ESA; the September 2022 Phase I ESA is included in Appendix E of the January 2023 Phase I ESA.

- Review of physical setting information obtained from the Environmental Risk Information Services Physical Setting Report; provided in Appendix D.

- Review of the user questionnaire provided to the Client and completed by Mr. Brian Thomas, PennRose Developer, as documented in Appendix E of the January 2023 Phase I ESA, which is included in Appendix F of this Phase I ESA.

- Review of information from the websites listed in Section 6.

1.3 Client Information and User Responsibilities

EnSafe was retained by PennRose to conduct the Phase I ESA. According to ASTM, the *user* shall make known the reason for the Phase I ESA. In contracting EnSafe for the Phase I ESA, Mr. Thomas indicated the Phase I ESA was being conducted as part of due diligence before purchase, to obtain financing, and in anticipation of a property/business ownership transaction.

The AAI Final Rule and Section 6.0 of ASTM 2013 describe tasks to be performed by the *user* that are required to qualify for Landowner Liability Protections to CERCLA liability. The information that results from those tasks should be provided to the environmental professional to consider with respect to identifying *recognized environmental conditions*. Appendix F contains a questionnaire provided to the *user* outlining those tasks.

1.4 Non-scope Items

In the User Questionnaire for the prior January 2023 Phase I ESA (Appendix F), Mr. Thomas initially requested EnSafe to address several environmental issues outside the scope of ASTM 2013, but EnSafe was subsequently instructed to not expand the Phase I ESA beyond ASTM 2013.

2.0 PHYSICAL SETTING

Table 1 summarizes information obtained from review of physical setting sources and other sources reviewed during the Phase I ESA listed in Section 1.2.

Table 1
Physical Setting Summary

Topography	
Elevation (feet above mean sea level)	255 to 270
Topography	The central portion of the subject property is higher in elevation than the property perimeter. Additionally, the central-east portion is higher than the central-west portion.
Evidence of landfilling (e.g., areas graded by non-natural causes or filled with fill of unknown origin, and mounds or depressions) or excavation	Soil from other areas within the Legends Park Subdivision was stockpiled and used as fill on the subject property, which is further discussed in Section 4.1.4. In addition, "abundant brick debris" was encountered at 4 to 6 feet below ground surface (bgs), and concrete was encountered at 6 feet bgs in boring SB02 advanced in the central-east portion of the subject property in 2021. Traces of brick, sand, and cinders were encountered at 10 feet bgs in boring SB03 in the central-north portion of the subject property (EnSafe 2021).
Adjoining — higher elevation	East-southeast
Adjoining — lower elevation	Southwest
Surface Water and Subject Property Drainage	
Subject property surface water features	None
Adjoining surface water features	None
Nearest water body	Quimby Bayou
Direction and approximate distance to nearest water body	Approximately 740 feet west
Storm water management	Storm water that does not infiltrate grass surfaces is expected to follow surface topography and flow toward curbside storm drains on adjoining streets.
Flood zone (summarized from Appendix D)	The subject property is not mapped within the 100- or 500-year flood zones.
Wetlands (summarized from Appendix D)	No wetlands are mapped on the subject property.
Geology	
Soil types (and estimated depths/thickness)	Five soil borings installed in 2021 to depths of 28 to 32 feet bgs encountered predominantly silty clay. Limited intervals of silty clay with gravel and sand or with pebbles and gravel were encountered in some of the borings. Alternating clay and silty clay were also encountered in a few borings at depths greater than 20 feet bgs (EnSafe 2021).
Bedrock (depth and type)	Not reported in sources reviewed for this assessment.

Table 1 **Physical Setting Summary**	
Hydrogeology	
Wells on subject property	Five temporary groundwater wells installed in 2021 were removed and abandoned by backfilling with bentonite chips after sampling (EnSafe 2021).
Approximate depth to groundwater (feet) at the subject property	Groundwater was observed at 12 to 25 feet bgs in 2021 (EnSafe 2021).
Reported direction of groundwater flow at the subject property	Not identified in sources reviewed for this assessment.
Relevant surrounding property wells	Two sentinel groundwater monitoring wells installed at 918 and 934 Poplar Avenue (within the Legends Park Subdivision) are approximately 0.20 and 0.25-mile southwest of the subject property.
Approximate depth to groundwater (feet)	12 to 25
Reported direction of groundwater flow	North to northwest

3.0 SUBJECT PROPERTY

Subject property information discussed below was obtained from interviews and sources identified in Section 1.2 and referenced in Section 6.

3.1 Interviews

Table 2 lists personnel interviewed, indicates their association with the subject property or this Phase I ESA, and summarizes topics discussed and information provided. Table 2 also lists local and state agencies from which EnSafe requested information and the results of those inquiries.

Table 2
Summary of Interviews

Name	Affiliation	Association with Subject Property	Time[(1)]	Information Provided/Section Discussed
Ms. Deborah Payne	Memphis Housing Authority	Key Site Manager	14	Ms. Payne provided information regarding current and historical subject property operations and development. Information provided is discussed in Sections 3 and 4. Ms. Payne also stated that operations at the subject property have not changed since the prior January 2023 Phase I Environmental Site Assessment.
Ms. Luretha Phillips	Memphis Housing Authority	Current Owner	26	Ms. Phillips provided information regarding current and historical subject property operations and development. Information provided is discussed in Sections 3 and 4.
Ms. Alison Campany	TDEC DOR	Local Official	20	Ms. Campany provided information regarding the subject property Brownfield Voluntary Agreement. Information provided is discussed in Section 3.6

Summary of Records Requests

Name	Agency	Result of Inquiry/Section Discussed
Ms. Erima Davis	TDEC — Division of Underground Storage Tanks	Provided records related to the surrounding area University of Tennessee Medical Center Emergency Generator Building site.
Ms. Patricia Alston	Memphis Division of Fire Prevention	No records were identified related to the subject property. No records related to adjoining or surrounding properties were identified.
Ms. Valencia Cambrice	TDEC DOR	Additional records beyond those obtained during the February 2022 Phase I ESA were not identified for the subject property or adjoining and surrounding properties.

Notes:
(1) Length of time or number of years the person has been affiliated or familiar with the subject property or surrounding area.
TDEC = Tennessee Department of Environment and Conservation
DOR = Division of Remediation

3.2 Prior Environmental Assessments

Prior environmental assessments that include the subject property have been conducted since 2003, including five Phase I ESAs, soil sampling summaries, and multiple Phase II ESA investigations. Reports summarized in this section are those evaluating the portion of the Legends Park Subdivision (former Dixie Homes) north of Delmar Avenue (i.e., portions of the Legends Park Subdivision site that include the subject property). Findings for the entire Legends Park Subdivision site are summarized in Section 3.6. A copy of the prior January 2023 Phase I ESA is included in Appendix F.

3.2.1 November 2020 — Phase I Environmental Site Assessment

A Phase I ESA for the approximate subject property boundary was performed in November 2020 (EnSafe 2020). The Phase I ESA identified that Legends Park Subdivision (including the subject property) lies within the Dixie Homes State Remediation Program (SRP) site 79-846 (discussed in Section 3.6); additionally, a Notice of Land Use Restriction was imposed on the Legends Park Subdivision as an institutional control to address groundwater contamination. The 2020 Phase I ESA identified the following *recognized environmental condition* and *controlled recognized environmental condition*:

- *"Given the BVA [Brownfields Voluntary Agreement] and number of sites in the subject property area with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a recognized environmental condition for the subject property."*

- *"The subject property is subject to Land Use Restrictions that 1) prohibit the installation of water wells and use of groundwater at the subject property, 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in accordance with a TDEC-approved soil management plan, and 3) may require the installation of soil vapor mitigation systems on buildings constructed at the subject property. Therefore, the land use restrictions are considered a controlled recognized environmental condition."*

3.2.2 December 2021 — Phase II Environmental Site Assessment

In December 2021, a Phase II ESA was conducted to evaluate the site for potential chemicals of concern associated with historical operations. Five soil borings (SB01-SB05) were advanced at the subject property portion of the Brownfields Voluntary Agreement (BVA) site (EnSafe 2021). Two soil samples were collected from each soil boring location, and each was converted into a temporary monitoring well to collect a groundwater sample. Additionally, soil gas samples were collected from five locations across the subject property.

Metals data identified arsenic and chromium concentrations in soil above residential and industrial U.S. EPA Regional Screening Levels (RSLs). Arsenic concentrations exceeded the Tennessee background level (10 milligrams per kilogram [mg/kg]; TDEC 2001) in a single soil sample from 16 to 20 feet below ground surface (bgs). Chromium concentrations exceeded the Tennessee background level (20 mg/kg; TDEC 2001) in soil samples from three separate soil borings from 24 to 32 feet bgs. The Phase II ESA report concluded the concentrations of arsenic and chromium were not statistically higher than the Tennessee background levels. Polyaromatic hydrocarbon (PAH) data identified benzo(a)pyrene concentrations in soil from 4 to 8 feet bgs in one soil boring above residential and industrial RSLs. All other detected concentrations in soil were below RSLs, including volatile organic compounds (VOCs) and extractable petroleum hydrocarbons.

Groundwater samples did not have detected concentrations of metals, VOCs, PAHs, or extractable petroleum hydrocarbons above their respective U.S. EPA maximum contaminant level or tapwater RSLs.

Five soil gas samples (SG01-SG05) were collected throughout the subject property. The VOC data identified benzene (13.8 micrograms per cubic meter [µg/m^3]) and naphthalene (26.8 µg/m^3) concentrations in one soil gas sample location (SG01) above the U.S. EPA residential Vapor Intrusion Screening Levels (VISLs) of 12 µg/m^3 for benzene and 2.75 µg/m^3 for naphthalene. Additionally, naphthalene exceeded the commercial VISL of 12 µg/m^3. Concentrations detected at SG01 also exceeded the maximum U.S. EPA VISL carcinogenic risk, a calculated and location-specific unitless quotient, of 1E-05 with a risk of 1.20E-05. The Phase II ESA report concluded vapor mitigation should be considered for future development within sample area SG01 (southeast corner of the subject property), and the future use of the subject property will dictate further recommendations for, but not limited to, a passive mitigation system or vapor barrier.

3.2.3 February 2022 — Phase I Environmental Site Assessment

A Phase I ESA conducted in February 2022 included ASTM 2013 non-scope items concerning National Environmental Policy Act environmental factors (EnSafe 2022). The Phase I ESA identified the same *recognized environmental condition* related to the BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the 2020 Phase I ESA. Additionally, the February 2022 Phase I ESA stated the ASTM 2013 non-scope issues related to compliance with the National Environmental Policy Act were assessed under National Housing Trust Fund guidance, and the project was found to comply with ASTM non-scope issues.

3.2.4 September 2022 — Phase I Environmental Site Assessment

In September 2022, an update to the February 2022 Phase I ESA was conducted. The update identified no new findings related to the subject property and the surrounding area properties. Therefore, the September 2022 Phase I ESA identified the same *recognized environmental condition* related to the BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the previous Phase I ESAs.

3.2.5 January 2023 — Phase I Environmental Site Assessment

In January 2023, an update to the September 2022 Phase I ESA was conducted. The update identified no new findings related to the subject property and the surrounding area properties. Therefore, the January 2023 Phase I ESA identified the same *recognized environmental condition* related to the BVA and surrounding area properties and the same *controlled recognized environmental condition* related to the Notice of Land Use Restriction detailed in the previous Phase I ESAs.

3.2.6 March 2023 —– Soil Gas Sampling Report

In March 2023, EnSafe performed soil gas sampling within the planned building footprint on the subject property. Seven soil gas samples (SG06-SG12) were collected in the northwest and west central portions of the subject property. A total of 23 VOCs were reported with detected concentrations within the seven samples. The laboratory analytical results were compared to U.S. EPA VISLs for residential air and risk screening was evaluated using U.S. EPA's VISL calculator. Each detected concentration was below its respective VISL and 1E-5 for carcinogenic risk and a hazard quotient of 0.1. EnSafe concluded that the calculated carcinogenic risk and hazard quotient were below levels that would prompt TDEC to require response actions (i.e., installing a vapor mitigation system).

3.2.7 March 2023 — Soil Sampling for Lead and Asbestos Report

In March 2023, EnSafe performed soil sampling to ensure asbestos and lead did not remain onsite. This report summarized the laboratory analytical results for 24 surface (0 to 1-foot bgs) and 12 subsurface (1 to 3 feet bgs) soil samples collected for lead and asbestos analysis. Lead concentrations were below the residential RSL in each soil sample collected. Asbestos was not detected in any of the soil samples. No further action was recommended for lead and asbestos in soil at the subject property.

3.2.8 May 2023 — Soil Sampling for Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons, and Metals

In April 2023, EnSafe performed soil sampling to determine if VOCs, PAHs, and RCRA metals remained in subject property soil in concentrations causing human health risks. This report summarized the laboratory analytical results for 22 surface soil samples (0 to 1-foot bgs) and 11 subsurface soil samples (1 to 3-feet, 3 to 4-feet, 4 to 5-feet, and/or 8 to 9-feet bgs) in the area where soil would be removed during construction activities. The collected soil samples (SB25 to SB46) were analyzed for VOCs, PAHs, and RCRA metal concentrations. VOCs were below the residential RSL in each soil sample collected.

Concentrations of arsenic exceeded residential RSLs at six sample locations, and concentrations of cadmium exceeded the residential RSL in one sample. Elevated metal concentrations were primarily identified in surficial soils.

Four PAHs were detected at concentrations exceeding residential RSLs in 14 sample locations and benzo(a)pyrene exceeded the industrial RSL in one sample location. A subsequent risk assessment was conducted with PAH concentrations converted to a benzo(a)pyrene equivalency (BEQ) which was compared to the TDEC DOR residential soil screening value (1.15 mg/kg). The BEQ results were below the residential screening value for all soil samples, except SB25 from 0 to 1-foot bgs and SB42 from 0 to 1-foot bgs and from 1 to 3-feet bgs.

EnSafe concluded that, since the site will be cut and fill (i.e., soil will be moved around the site to adjust site elevations), the soil sample locations with the highest concentrations can be moved to areas covered by hardscape or removed from the site.

3.3 Historical Development and Uses

The historical document review and interviews were conducted to identify evidence of *recognized environmental conditions* in connection with past uses of the subject property.

3.3.1 Historical Development

The earliest historical resource reviewed for this Phase I ESA is an 1897 fire insurance map, included with historical sources obtained for the February 2022 Phase I ESA, included in the January 2023 Phase I ESA in Appendix F, which shows the subject property developed with numerous residential buildings along the east, south, and west portions, with a small stream traversing the north portion. The subject property remains primarily residential, except for a few shops/storefronts along Decatur Street, on the 1907 fire insurance map. Additionally, the small stream is no longer depicted by 1907. The 1916 and 1927 topographic maps depict multiple small structures in the central portion of the subject property and along the east and west property boundaries. A 1937 aerial photograph shows what appear to be multi-family residential buildings constructed throughout the subject property, except on the extreme eastern portion. The 1951 and 1952 fire insurance maps indicate the Dixie Homes Apartments residential buildings were constructed between 1936 and 1937, and apartment buildings on the east portion of the subject property were constructed in 1950. The subject property remains relatively unchanged in subsequent aerial photographs reviewed through 2006, except for the construction of Interstate 40 and rerouting of Peach Avenue along the north subject property boundary between 1969 and 1973. By 2007, the buildings have been razed and the subject property appears to be a vacant, unpaved, grass-covered lot. The 2010 aerial photograph shows the subject property cleared of most vegetation in preparation for development and construction activities, with several excavators visible. Grading and construction activities appear to continue until early 2012. By the November 2012 aerial photograph, the subject property is completely covered with grass. No significant changes were noted on aerial photographs reviewed from 2012 to 2023.

City directories obtained as part of the February 2022 Phase I ESA (EnSafe, February 2022) were reviewed at 3- to 6-year intervals from 1932 through 2020. The subject property had multiple addresses associated with residential buildings between 1932 and 2005: 945 to 1001 Peach Avenue, 319 to 347 Decatur Street, and 980 Delmar Avenue. The 2020 Phase I ESA (EnSafe 2020) identified one subject property address, 335 Decatur Street, as Minkie Jos, a potential former dry cleaner, which is listed in the 1921 city directory.

3.3.2 Historical Uses and Operations

Based on historical sources reviewed, the subject property has been developed since at least 1897. Historical records indicate the subject property was residential in 1897 and remained primarily residential until 2006. According to Ms. Luretha Phillips with the Memphis Housing Authority (MHA), the former Dixie Homes, a public housing development, began construction in 1938; the former public housing development included the subject property parcel and multiple parcels to the south. According to Ms. Deborah Payne of the MHA, the MHA acquired title to the Dixie Homes site from the U.S. Housing and Home Finance Agency and Public Housing Administration in April 1951 and 1953. Based on information provided by MHA representatives, the housing development remained relatively unchanged until the buildings were demolished in 2006. Based on environmental records reviewed (discussed in Section 3.6), pre-construction activities, including various environmental assessments and investigations, were conducted for the Legends Park Subdivision (including the subject property) between 2003 and 2012. According to Ms. Phillips, building construction within the Legends Park Subdivision began in 2009. A 2010 aerial photograph appears to show the subject property being used to stage construction materials and equipment for offsite construction. The subject property has remained vacant since approximately 2012.

3.4 Current Uses

The subject property was visually assessed on June 7, 2023, by Mr. Matthews of EnSafe. The purpose of the site reconnaissance was to determine current uses and to identify evidence of *recognized environmental conditions* in connection with the subject property. Photographs taken during the site visit are in Appendix G. EnSafe personnel walked throughout the subject property unaccompanied. Adjoining and surrounding area properties were observed from the subject property boundaries and nearby roads and driveways.

The subject property comprises 3.82 acres of vacant grass land within the Legends Park Subdivision with a fence comprising the north, east, and southeast subject property perimeter. Ms. Payne stated the subject property had no current operations or uses. MHA representatives had no knowledge of groundwater wells, septic tanks/systems, underground storage tanks, aboveground storage tanks, and/or utility services associated with the subject property.

3.5 Interior and Exterior Observations

Table 3 lists environmental issues and identifies those present or applicable to the subject property, based on EnSafe's visual observations of the interior and exterior, interviews, review of environmental records sources, regulatory research, and other publicly available and reasonably ascertainable

information. Each environmental issue present or applicable is discussed in sections as noted in the table.

Table 3
Subject Property Observations

Current or Past Use	Present or Applicable	Comment/Report Section
Hazardous Substances and Petroleum Products	**No**	—
Storage Tanks	**No**	—
Odors (strong, pungent, or noxious)	**No**	—
Pools of Liquids	**No**	—
Drums (5 gallons and larger)	**No**	—
Unidentified Substance Containers	**No**	—
Polychlorinated Biphenyls (associated with electric or hydraulic equipment)	**No**	—
Fuel Source for Heating and Cooling Systems	**No**	—
Stains or Corrosion (on building walls, floor, and ceilings)	**No**	—
Floor Drains, Sumps, and Pits	**No**	—
Pits, Ponds, or Lagoons	**No**	—
Stained Soil or Pavement	**No**	—
Stressed Vegetation	**No**	—
Solid Waste	**Yes**	Windblown trash (e.g., food wrappers, drink containers) was observed along the north, east, and south perimeter of the subject property. Additionally, discarded automobile tires were observed along the northeast and east fence line.
Hazardous Waste	**No**	—
Wastewater	**No**	—
Wells	**No**	—
Septic Systems or Cesspools	**No**	—

3.6 Environmental Records Review

EnSafe obtained standard environmental record source information directly from a commercial service, TDEC, and U.S. EPA databases. The Legends Park Subdivision (former Dixie Homes), which includes the subject property, was identified on the TDEC Voluntary Cleanup, Oversight and Assistance Program (VOAP), Brownfield, and Institutional Control databases.

The subject property is part of the Legends Park Subdivision/former Dixie Homes TDEC VOAP site. According to Ms. Alison Campany with the TDEC Division of Remediation, the MHA has entered into multiple BVAs to address impacts to soil, soil gas, and groundwater on various lots within the Legends Park Subdivision that are planned for future residential development and use. Based on the regulatory information reviewed, TDEC Division of Remediation site ID 79-846 (hereinafter referred to as the BVA site) includes the subject property. The BVA executed on September 29, 2009, outlines

environmental conditions identified hydraulically upgradient of the site that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and drycleaning solvents in soil gas. Based on TDEC records reviewed, groundwater samples were collected from two sentinel wells (SW-1 and SW-2) on the southwest corner of the BVA site, not on the subject property, between October 2010 and July 2012 for analysis of VOCs. Chlorinated solvent detections exceeded the U.S. EPA drinking water maximum contaminant levels. TDEC records indicate VOC impacts to BVA site groundwater likely originated from historical uses associated with properties farther south.

Because the BVA site may not have been fully characterized, a Notification of Land Use Restrictions has been imposed. As it applies to the subject property, the land use restriction 1) prohibits the installation of water wells and use of groundwater at the subject property, 2) in the event of the discovery of contaminants in soil at the subject property, other than PAHs, the soil must be managed in accordance with a TDEC-approved soil management plan, and 3) may require the installation of soil vapor mitigation systems for buildings constructed at the subject property.

The west-adjoining property (discussed in Section 4.1.4) is listed on the environmental database report as Legends Park North/West (79846S1) which includes the subject property. The Legends Park North/West site is a part of the larger BVA site and received a Notice of Land Use Restriction and No Further Action letter specific to the site on February 17, 2012.

The 2020 Phase I ESA (EnSafe 2020) identified one subject property address, 335 Decatur Street, in the environmental database for the year 1921. The occupant was listed as Minkie Jos, former clothes cleaner and presser. No additional information was provided in the 2020 database report; however, it is important to note that historical documents identify a storefront at this address and Minkie Jos may have operated as a dry cleaner. No additional information for this potential prior dry cleaner was identified as part of this Phase I ESA.

A Soil Management Plan for the subject property by EnSafe, dated May 25, 2023, states that EnSafe will be onsite during construction operations which may expose soil and soil gas in areas of suspected contamination, and EnSafe will screen, segregate, and stockpile suspected impacted soils. Stockpiled soils will be sampled to determine whether the soils will require offsite disposal. Additionally, soils identified at SB28 and SB42 (described in Section 3.2.8) will be excavated and moved directly beneath areas of hardscape to prevent resident and/or worker contact after development. Soil from SB25 will be removed form the ground, loaded directly onto dump trucks, and transported to a disposal facility in Robinsonville, Mississippi. The Soil Management Plan states

that a new Notice of Land Use Restriction is anticipated to be placed on the property deed which includes the following: 1) the installation of shallow wells and use of onsite groundwater at the subject property is prohibited, except for environmental monitoring and remediation. 2) Following construction of the proposed building, any additional building(s) or building expansion will require evaluation of potential vapor intrusion, and the evaluation will be shared with TDEC. 3) If warranted, a vapor mitigation system will be proposed and approved by TDEC. After system installation, verification sampling and reporting will be conducted and submitted to TDEC.

As of this report's writing, an updated BVA for the subject property, separate from the larger Legends Park Subdivision/former Dixie Homes, has been submitted to TDEC DOR. A public notice was issued on June 15, 2023 (Appendix F).

4.0 AREA RECONNAISSANCE

The current and historical uses of adjoining and surrounding area properties described below are based upon visual observations during the site reconnaissance and information obtained from interviews, historical research, and regulatory research conducted for the subject property. A commercial environmental database company provided a database search report that made environmental records for surrounding area properties within the ASTM-defined AMSDs reasonably ascertainable. Sites listed in the environmental records search within the ASTM-defined search distances for the databases on which they appear are discussed in Sections 4.1 through 4.3.

4.1 Adjoining Properties

The subject property is adjoined to the north by Peach Avenue then Interstate 40, beyond which are vacant grass-covered parcels and the former Carnes Elementary School; to the east by Decatur Street, beyond which are multi-family residences and Columbus Baptist Church; to the south (from east to west) by a vacant grass lot, Legends Park Townhomes, Delmar Avenue beyond which are Legends Parks Townhomes, Red Sox Lane beyond which is the Legends Park courtyard, and Legends Park Apartments; and to the west by a vacant grass lot which is a portion of the larger parcel encompassing the subject property.

4.1.1 North

The subject property is adjoined to the north, beyond Peach Avenue and Interstate 40, by vacant grass-covered parcels and the former Carnes Elementary School. Based on historical records reviewed, the north-adjoining properties were primarily residential, including a school, as early as 1897 and remained relatively unchanged through the early 1900s. However, a creek or drainage labeled "Run" is shown in the 1897 fire insurance map running through the north-adjoining properties, where Peach Avenue and Interstate 40 are present day, but this stream does not appear in subsequent records. The 1937 aerial photograph shows residential structures associated with the former Dixie Homes in the current location of Peach Avenue and Interstate 40, and it also shows two large buildings and numerous smaller buildings farther north. The 1951 fire insurance map shows primarily residential buildings, a church, and school buildings (the Former Carnes Elementary School) on the north-adjoining properties. The fire insurance map indicates that the school buildings were constructed in 1920, 1939, and 1944. The north-adjoining properties appear relatively unchanged until construction of Interstate 40 and the rerouting of Peach Avenue between 1969 and 1973. Except for the former Carnes Elementary School and associated additions, the north-adjoining properties beyond Interstate 40 remain either residential or vacant grass-covered lots.

No environmental records were identified for the north-adjoining properties.

4.1.2 East

The subject property is adjoined to the east, beyond Decatur Street, by multi-family residences and Columbus Baptist Church. Based on historical records reviewed, the east-adjoining properties were residentially developed as early as 1897. A church is depicted on the 1907 fire insurance map. City directories list primarily residential addresses for the east-adjoining properties from at least 1932 until 2005 and Columbus Baptist Church from at least 1940 to 2011.

No environmental records were identified for the east-adjoining properties.

4.1.3 South

The subject property is adjoined to the south (east to west) by a vacant lot, Legends Park Townhomes, Delmar Avenue beyond which are Legends Parks Townhomes, Red Sox Lane beyond which is the Legends Park courtyard, and Legends Park Apartments. Based on historical records reviewed, the south-adjoining properties were primarily residential with some shops as early as 1897 and 1907. The 1927 topographic map shows numerous small structures on the south-adjoining property, and by 1937 the property is redeveloped with residential structures associated with the former Dixie Homes. Based on historical records reviewed, the south-adjoining properties remained residential until 2007 when the area was cleared for redevelopment. The 2010 aerial photograph shows an apparent storm water detention basin on the western part of the south-adjoining property. The 2012 aerial photograph shows the detention basin has been filled, likely when the Legends Park Apartments were constructed. According to Ms. Phillips, the Legends Park Townhomes were constructed in 2009.

The south-adjoining properties are within the Legends Park Subdivision VOAP/BVA site as previously discussed in Section 3.6.

Gordon Cleaners and Dyers, at 311 Decatur Street, was identified as former clothes cleaner and presser in the 1932 historical city directory obtained for the February 2022 Phase I ESA. No additional information was identified in historical and database resources obtained for this Phase I ESA; however, it is important to note that historical fire insurance maps identify a storefront at this address in 1907 and Gordon Cleaners and Dyers may have operated as a dry cleaner.

4.1.4 West

The subject property is adjoined to the west by a vacant grass lot that is the west portion of Shelby County Parcel 051017 00018, which includes the subject property. Based on historical records reviewed, the west-adjoining property was previously developed with multi-family residential lots as

early as 1897. The 1907 fire insurance map and 1927 topographic map show numerous small structures on the west-adjoining property, with an area clear of structures on the west side. The 1937 aerial photograph shows at least two residential structures associated with the former Dixie Homes on the east half of the west-adjoining property, while the west half is clear of structures. The 1951 fire insurance map indicates the west portion of the west-adjoining property is a playground. Based on historical records reviewed, the west-adjoining property remained a residential and playground/park area until 2007 when the area was cleared for redevelopment. The 2010 aerial photograph shows an apparent storm water detention basin on the west-adjoining property. The 2012 aerial photograph shows the detention basin has been filled and the west-adjoining property is a vacant grass-covered area. According to Ms. Payne, the west-adjoining property was used to stockpile soil from the Legends Park Subdivision construction and environmental activities occurring from 2009 to 2012.

The west-adjoining property is located within the Legends Park North/West VOAP/BVA site within the larger Legends Park Subdivision BVA site, as previously discussed in Section 3.6. Based on TDEC records reviewed, PAH-impacted soils were used as geotechnical fill material on the west-adjoining property. In accordance with BVA Site ID 79-846, to prevent exposure to the PAH contaminants remaining in the soil, an orange plastic witness barrier was placed over impacted soil, then covered with at least 2 feet of clean fill material, between June and October 2010.

4.2 Surrounding Area Properties

The subject property is on the northeast side of downtown Memphis. The surrounding properties have been developed with residential, commercial, and light industrial properties since at least 1897. The environmental database search identified a total of 21 sites beyond the subject property and adjoining properties. Of these sites, 12 are within the ASTM-defined AMSDs; additionally, one relevant site within AMSDs was identified in prior 2022 and 2023 Phase I ESAs. The 13 sites identified within the ASTM-defined AMSDs are summarized in Table 4.

Table 4
Surrounding Area Environmental Database Listings

Facility Name	Address(es)	Approximate Distance from Subject Property	Database Listing(s)	Identification Number(s)	Status	Notes	Potential Impact to Subject Property
VA Medical Center	1030 Jefferson Avenue	0.25 miles south	SEMS and LUST	TNN000410932 and 790807	Closed	• One UST was removed in December 1998; TDEC DUST issued closure on November 5, 1999.	Not expected to have had contamination that migrated to subject property based on regulatory status and distance from subject property
Memphis Bulk Plant	432 North Dunlap Street	0.25 miles northwest	LUST, VCP, and SRP	790769 and 799001	Closed, Land Use Restrictions	• Petroleum constituents detected in soil, soil gas, and groundwater. • Groundwater flows generally to the west. • Site-specific standards issued • TDSWM approves closure with land-use restrictions in 2005.	Not expected to migrate to subject property based on groundwater flow direction
Church's Fried Chicken	925 Poplar Avenue	0.26 miles south-southwest	VCP and SRP	790379	Inactive, No Further Action	• Petroleum impacts in soil and shallow groundwater. • Groundwater flow reported to the north/northwest. • SRP issued no further action required for petroleum impacts on March 1, 2011.	Not expected to migrate to subject property based on site regulatory status and groundwater flow direction
Southern Steel	431 Dunlap Street	0.28 miles northwest	VCP, SRP, and Institutional Controls	791072	No Further Action	• Petroleum constituents detected in soil. VOCs and SVOCs detected in groundwater. • TDSWM approves closure with land-use restrictions in 2009.	Not expected to migrate to subject property based on site regulatory status and groundwater flow direction

Table 4
Surrounding Area Environmental Database Listings

Facility Name	Address(es)	Approximate Distance from Subject Property	Database Listing(s)	Identification Number(s)	Status	Notes	Potential Impact to Subject Property
Le Bonheur Hospital and Memphis Mental Health Institute	865 Poplar Avenue	0.28 miles southwest	VCP and SRP	792714 and 791119	Closed	• EPH detected in soil samples. • SRP issued no further action required status on November 17, 2009.	Not expected to migrate to subject property based on contamination being limited to soils and distance to subject property
Amoco/ Poplar Avenue BP	821 Poplar Avenue	0.38 miles southwest	LUST	791083	Case Closure	• Petroleum impacts identified in soil and groundwater. • TDEC DUST issued contaminated case closure on August 28, 2015.	Not expected to migrate to subject property based on distance from the subject property and groundwater flow direction
Memphis Steam Laundry and Cleaners	941 Jefferson Avenue	0.41 miles south-southwest	SRP	79855	Open	• Site identified along with Success Cleaners site as possible source of PCE detected in groundwater samples collected at the Legends Park Subdivision site. • TDEC files indicate a schedule for a sampling event was proposed for June 2009; however, records reviewed do not indicate if the event took place. At the time of this report's writing, the site is listed as "Pre-Remedial."	Potential for contamination to have migrated to the subject property based on possible drycleaning operations and groundwater flow direction

Table 4
Surrounding Area Environmental Database Listings

Facility Name	Address(es)	Approximate Distance from Subject Property	Database Listing(s)	Identification Number(s)	Status	Notes	Potential Impact to Subject Property
University of Tennessee Medical Center Emergency Generator Building	956 Court Avenue	0.41 miles south-southwest	LUST	792203	Completed Tank Closure	• One 2,000-gallon double-walled steel off road high sulfur diesel UST related to an emergency generator was closed in-place on November 30, 2022. • No leaks were detected.	No contamination detected during closure procedures.
Extra Express Market/ 7-Eleven/ Flash Oil Co #72	777 Poplar Avenue	0.42 miles southwest	LUST	791539	Contamination Case Closed	• Petroleum contaminated soil and groundwater identified. • TDEC DUST issued case closure on May 9, 2018.	Not expected to migrate to the subject property based on distance from the subject property, regulatory status, and groundwater flow direction
Auto-Chlor System	746 Poplar Avenue	0.43 miles southwest	LUST, VCP, and SRP	790057, 79774, and 791083	Closed	• Petroleum hydrocarbon, VOC, and PAH impacts in soil and groundwater • Radial groundwater flow to the northwest, northeast, and southwest. • TDEC DOR issued no further action with land-use restrictions on October 26, 2016.	Potential for contamination to have migrated to the subject property based on groundwater analysis and flow direction

Table 4
Surrounding Area Environmental Database Listings

Facility Name	Address(es)	Approximate Distance from Subject Property	Database Listing(s)	Identification Number(s)	Status	Notes	Potential Impact to Subject Property
Air Mask Service Unit	1010 Faxon Avenue	0.43 miles north	LUST	791109	Completed Tank Closure	• One 500-gallon diesel UST and associated piping drained and capped in September 1991. • Soil sample results collected from tank pit were non-detect or below applicable action levels for petroleum constituents. • TDEC DUST issued case closure on February 26, 1996.	Not expected to migrate to subject property based on contamination being limited to soils, distance to subject property, and groundwater flow direction
The Med Adam's Building	842 Jefferson Avenue	0.45 miles south-southwest	LUST	792354	Contamination Case Closed	• One 20,000-gallon UST and associated piping drained and capped in July 1999. • TDEC DUST issued case closure on February 6, 2002.	Not expected to have had contamination that migrated to the subject property based on regulatory status
Le Bonheur Faculty Office Building	824 Adams Avenue	0.46 miles southwest	LUST	799039	Completed Tank Closure	• One 1,000-gallon UST, one 500-gallon UST, and piping were removed in August 2015. • Soil samples collected from tank pit non-detect or below applicable action levels for petroleum constituents. • TDEC DUST issued case closure on August 18, 2015.	Not expected to have had contamination that migrated to the subject property based on soil analysis

Notes:

LUST = Leaking Underground Storage Tank
VCP = Voluntary Cleanup Program
SRP = State Remediation Program
TDSWM = Tennessee Division of Solid Waste Management
VOC = volatile organic compound
SVOCs = semi-volatile organic compounds
EPH = extractable petroleum hydrocarbon
SEMS = Superfund Enterprise Management System
UST = underground storage tank
TDEC = Tennessee Department of Environment and Conservation
DUST = Division of Underground Storage Tanks
PCE = tetrachloroethylene or perchloroethylene
PAH = polyaromatic hydrocarbon
DOR = Division of Remediation
DCERP = Drycleaner Environmental Response Program

4.3 Unmapped Sites

The environmental database search identified four sites with environmental records that it could not map due to poor or inadequate address information. Based on location information included in the database listings and online mapping tools, each site was determined to be beyond the ASTM-defined AMSDs for the databases on which it was listed and was not researched further.

5.0 RESULTS OF THE ENVIRONMENTAL PROFESSIONAL INQUIRY

EnSafe performed a Phase I ESA of the Block A of the Legends Park Subdivision property in Memphis, Shelby County, Tennessee, in general conformance with the scope and limitations of ASTM 2013. Any exceptions to, or deletions from, this practice mentioned throughout the report are discussed in Sections 5.3 and 5.4.

5.1 Summary of Findings and Conclusions

- The subject property is within Block A of Legends Park, a 4.77-acre vacant property bounded by Peach Avenue to the north, Ayers Street to the west, Decatur Street to the east, and Delmar to the south. Block A of Legends Park currently has an address of 0 Peach Avenue on the Shelby County Tax Assessor and Registrar's websites, however, the address historically associated with Block A of Legends Park has been 945 Peach Avenue. Block A of Legends Park is being subdivided and the resulting subject property will have an address of 981 Peach Avenue.

- The subject property consists of 3.82 acres of a larger 4.77-acre vacant parcel identified as Shelby County Parcel 051017 00018 and is located within the 30.91-acre Legends Park Subdivision (former Dixie Homes housing complex). The subject property is adjoined to the north by Peach Avenue then Interstate 40; to the east by Decatur Street then multi-family residences and a church; to the south by multi-family townhomes, Red Sox Lane, and apartment buildings; and to the west by a portion of the vacant larger parcel.

- The subject property has been developed since at least 1897 with single and multi-family residential buildings. The subject property was part of the former Dixie Homes public housing development from 1937, until 2006 when the area was cleared for redevelopment as the Legends Park Subdivision.

- The BVA Site 79-846 includes the subject property. The BVA executed on September 29, 2009, outlines environmental conditions identified hydraulically upgradient (south) of the site that include: 1) chlorinated solvent and petroleum impacts to groundwater; and 2) the presence of hydrocarbons and drycleaning solvents in soil gas. Because the site may not have been fully characterized, a Notification of Land Use Restrictions has been imposed. As it applies to the subject property, the land use restrictions 1) prohibit the installation of water wells and use of groundwater at the subject property, 2) in the event of the discovery of contaminants in soil at the subject property, the soil must be managed in

accordance with a TDEC-approved soil management plan, and 3) may require the installation of soil vapor mitigation systems for buildings constructed at the subject property.

- Minkie Jos, former clothes cleaner and presser, has been identified at the subject property in environmental database records and historical city directories for the year 1921. No additional information was provided in the database records; however, it is important to note that historical documents identify a storefront at this address, which could potentially have been operated as a dry cleaner.

- On the south-adjoining property, one address (311 Decatur Street) was identified in the 1932 city directory as Gordon Cleaners and Dyers, former clothes cleaner and presser. No additional information was identified in historical records reviewed; however, it is important to note that historical fire insurance maps identify a storefront at this address in 1907, and Gordon Cleaners and Dyers may have operated as a dry cleaner.

- The west and south-adjoining properties are located within BVA Site ID 79-846. Based on TDEC records reviewed, PAH-impacted soils were used as geotechnical fill material on the west-adjoining property. In accordance with BVA Site ID 79-846, to prevent exposure to the PAH contaminants, the soil is contained beneath an orange witness barrier and clean fill material.

- The surrounding area has been developed with residential, commercial, and light industrial properties since at least 1897. Various commercial/light industrial businesses such as gasoline stations, automobile repair and service shops, and dry cleaners have operated on surrounding area properties that are expected to have used and possibly stored regulated materials including solvents and other hazardous substances/petroleum products. A total of 13 sites, beyond the subject property and adjoining properties, were identified on environmental databases as having documented releases of hazardous substances and/or petroleum products. Two of these sites, Memphis Steam Laundry and Cleaners at 941 Jefferson Avenue and Auto-Chlor System at 746 Poplar Avenue have potential for contamination to have migrated to the subject property.

- Five soil gas samples were collected throughout the subject property in 2021. Benzene and naphthalene were detected at concentrations exceeding the United States Environmental Protection Agency residential Vapor Intrusion Screening Levels in one sample location (SG01) on the southeast portion of the subject property. Additionally, concentrations in SG01

exceeded the acceptable residential carcinogenic risk quotient of 1E-05 with a result of 1.20E 05. Seven additional soil gas samples were collected within a proposed building footprint at the subject property, on the northwest and west central portion of the subject property. Each of the detected concentrations was below residential and commercial Vapor Intrusion Screening Levels and below both the carcinogenic risk and hazard quotients of 1E-5 and 0.1, respectively. Soil vapor concentrations in the currently proposed building footprint are below levels which would prompt TDEC to require response actions; however, the intended use of the subject property and location of additional future structures will dictate further recommendations for soil vapor mitigation.

- In May 2023, soil samples were collected from across the subject property at various intervals (e.g., 0 to 1-foot below ground surface and 1 to 3-feet below ground surface) and analyzed for volatile organic compounds, polycyclic aromatic hydrocarbons (PAHs), and metals. Analytical results identified concentrations of PAHs which exceeded residential RSLs. A subsequent risk assessment found benzo(a)pyrene equivalency to be below the residential screening value for all soil samples, except SB25 from 0 to 1-foot bgs and SB42 from 0 to 1-foot bgs and from 1 to 3-feet bgs. Under the new subject property BVA, subject property soils will be managed in accordance with a Soil Management Plan, which states that the PAH-impacted soils identified in the May 2023 report will either be moved directly under areas of hardscape or transported offsite for disposal during construction activities.

5.2 Environmental Professional Opinion

This assessment has revealed evidence of the following *recognized environmental condition* and *controlled recognized environmental condition* in connection with the subject property:

- BVA Site ID 79-846 includes the subject property and adjoining properties west and south of the subject property. The BVA outlines environmental conditions identified upgradient of these properties that include 1) chlorinated solvent and petroleum impacts to groundwater, and 2) the presence of hydrocarbons and drycleaning solvents in soil gas. Additionally, numerous sites in the subject property surrounding area have reported releases of hazardous substances and/or petroleum products. Given the BVA and number of sites in the subject property area with reported releases of hazardous substances and/or petroleum products, the potential exists for regional groundwater contamination which constitutes a *recognized environmental condition* for the subject property.

- As of this report's writing, a new BVA with land use restrictions was submitted to TDEC that 1) prohibits the installation of shallow wells and use of onsite groundwater at the subject property, except for environmental monitoring and remediation, 2) following construction of the proposed building, any additional building(s) or building expansion will require evaluation of potential vapor intrusion, and the evaluation will be shared with TDEC, and 3) If warranted, a vapor mitigation system will be proposed and approved by TDEC. Additionally, the subject property Soil Management Plan states that PAH-impacted soil identified at the subject property during construction activities will be placed beneath hardscape or transported offsite for disposal. Therefore, the current and proposed subject property land use restrictions are considered a *controlled recognized environmental condition*.

5.3 Data Gaps

No data gaps were encountered that limited EnSafe's ability to identify *recognized environmental conditions*.

Limitations and exceptions detailed in Section 5.4 are also considered data gaps that may have limited EnSafe's ability to identify *recognized environmental conditions*, as indicated.

5.4 Limitations and Exceptions

EnSafe's Phase I ESA generally conforms to ASTM 2013. EnSafe did not sample soil, soil vapor, groundwater, or surface water as part of the Phase I ESA. Assessment of these items is based upon visual observations and sources as referenced throughout the report. This report should not be construed as verifying the present property owner or operator's compliance with federal, state, and local regulations or as a recommendation to purchase, sell, or develop the subject property.

5.5 Significant Assumptions

This report is a prudent, reasonable evaluation of the subject property's observed environmental condition. EnSafe assumes no responsibility for conditions or information not practically reviewable, or information not accurately disseminated by any party. The following significant assumptions were used to formulate the conclusions and opinions contained in this report:

- Groundwater flow generally follows topography.

- Environmental database information is accurate and complete.

- Conditions at the time of the site visit were representative of ordinary conditions at the subject property.

- The subject property boundaries depicted on figures and described herein are accurate.

5.6 User Reliance

The assessment was prepared under contract for the exclusive use of PennRose. Any other party's reliance on this report is at risk unless EnSafe grants authorization. In accordance with ASTM 2013, this Phase I ESA is presumed to be valid for 180 days from the date of completion. A Phase I ESA that meets or exceeds this practice and was completed more than 180 days previously may be used to the extent allowed in Sections 4.7 and 4.8 of ASTM 2013.

Appendix B
Resumes

ALLISON HARRIS, PG
Senior Geologist

EDUCATION

MS, Geology, University of Memphis, 1990

BS, Geology, University of Memphis, 1986

REGISTRATIONS

- Tennessee Professional Geologist, No. 788, 1989
- OSHA 1910.120 Health and Safety Training, including medical surveillance
- First aid and CPR certified, 2016

Allison has 29 years of experience in a variety of environmental programs. She is the project manager for multiple sites including Security Signals, an operable unit of the larger National Fireworks site where ammunitions were manufactured during World War II. As project manager, Allison is responsible for all aspects of this Superfund-Equivalent site. She ensures compliance with the Administrative Order of Consent, works closely with Tennessee Department of Environment and Conservation (TDEC) and USEPA regulators, and negotiates access agreements with offsite property owners. The investigation is being performed in phases to provide a cost-effective approach for the client and to allow for flexibility based on investigation findings. Known contamination includes trichloroethylene (TCE); suspected contaminants included perchlorate and various explosives.

RELEVANT EXPERIENCE

SUPERFUND PROJECTS

Remedial Investigation/Feasibility Study, US Navy, Naval Air Station (NAS) Pensacola, FL (2012-2018)

As task order manager, responsible for preparing remedial investigation/ feasibility study (RI/FS) planning documents, including Sampling and Analysis Plans, Investigation-Derived Waste (IDW) Plan, Proposed Plans, Records of Decision, and a Community Relations Plan. Other documents under her responsibility include RI Reports, Baseline Risk Assessments including Ecological Risk Assessments, FS Reports, and Site Characterization Reports. Managed CERCLA multi-phased field investigation of a 5.5-mile industrial waste sewer line including RCRA clean-closure of the industrial sewer line. The sewer line investigation included overseeing temporary and permanent monitoring well installations, monitoring well abandonment, and groundwater and soil sampling. This project was conducted under the Comprehensive Long-term Environmental Action Navy (CLEAN) program with USEPA Region 4 and the Florida Department of Environmental Protection (FDEP). Additional responsibilities included community relations activities, including establishing a Restoration Advisory Board and producing news releases, fact sheets, and public notices. Managed multidisciplinary staff from three separate offices. Specific project management responsibilities included proposal preparation, budgeting, cost tracking, invoicing, report generation, and client/agency liaison. Work performed at NAS Pensacola has earned one Secretary of the Navy and two Chief of Naval Operations awards.

TCE Remediation, Former ITT Telecomunications Facility, Milan, TN (2005-present)

Project manager for a chlorinated solvent investigation at an inactive facility contaminated by TCE and its breakdown products. The mile-long groundwater plume had previously impacted multiple private drinking water wells. Activities completed for the site include a focused FS evaluation of the source area and a human health risk assessment. National Contingency Plant (NCP) consistency activities included completing an Administrative Record, issuing a proposed plan and placing public notices announcing the comment period, and completing a Community Involvement Plan. The pilot test of an air sparge system determined that the system would be technically effective as well as cost-effective for the site, despite the great depth to groundwater.

Groundwater Monitoring, LaRoche Industries, Inc., Memphis, TN (2005)

Project manager for an RI/FS at a site investigated under the TDEC Division of Superfund. Responsibilities include assessment of an ongoing interim action for groundwater, finalizing the RI/FS report, monitoring well

installation, and groundwater sampling. This site was removed from the Tennessee Superfund list in November 2005.

Remedial Investigation/Feasibility Study, Tennessee Electroplating, Inc., Ripley, TN (2005)

Project manager for an RI/FS site being conducted under the TDEC Division of Superfund voluntary program. The investigation included delineating the extent of contamination in groundwater using direct-push technology (DPT), installing confirmation monitoring wells, and collecting soil and groundwater samples. Other responsibilities included completing a work plan, evaluating site data, negotiating with TDEC, and completing an RI/FS report.

BRAC Program Closure Investigation, US Navy, NAS Glenview, IL (2012)

As project geologist for Base Realignment and Closure (BRAC) program closure investigation at NAS Glenview, assisted with the field investigation and completed the RI/FS work plan. The investigation was conducted in accordance with CERCLA under the Navy's CLEAN program. Also coordinated the Administrative Record file for the facility. The Illinois Environmental Protection Agency and USEPA Region 5 were the regulatory agencies involved in the investigation.

Soil Sampling, Barmet Aluminum, Fort Hartford, KY (2016)

As project geologist responsible for logging and collecting soil samples from borings advanced across the site.

Subsurface Investigation, Amoco Corp. and Helena Chemical Co., Hayti, MO

This investigation included advancing soil borings for subsurface soil collection and installing onsite monitoring wells. Conducted onsite soil, sediment, and groundwater sampling and also assessed the presence of earthquake-induced liquefaction features at the facility. Compiled information and analytical data and wrote the report in accordance with a USEPA order. Met all USEPA deadlines for the report.

*Superfund Site, Waste Management Landfill, Anoka, MN (1991)

As project geologist for monitoring well and recovery well installations and soil boring investigation at this State of Minnesota Superfund site, responsible for overseeing subcontractors and completing boring logs of the complicated glacial lithology and bedrock.

CHLORINATED SOLVENT PROJECTS

Chlorinated Solvent Investigation, Bass, Berry & Sims, West Tennessee (2008)

Project geologist for a chlorinated solvent investigation at this active West Tennessee facility. This site has many challenges including complex geology, presence of dense non-aqueous-phase liquid (DNAPL), and an adjacent municipal wellfield. The investigation included advancing soil borings, installing onsite and offsite monitoring well nests, collecting soil and groundwater samples, performing a hydrogeologic investigation, and disposing of IDW.

Interim Remedial Action, former Spic N Span Cleaners, DCERP Project, Memphis, TN (2014-2016)

As project geologist, managed and conducted interim remedial action at this Dry Cleaner Environmental Response Program (DCERP) site in Memphis that is also under the Brownfields program. Work included injecting emulsified soybean oil into the source area. Duties included subcontractor selection and management and liaison with DCERP personnel. Project management included submitting reports to the state for approval and completing reimbursement applications for state payment.

PETROLEUM PROJECTS

Underground Storage Tank Investigation, Naval Support Activity Mid-South, Millington, TN (2007)

Task order manager for an underground storage tank (UST) investigation. The investigation included advancing soil borings using hollow-stem auger and DPT techniques, installing monitoring wells, collecting soil and groundwater samples, and disposing of IDW. Authored a contamination assessment report for the site. Because chlorinated solvent contamination was also detected onsite, the site was transferred to another program.

Underground Storage Tank Investigation, Carrier Corp., Brondby, Denmark (2009)
As project geologist for a UST investigation to assess whether the tank was leaking. Subsurface soil was assessed by advancing soil borings around the tank and collecting soil samples from beneath the tank. Authored a report detailing the investigation.

Underground Storage Tank Field Investigations, US Navy, NAS Kingsville, TX (2016)
Project geologist for field investigations at three UST sites. The field investigations included a soil-gas survey, soil boring advancement, monitoring well installation, and soil and groundwater sample collection. Authored a Contamination Assessment Report for one of the sites.

*Investigation and Remedial Activities, Clark Oil, Various Facilities in Minnesota (1991)
Project geologist for site investigations and remedial activities for various UST sites. Assimilated raw field data and analytical data into final technical reports. Also completed applications for the client to seek reimbursement from the state's Petrofund. Specific field experience included advancing soil borings, installing monitoring wells, organizing and supervising UST excavation and disposal, coordinating and monitoring contaminated soil excavation and disposal, onsite soil disposal, soil and groundwater sampling, and installation and maintenance of groundwater recovery and treatment systems.

*Tank Closures, Site Investigations, Remedial Activities, Ryder Truck Rental, Various Facilities in Florida, Wisconsin and Illinois (1991)
Project geologist for tank closures, site investigations, and remedial activities for six UST sites. Assimilated raw field data and analytical data into final technical reports in accordance with the applicable state regulations.

RCRA PROJECTS

Environmental Investigation, Lucite International, Olive Branch, MS (2010)
Project manager for investigation completed for two solid waste management units at this active facility. Authored work plan, coordinated field investigation, and authored final report. This facility received a no-further-action status upon completion of this investigation.

Naval Support Activity Mid-South, Millington, TN (2007)
Authored a RCRA Facility Investigation Report for a solid waste management unit at this facility undergoing realignment. This project was conducted under the Navy's CLEAN program with USEPA Region 4 and TDEC.

Comprehensive Sampling and Analysis Plan, Charleston Naval Shipyard RFI, Charleston, SC (2012-2013)
Assisted in preparing the RCRA Facility Assessment comprehensive work plan for the facility. Wrote the Comprehensive Sampling and Analysis Plan for field activities to be performed during the investigation.

BROWNFIELDS

Site Investigation, Memphis Biofuel, Memphis, TN (2007)
Project manager for site investigation at a former chemical manufacturing facility. The investigation included soil and groundwater sampling. Areas of identified toxaphene contamination in soil were managed under a Soil Management Plan. The Brownfields agreement was subsequently signed with the plan included as an appendix.

Site Investigation, Z-Mart, Memphis, TN (2002)
Project manager for site investigation at a former petroleum UST site. The site was proposed for inclusion in a Brownfields agreement for redevelopment with two other properties. After completing the investigation, managed the completion of the Removal Action Work Plan for the identified soil contamination. The plan was approved by TDEC with minimal comments. A Demolition Plan completed for the onsite building accounted for handling of contaminated materials that was encountered at the site. The building was demolished and a successful soil removal action was performed.

Site Investigation, Mid-South Nephrology Clinic, Memphis, TN (2005)
Project manager for site investigation at a former automatic transmission shop and cleaners site. The site was proposed for inclusion in a Brownfields agreement for redevelopment. The investigation included soil and groundwater sampling using DPT to delineate the nature and extent of contamination.

SOLID WASTE

*Soil Boring Investigation, Laidlaw Sanitary Landfill, Terra Haute, IN (1990)

Project geologist for monitoring well installations and soil boring investigation.

*Groundwater Monitoring System Work Plan, Northeast Otter Tail County Sanitary Landfill, New York Mills, MN (1991)

Hydrogeologist for the Northeast Otter Tail Sanitary Landfill. Authored a Groundwater Monitoring System Work Plan in accordance with Minnesota Solid Waste Rules.

SITE ASSESSMENTS

Property Transfer Investigation, Wright Medical, Arlington, TN (2006)

Project manager for a fast-track investigation of a potential property transfer. Investigation included DPT sampling of soil and groundwater, trenching of anomalies identified during a geophysical survey, and sediment sampling. Project was completed in approximately 30 days and met all of the client's objectives and data needs.

Hazardous Materials Sampling, Guardian Industries, Various Facilities in Tennessee, Missouri, and Arkansas (2008)

Project manager for a fast-track investigation of a potential stock transfer at various automotive manufacturing facilities. Investigation included DPT sampling of soil and groundwater and asbestos sampling. Project was completed in approximately 30 days and met all of the client's objectives and data needs.

Phase I Environmental Site Assessments, Great Smoky Mountain National Park, Gatlinburg, TN (2005)

Project manager for two Phase I Environmental Site Assessments (ESAs) as related to the Tapoca Land Exchange. One of the ESAs was completed for an area of approximately 110 acres, while the second area was approximately 281 acres. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, and client liaison.

Phase I Environmental Site Assessment, National Park Service, St. John U.S. Virgin Islands (2001)

Project manager for a Phase I ESA for a 375-acre tract. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, and client liaison.

Phase I and II ESAs, National Park Service, Stones River National Park, Murfreesboro, TN (2001)

Project manager for Phase I and II investigations completed on two tracts being considered for purchase by the National Park Service. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, and client liaison.

Phase I Environmental Site Assessments, Bass, Berry & Sims, Alabama and Indiana (2006)

Project manager for Phase I ESAs completed on property considered for purchase by the client. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, and client liaison.

Phase I Environmental Site Assessment, Bass, Berry & Sims, Arkansas (2006)

Project manager for Phase I ESA completed on property considered for purchase by the client. The property was a former tie manufacturing facility. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, and client liaison.

Phase I and II Site Investigations, Bass, Berry & Sims, La Mirada, CA (2005)

Project manager for Phase I and II investigations completed on property considered for purchase by the client. Phase II activities included monitoring well installation, soil sampling, and groundwater sampling. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, client liaison, and coordinating with other parties' consultants.

Phase I Environmental Site Assessments, Performance Food Group, Various Sites in Illinois, Mississippi, and Arkansas (2005)

Project manager for Phase I ESA completed on property considered for purchase by client. Responsibilities included proposal preparation, budgeting, cost-tracking, invoicing, report generation, and client liaison.

**indicates work for a previous employer*

STEFFEN MATTHEWS
ENVIRONMENTAL SCIENTIST/GEOLOGIST

EDUCATION
BA, Earth Science, The University of Memphis, 2020

AFFILIATIONS/ ORGANIZATIONS
American Society for Photogrammetry and Remote Sensing

Society of Exploration Geologists

Steffen is an experienced geologist specializing in seismic processing, ground penetrating radar, electrical resistivity tomography, QGIS and Esri GIS products, geologic mapping, field data collection, Python Coding, lidar processing, and data analysis. He is adept at management and technical writing and is skilled at public outreach. Specific services include water sampling, soil and soil gas sampling, and Phase I-type assessments. Steffen has been published in several university publications for his research in the Golddust Quadrangle and the Nodena Quadrangle.

RELEVANT EXPERIENCE

Environmental Due Diligence Phase I Environmental Site Assessments (ESAs), Multiple Sites, Axis Energy Services, Midland, TX (2021-2021)
Performed site visits for three Phase Is in San Angelo, Big Lake, and Snyder, Texas for an oil and gas equipment yard acquisition. Wrote a memo-style summary of site findings to be delivered to client as part of a status update.

Superior Well Services Phase I ESAs, Multiple Properties, B-29 Investments, LP., Fort Lupton, CO (2021-2022)
Providing research support for Phase I environmental site assessments. Assisting in support writing with the Houston office.

Buoy Street Environmental Closure of Two Hexane Underground Storage Tanks, Cargill, Memphis, TN (2021-2022)
Field team member for an underground storage tank (UST) closure at the Cargill facility on President's Island. Worked with a Geoprobe-type DPT rig to advance soil borings around the former area of the USTs; collected soil borings every 5 feet to analyze with a photoionization detector; collected the soil samples from the bottom 5 feet with Terracores to have a lab perform analyses for hexane concentrations.

Highway 178 Phase I ESA, Colliers, Olive Branch, MS (2021-2021)
Performed a Phase I ESA of a former cricket ranch with an expedited schedule to meet client objectives. Performed in accordance with ASTM standards or client-directed formats and include historical and regulatory research, evaluation of state and federal environmental databases, visual reconnaissance of the property to document indications of potential environmental impairment, and report preparation.

Metro Purple Line Project Area 3 Engineering Desktop Review of Hydrogen Sulfide and Methane Conditions, Los Angeles Metro, Century Ct/Beverly Hills, CA (2020-2022)
Worked with a horizontal drill at a construction site for an extension of the Los Angeles, California Purple Line subway. Collected soil samples from drill mud for every 20 feet the drill was advanced; collected PID readings for soil samples to detect and volatile organic compounds (VOCs) or methane; organized samples collected in jars and preserved to be sent to a laboratory off-site for further VOC analyses.

Block A Legends Park Phase I and II ESA Addendum, PennRose, LLC, Memphis, TN (2021-2022)
Steffen supported Phase I and II ESA activity, directing excavation to locate buried, impacted soil, mapping the extent of the buried, impacted soil, and as a deliverable to the client.

HECO Remedial Design/Remedial Action Support, Warner Norcross & Judd LLP, Dyersburg, TN (2020-2021)
Steffen supported remedial design/remediation action by delineating a former stream at the client site, taking measurements of the stream for ecological services.

Landfill Limited Environmental Reviews, Select Energy, Various Locations in Texas, North Dakota, Ohio, and Louisiana (2021-2022)
Performing environmental site assessments to establish baseline conditions and identify environmental concerns at oil and gas salt water disposal sites before the client's acquisition.

***Research, Auburn University, Auburn, AL (2020-2021)**
As a Teaching Assistant, Steffen examined the effectiveness of ground penetrating radar for identifying earthquake-related features. He developed GIS analyses for classifying surface features related to materials found in the subsurface, and wrote technical papers and prepared presentations on his findings.

***Groundwater Study, Center for Applied Earth Science and Engineering Research, Memphis, TN (2020)**
As a Senior Water Technician, Steffen led field work to conduct reconnaissance on hydrogeologic areas of interest. He also supervised and performed piezometric analyses of groundwater with relation to the Memphis aquifer, and produced maps in ArcGIS for use by the local water utility company.

Complaint

Complaint No: 46636
Assigned Date: FEB-23-2018
Date Received: FEB-02-2018
How Received: Phone
Concerning: Used Oil
Concering (Other):

Investigation

Status: NOV
Status Detail: Area where engines are pulled had some staining on the ground as well as a few puddles of antifreeze from incidental spillage. Once engines and transmissions are removed they are drained into an oil tank inside the building and used to power a used oil heater. Owner agreed to move the rack onto a concrete surface, remove the stained soil and institute procedures to minimize and contain spillage. An NOV will be sent.
NOV mailed 3/7/18

Incident Notes:	

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Jan 25, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Aug 8, 2022

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Aug 8, 2022

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

Promulgated Sites: SHWS

The Promulgated List made available by Tennessee's Department of Environment and Conservation (TDEC) is a List of Inactive Hazardous Substance Sites. 'Inactive hazardous substance sites that constitute an imminent, substantial danger' is an inactive hazardous substance site where there is a threat of danger to the public health, safety, or environment which is both real and presently existing. This database is state equivalent NPL.

Government Publication Date: Mar 27, 2023

Delisted State Hazardous Waste Sites: DEL SHWS

This database contains a list of sites which have removed from The Promulgated Sites Listing maintained by Tennessee's Department of Environment and Conservation (TDEC).

Government Publication Date: Mar 27, 2023

Solid Waste Disposal Facilities and Landfills: SWF/LF

A list of permitted solid waste and landfill facilities made available by Tennessee's Department of Environment Conservation (TDEC).

Government Publication Date: May 4, 2023

Environmental Activities on USTs: LUST

The Tennessee Department of Environment and Conservation (TDEC) has made available a list of facilities where any type of environment-related activity has occurred due to a tank closure, or a suspected or confirmed release. The information in this list includes the facility's name and address when the environmental activities began, and the as well as the current status of the activities taking place.

Government Publication Date: Apr 27, 2023

Tennessee Petroleum Underground Storage Tank Fund: LUST TRUST

A list of facilities which have applied for reimbursement from the Tennessee Petroleum Underground Storage Tank Fund, made available by Tennessee Department of Environment and Conservation (TDEC).

Government Publication Date: Apr 27, 2023

Delisted Leaking Storage Tanks: DELISTED LST

This database contains a list of leaking storage tank sites and their Funds for reimbursement of costs related to assessment and cleanup that were removed from the Department of Environment and Conservation (TDEC) database.

Government Publication Date: Apr 27, 2023

Hazardous Waste Remedial Action Fund: HWRA

List of sites under the Hazardous Waste Remedial Action Fund (HWARF) program, maintained by Tennessee Department of Environement and Conservation (TDEC). The Division of Remediation uses the Fund to investigate and cleanup environmental problems caused by the release of hazardous substances into the environment.

Government Publication Date: Mar 27, 2023

Delisted Hazardous Waste Remedial Action Fund: DHWR

List of sites which once appeared on - and have since been removed from - the list of sites participating in the Hazardous Waste Remedial Action Fund, made available by Tennessee's Department of Environment and Conservation (TDEC).

Government Publication Date: Dec 20, 2022

Underground Storage Tanks: UST

A list of tank compartments that have been reported to the Division of Underground Storage Tanks in the Department of Environment and Conservation (DEC). Some of the compartments listed, are not regulated by state or federal regulations, because of the substance stored, the size of the compartment, its use, etc. This list is maintained by Tennessee Division of Underground Storage Tanks in DEC.

Government Publication Date: Apr 27, 2023

Delisted Storage Tanks: DEL STORAGE TNK

List of tank compartments is maintained by the Division of Underground Storage Tanks in the Department of Environment and Conservation (DEC). The department would remove a record if the compartment is not regulated. This list contains the non-regulated tank compartments that been removed from the department's tank database.

Government Publication Date: Apr 27, 2023

Sites Remediated with Institutional Controls: INST

List of remediated sites that have institutional controls in place. This list has been made available by Tennessee's Department of Environment and Conservation (TDEC).

Government Publication Date: Mar 27, 2023

Sites Remediated with Engineering Controls: ENG

This list made available by Tennessee's Department of Environment and Conservation (TDEC) is comprised of remediated sites that have engineering controls.

Government Publication Date: Mar 27, 2023

Voluntary Cleanup, Oversight and Assistance Program: VCP

The Voluntary Cleanup Oversight and Assistance Program (VOAP) overlooked by Tennessee's Department of Environment and Conservation (TDEC) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. This list is maintained by the Division of Remediation in Department of Environment and Conservation.

Government Publication Date: Mar 27, 2023

State Remediation Program List: SRP

The State Remediation Program (SRP) was established in 1994 within the Division of Solid Waste Management of the Department of Environmental Conservation (DEC) for the purpose of providing owners, prospective purchasers and other interested parties the means to voluntarily investigate, clean up or monitor contaminated sites not regulated under RCRA, CERCLA or the Tennessee Division of Underground Tanks (UST). This list maintained by Department of Environment and Conservation, Division of Solid waste Management - Site Remediation Program.
Government Publication Date: Mar 27, 2023

Division of Remediation Sites: REMEDIATION

List of remediation sites that are or have been under any of the program in Division of Remediation, Tennessee's Department of Environment and Conservation, including VOAP, DCERP, SRP, etc.
Government Publication Date: Mar 27, 2023

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Tennessee, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in Tennessee, according to the U.S. Department of Interior, Bureau of Indian Affairs.
Government Publication Date: Apr 12, 2019

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Tennessee, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in Tennessee, according to the U.S. Department of Interior, Bureau of Indian Affairs.
Government Publication Date: Oct 14, 2017

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).
Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 28, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. Sites on this list do not necessarily reflect the source/s of contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Jun 30, 2022

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations https://pfasproject.com/pfas-contamination-site-tr acker/

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills: ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 8, 2023

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).
Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA
The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.
Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN
An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP
An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP
Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).
Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER
The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS
The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.
Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS
A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities: DELISTED FED DRY
List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Mar 23, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Drycleaner Environmental Response Program Remediation Sites: PRIORITY CLEAN

Tennessee's Department of Environment and Conservation (TDEC) Division of Remediation operates a program called the Drycleaner Environmental Response Program (DCERP). This program keeps a list of DCERP remediation sites.

Government Publication Date: Mar 27, 2023

Delisted Drycleaner Environmental Response Program Remediation Sites: DELISTED DCER

The list of Drycleaner Environmental Response Program, maintained by the Tennessee's Department of Environment and Conservation Division of Remediation, would remove a record if the program finished the remediation. This list contains all such records that has finished remediation.

Government Publication Date: Dec 20, 2022

Registered Drycleaner Facilities List: DRYCLEANERS

The Drycleaner Environmental Response Program (DCERP) of the Department of Environment and Conservation maintains a list of registered drycleaner facilities.

Government Publication Date: Mar 24, 2023

Delisted Drycleaners List: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Department of Environmental and Conservation.

Government Publication Date: Mar 24, 2023

Registry of Contaminated Properties: CDL

The Department of Environment and Conservation (DEC) maintains a registry of all properties reported by a law enforcement agency that have been under order of quarantine for at least sixty (60) days. These properties have been quarantined due to the criminal activities associated with Clandestine Methamphetamine Laboratories (CML). This list is maintained by The Department of Environment and Conservation (TDEC).

Government Publication Date: Mar 1, 2023

Spills, Emergency Response Data: SPILLS

An inventory of spill locations reported to Tennessee Emergency Management Agency. This list made available by Tennessee Emergency Management Agency (TEMA).

Government Publication Date: Jul 22, 2015

Statewide Petroleum Incident Logging Section (SPILS) List: SPILS

Tenneessee's Statewide Petroleum Incident Logging Section (SPILS) is a new program within the Tennessee Department of Environment and Conservation (TDEC)'s Division of Solid Waste Management (DSWM). The SPILS program log incidents along Tennessee's roadways where a reportable quantity of petroleum products is released to the environment, ensuring that appropriate cleanup standards are applied, remediation activities are completed, and final reports detailing the response are received and reviewed.

Government Publication Date: May 16, 2023

Solid Waste Management (SWM) Complaints: SWM COMPLAINT

List of Solid Waste Management (SWM) complaints in the Tennessee Department of Environment & Conservation (TDEC) Dataviewer.

Government Publication Date: Jan 25, 2021

Hazardous Waste Management Facilities: HWM

List of Hazardous Waste Management Facilities made available by Tennessee's Department of Environment and Conservation. Includes Active, Inactive, Closed, Open, Operating, and Not Operating facilities. This is not a complete list of hazardous waste management facilities permits in the state of Tennessee.

Government Publication Date: May 16, 2023

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit Fs (4.2%)

Map Unit Name:	Filled land, silty (udorthent, silty)
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	
Major components are printed below	
Udorthents, silty(100%)	
horizon H1(0cm to 152cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Fs - Filled land, silty (udorthent, silty)

Component: Udorthents, silty (100%)
Generated brief soil descriptions are created for major soil components. The Udorthents, silty is a miscellaneous area.

Map Unit Gr (36.61%)

Map Unit Name:	Graded land, silty materials(udorthent, silty)
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	
Major components are printed below	
Udorthents, silty(100%)	
horizon H1(0cm to 152cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Gr - Graded land, silty materials(udorthent, silty)

Component: Udorthents, silty (100%)
Generated brief soil descriptions are created for major soil components. The Udorthents, silty is a miscellaneous area.

Map Unit MeB (59.19%)

Map Unit Name:	Memphis silt loam, 2 to 5 percent slopes, northern phase
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.
Major components are printed below	

Soil Information

Memphis(100%)

horizon Ap(0cm to 18cm)	Silt loam
horizon Bt1(18cm to 46cm)	Silty clay loam
horizon Bt2(46cm to 188cm)	Silt loam
horizon C(188cm to 274cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: MeB - Memphis silt loam, 2 to 5 percent slopes, northern phase

Component: Memphis (100%)
The Memphis component makes up 100 percent of the map unit. Slopes are 2 to 5 percent. This component is on loess hills on plains. The parent material consists of fine-silty noncalcareous loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the F134XY002AL Northern Deep Loess Summit - Provisional ecological site. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SHELBY* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SHELBY* County

No Measures/Homes:	144
Geometric Mean:	0.8
Arithmetic Mean:	1
Median:	0.8
Standard Deviation:	0.8
Maximum:	4.4
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of Tennessee conducted during 1986-87. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

Wells from NWIS — **FED USGS**

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well, Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

Appendix

State Sources

County Water Wells **WATER WELLS**

A list of county water well locations maintained by the Division of Water Resources at the Department of Environment and Conservation.

Oil and Gas Wells **OGW**

Oil and Gas Well Data made available by Tennessee Department of Environment and Conservation.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

RE: Completion letter for Legends Park North/West [formerly a portion of Dixie Homes Housing Development [TN1-5 & TN1-9]
DoR Number 79-846

Dear Messrs. Bennett, Willis, Goldstein, and Lipscomb and Ms. Willis:

This letter certifies completion of the tasks set forth in the Brownfield Agreement entered into between the Tennessee Department of Environment and Conservation, Memphis Housing Authority and McCormack Baron Salazar to address the portion of the Dixie Homes property

known as Legends Park North/West property (see Exhibit A) in Memphis, TN. The Department shall require no further action under this Agreement.

I appreciate your efforts to address environmental impacts at this property. For additional or site specific information, please contact the Division of Remediation Memphis Environmental Field Office Manager, Jordan English at 901-371-3039. If I can be of further assistance, please contact me at 615-532-0911.

Sincerely,

Robert A. Binford
Director
Division of Remediation

Dear Mr. Shivas and Ms. Campany:

Pursuant to T.C.A. Section 68-212-225, this letter is to advise you that the Department-approved Notice of Land Use Restriction ("NLUR") for the above-referenced Site was recorded with the Shelby County Recorder of Deeds on January 13, 2012. A copy of the recorded NLUR is enclosed for your records.

In addition, pursuant to T.C.A. Section 68-212-225(a)(2), a copy of the recorded NLUR has been mailed to local governments having jurisdiction over any part of the subject property. Copies of the letters sent to local governments are also enclosed for your records. We will provide you with copies of the return receipts when we receive them back from the U.S. postal service.

Please feel free to contact me should you have any questions.

NOTICE OF LAND USE RESTRICTIONS

Notice is hereby given that pursuant to T.C.A. § 68-212-225 of the *Hazardous Waste Management Act of 1983*, the Commissioner of the Tennessee Department of Environment and Conservation ("TDEC") has determined that land use restrictions are an appropriate remedial action at the below-described property. Pursuant to T.C.A. § 68-212-225(d), the register of deed shall record this Notice and index it in the grantor index under the names of the owners of the land.

Witnesseth:

WHEREAS, the Memphis Housing Authority, a public body organized and existing under active laws of the State of Tennessee ("Grantor") is the owner of an approximate 17.50-acre parcel of real property known as "Legends Park-North/West" (once known as Dixie Homes) located in Memphis, Tennessee 38126, as recorded in Parent Deed Book 3094, Page 267 (Tax Parcel 05101700001) and also part of the Memphis Housing Authority Property as recorded in Instrument No. H2-2047 (Tax Parcel 05101700002), in the Register of Deeds Office, Shelby County and legally described in Exhibit A hereto (such property hereinafter referred to as the "Site,"); and

WHEREAS, Grantor, along with McCormack Baron Salazar, Inc., a Missouri corporation, Community Capital LLC, a Tennessee limited liability company, Legends Park West, L.P., a Tennessee limited partnership and Legends Park North, L.P. (formerly known as Legends Park L.P.), a Tennessee limited partnership (collectively, "Voluntary Party") entered into a Brownfield Voluntary Agreement #79-846 dated September 9, 2010 ("Brownfield Voluntary Agreement") with TDEC pursuant to Tennessee Code Annotated §68-212-224 for the purpose of addressing the real or perceived threat of the presence on the Site of hazardous substances, solid waste or other pollutants; and

WHEREAS, in accordance with work plans approved by TDEC and the terms of the Brownfield Voluntary Agreement #79-846, the Site has been investigated and remediated to levels acceptable for residential use; and

WHEREAS, pursuant to the Brownfield Voluntary Agreement the Grantor has agreed to impose certain land use restrictions on the Site as set forth hereinafter and has agreed to preserve and maintain these restrictions.

NOW, THEREFORE, in consideration of the foregoing, the Grantor hereby declares that the Site should be held, sold, and conveyed subject to the following land use

RECEIVED
JAN 30 2012
MEMPHIS FIELD OFFICE

restrictions. Said land use restrictions shall run with the land and shall be binding on all parties having any right, title or interest in the Site or any part thereof, their heirs, successors, successors-in-title, and assigns, and shall inure to the benefit of each owner thereof and to TDEC and the respective successors and assigns of such parties:

Description of Affected Property (the Site):

The Site is approximately 17.50 acres and is located in Memphis, Tennessee. A legal description of the Site is attached hereto as **Exhibit A** and a map showing the Site is attached hereto as **Exhibit B**.

Land Use Restrictions:

Grantor imposes the following restrictions:

1) The installation of groundwater wells and use of groundwater at, on, under or from the Site is prohibited, except for monitoring or remediation. Prior to any installation of water wells or use of groundwater (other than for monitoring or remediation), the Grantor, its successors, and/or assigns must obtain approval in writing from TDEC.

2) Structures located on Block "D," Block "F" and "Block H" at the Site, in the areas shown on **Exhibit C** ("VMS Areas"), have been equipped with a vapor mitigation system in accordance with the Department-approved work plan entitled "General Specifications for Sub Slab Vapor Barrier and Venting System," dated October 1, 2008 ("Vapor Mitigation System Workplan") as a precautionary measure to prevent the potential for vapors to accumulate in such structures. No one shall disturb or remove any vapor mitigation system at any such structure at the Site, unless first approved in writing by TDEC and pursuant to an approved work plan. Any future replacement structures and any new structures within the VMS Areas shall be equipped with a vapor mitigation system in accordance with the Vapor Mitigation System Workplan or as otherwise approved in writing by the Department.

3) As shown on **Exhibit D**, all known PAH- contaminated soils at the Site have been covered with at least two (2) feet of clean soil fill and an orange plastic witness barrier has been placed below the clean soil to clearly identify the depth below which the contaminated soil is located. These soils must be managed in accordance with the Soil Operations and Maintenance Plan approved by TDEC by letter of November 8, 2011. Any PAH-contaminated soil identified during future development activities at the Site must be managed in accordance with the performance-based approach set forth in the June 19, 2009 letter from Robert A. Binford, Director, Division of Remediation to Robert Lipscomb, Executive Director of the Memphis Housing Authority (which has been incorporated into the Department-approved Soil Operations and Maintenance Plan).

4) Any soils discovered in the future to be impacted with contaminants other than PAHs must also be managed in accordance with a Department-approved soil management plan.

Any approval granted by TDEC for restricted uses shall be in writing, must contain a reference to this instrument, and shall be available for review in a file maintained on the Site or at the offices of the Memphis Housing Authority. Any person or entity that petitions the Department for approval of restricted uses or seeks to cancel or make a Restriction less stringent shall be responsible for any costs incurred by the Department in the review and oversight of work associated with the restriction modification.

Any person or entity owning, leasing, occupying or otherwise using the Site subsequent to the date of this Notice of Land Use Restriction is hereby deemed to have covenanted and agreed not to sue and to have waived and released all rights that such person or entity may have against each Voluntary Party, and each of their parents, subsidiaries, affiliates, successors and assigns and their shareholders, officers, directors, employees and agents for any and all claims, damages, losses, costs and expenses in any way arising out of or in connection with the environmental condition of the Site or the environmental condition of any off-site areas ever affected by the Site, including, but not limited to, claims arising under common law and claims arising under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, or any other federal, state or local statute, regulation or ordinance designed to protect public health or the environment.

Grantor and any successor in title to the Property shall cause all grants, leases and other written transfers of interests in the Property to contain a provision expressly requiring all holders of such interests in the Property to accept such interests subject to the use restrictions, covenants, requirements and releases set forth in this Notice of Land Use Restrictions and not to violate any term or condition of this Notice of Land Use Restrictions. Nothing contained in this Paragraph shall be construed as limiting any obligation of the holder of an interest in the Site to provide any notice required by or pursuant to any federal, state or local law, regulation or ordinance.

Amendment and Termination

This Notice of Land Use Restrictions may be made less stringent or terminated by the Commissioner of TDEC if the risk has been eliminated or reduced so that less restrictive or no land use controls are protective of human health and the environment. No amendment to or termination of this Notice of Land Use Restrictions shall be effective until such amendment or instrument terminating this Notice of Land Use Restrictions is recorded in the Shelby County Register of Deeds.

Enforcement

Any owner of the Site, any unit of local government having jurisdiction over any part of the Site or any person or entity eligible for liability protection under the Brownfield Voluntary Agreement may enforce this Notice of Land Use Restrictions by

means of a civil action. The Commissioner of TDEC may enforce this Notice of Land Use Restrictions through the issuance of an Administrative Order or by means of a civil action, including one to obtain an injunction against present or threatened violations of the restrictions. Pursuant to T.C.A. § 68-212-213, any person who fails, neglects or refuses to comply with a land use restriction commits a Class B misdemeanor and is subject to the assessment of a civil penalty of up to ten thousand dollars ($10,000) per day.

Term

This Notice of Land Use Restrictions shall run with and bind the Site.

Severability

Invalidation of any of these covenants or restrictions by judgment or court order shall in no way affect any other provisions, which shall remain in full force and effect.

IN WITNESS WHEREOF, the undersigned has executed this Notice of Land Use Restrictions this 9th day of January, 2012.

Grantor: MEMPHIS HOUSING AUTHORITY

By: _____
Robert Lipscomb
Executive Director

STATE OF SHELBY
COUNTY OF TENNESSEE

Before me, a Notary Public of the state and county aforesaid, personally appeared Robert Lipscomb, with whom I am personally acquainted (or proved to me on the basis of satisfactory evidence), and who, upon oath, acknowledged himself to be Executive Director of Memphis Housing Authority, a Tennessee public body, corporate and politic under the Housing Authority Laws of the state of Tennessee, the within named bargainor, and that he as such Executive Director, executed the foregoing instrument for the purpose therein contained, by signing the name of the Memphis Housing Authority by himself as Executive Director.

WITNESS MY HAND AND SEAL, at office in Memphis, Tennessee, this 9 day of January, 2012.

Re: Soil Sampling for Lead and Asbestos
Edgeview at Legends Park, Block A
945 Peach Avenue
Memphis, Tennessee

Dear Mr. Thomas,

EnSafe is pleased to submit this report detailing the collection of soil samples on the above-referenced property. The sampling was conducted to determine if lead or asbestos remained in site soil from previous building demolition at concentrations causing human health risks.

Samples were collected by Tennessee-licensed asbestos inspectors in a grid pattern as shown on Figure 1 in Attachment A. Twenty-four surface soil samples (0 to 1 foot below ground surface) were collected using hand auger techniques and wet methods. In the area where soil is being removed for construction (cut), twelve subsurface soil samples were also collected from the 1 to 3-foot interval using hand auger techniques. Soil samples were containerized, labeled, and preserved for submittal under chain-of-custody to two laboratories for analysis.

Samples for asbestos analysis were submitted to Crisp Analytical in Carrolton, Texas. Samples were analyzed using polarized light microscopy (PLM), Environmental Protection Agency (EPA) Method 600. Samples for lead analysis were submitted to Waypoint Analytical in Memphis, Tennessee. Samples were analyzed using EPA Method 6010.

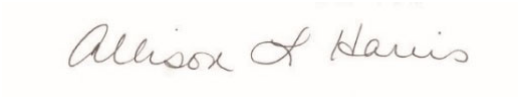
Analytical results are provided for both analyses in Table 1 in Attachment B. The laboratory analytical reports are provided in Attachment B for asbestos and Attachment C for lead. The lead analytical results were compared to the residential U.S. EPA Regional Screening Level and the Tennessee background concentration for lead from the Background Hazardous Trace Elements in Tennessee Soils, TDEC Report of Investigation No 49 (2001).

Asbestos was not detected in any of the soil samples collected. Only one soil sample (LEGSSB1103, 60.1 milligrams per kilogram) was slightly above the Tennessee background concentration for lead of 45 milligrams per kilogram. None of the samples exceeded the U.S. EPA

Residential Regional Screening Level for lead of 400 milligrams per kilogram. Based on the analytical results, no further action is required for lead and asbestos in site soil.

Respectfully submitted,

EnSafe Inc.



Allison Harris, PG
Senior Project Manager/Professional Geologist

Materials Characterization - Bulk Asbestos Analysis

Laboratory Analysis Report - Polarized Light

Ensafe, Inc
5724 Summer Trees Drive
Memphis, TN 38134

Customer Project: 888834888 Edgeview at Legends Park, E
Reference #: CAL23032188RL Date: 03/21/23

Analysis and Method

Summary of polarized light microscopy (PLM / Stereomicroscopy bulk asbestos analysis) using the methods described in 40CFR Part 763 Appendix E to Subpart E (Interim and EPA 600 / R-93 / 116 (Improved). The sample is first viewed with the aid of a stereomicroscope. Numerous liquid slide preparations are created for analysis under the polarized microscope where identifications and quantifications are preformed. Calibrated liquid refractive oils are used as liquid mouting medium. These oils are used for identification (dispersion staining). A calibrated visual estimation is reported, should any asbestiform mineral be present. Other techniques such as acid washing are used in conjugation with refractive oils for detection of smaller quantities of asbestos. All asbestos percentages are based on calibrated visual estimation traceable to NIST standards for regulated asbestos. Traceability to measurement and calibration is achieved by using known amounts and types of asbestos from standards where analyst and laboratory accuracy are measured. As little as 0.001% asbestos can be detected in favorable samples, while detection in unfavorable samples may approach the detection limit of 0.50% (well above the laboratory definition of trace).

Discussion

Vermiculite containing samples may contain trace amounts of actinolite/tremolite. When not detected by PLM, these samples should be analyzed using TEM methods and / or water separation techniques. Suspected actinolite/vermiculite presence will be indicated through the sample comment section of this report.

Fibrous talc containing samples may contain a regulated asbestos fiber known as anthophyllite. Under certain conditions the same fiber may actually contain both talc and anthophyllite (a phenomenon called intergrowth). Again, TEM detection methods are recommended. CA Labs PLM report comments will denote suspected amounts of asbestiform anthophyllite with talc, where further analysis is recommended.

Some samples (floor tiles, surfacings, etc.) may contain fibers too small to be detectable by PLM analysis and should be analyzed by TEM bulk protocols.

A "trace asbestos" will be reported if the analyst observes far less than 1% asbestos. CA Labs defines "trace asbestos" as a few fibers detected by the analyst in several preparations and will indicate as such under these circumstances.

Since allowable variation in quantification of samples close to 1% is high, <1% may be reported. Such results are ideal for point counting, and the technique is mandatory for friable samples (NESHAP, Nov. 1990 and clarification letter 8 May 1991) under 1% percent asbestos or "trace asbestos". **In order to make all initial PLM reports issued from CA Labs NESHAP compliant, all <1% asbestos results (except floor tiles) will be point counted at no additional charge.**

Qualifications

CA Labs is accredited by the National Voluntary Accreditation Program (NVLAP) for selected test methods for airborne fiber analysis (TEM), and for bulk asbestos fiber analysis (PLM). CA Labs is also accredited by AIHA LAP, LLC. in the PLM asbestos field of testing for Industrial Hygiene. All analysts have completed college courses or hold a degree in a natural science (geology, biology, or environmental science). Recognition by a state professional board in one these disciplines is preferred, but not required. Extensive in-house training programs are used to augment the educational background of the analyst. The Laboratory Director and Quality Manager have received supplemental McCrone Research training for asbestos identification. Memphis, TN, 38134

Ref: Analytical Testing
Lab Report Number: 23-075-0057
Client Project Description: Legends Park, Block A
198 N. Pauline-Memphis, TN
Project No. 0888834888

Dear Mr. Bryan Brister:
Waypoint Analytical, LLC. received sample(s) on 3/16/2023 for the analyses presented in the following report.

The above referenced project has been analyzed per your instructions. The analyses were performed in accordance with the applicable analytical method. Where the laboratory was not responsible for the sampling stage (refer to the chain of custody) results apply to the sample as received.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance.

The results are shown on the attached Report of Analysis(s). Results for solid matrices are reported on an as-received basis unless otherwise indicated. This report shall not be reproduced except in full and relates only to the samples included in this report.

Please do not hesitate to contact me or client services if you have any questions or need additional information.

Sincerely,

Rebekah Ross

Rebekah Ross
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis.

Project: Legends Park, Block A
Lab Report Number: 23-075-0057
Date: 3/21/2023

CASE NARRATIVE

Metals Analysis Method 6010D
Sample 81642 (LEGSSB12-01)
Analyte: Lead
QC Batch No: L670759/L670301
The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A dilution test was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Re: Soil Gas Sampling
Block A, Legends Park Subdivision
Memphis, Tennessee

Dear Mr. Thomas:

EnSafe Inc. is pleased to provide this Soil Gas Sampling Letter Report for Block A (Site) at the Legends Park Subdivision in Memphis, Tennessee.

SITE DESCRIPTION AND HISTORY

The Site is located on a 4.77-acre vacant parcel (Shelby County Parcel 051017 00018) within the 30.91-acre Legends Park Subdivision. According to the Phase I ESA performed by EnSafe (December 2021), the Site has been developed since at least 1897 with single- and multi-family residences and was part of the Dixie Homes public housing development from 1937 until 2006 when the area was cleared for redevelopment as the Legends Park Subdivision. Additionally, the Phase I ESA identified a former clothes cleaner and presser at the Site. No further information regarding operations at the cleaners was identified, but it could have potentially operated as a drycleaner. Additionally, soils containing polyaromatic hydrocarbons (PAHs) were used as fill material during redevelopment of the west-adjacent property.

The Site is included in the Brownfield Voluntary Agreement (BVA) Site 79-846, effective date September 9, 2009. The BVA was based on the presence of hydrocarbons and dry-cleaning solvents in soil gas and groundwater south (hydraulically upgradient) of the Site. The BVA instituted Land Use Restrictions on the Site; these include the prohibition of water wells and use of groundwater on the property, the management of any discovered contaminated soils in accordance with a Tennessee Department of Environmental Conservation (TDEC)-approved soil management plan and the installation of soil vapor mitigation systems for buildings constructed at the property if needed.

Prior soil gas sampling was conducted by EnSafe on December 8 through 10, 2021 as part of a Phase II Environmental Site Assessment (ESA). The December 2021 analytical results showed twenty-seven detected VOCs in soil gas sampled from five locations across the Site, not within the

proposed building footprint. Two VOCs (benzene and naphthalene) exceeded their respective residential VISLs at one location with naphthalene also exceeding its commercial VISL. Additionally, the calculated carcinogenic risk at this sample location exceeded the risk threshold of 1E-05. This sampling event evaluated soil gas within the footprint of the proposed building for potential chemicals of concern associated with historical operations at the Site and surrounding area properties.

DATA COLLECTION PROCEDURES

Soil gas sampling was conducted at the Site following the procedures outlined in the approved Soil-Gas Sampling Proposal, dated January 30, 2023. Due to wet conditions and equipment failures, field work was conducted on three dates in 2023: February 20, February 28, and March 7. On February 20, the flow controller failed at SG07 and SG08, and water was pulled at SG09. All other soil-gas samples (SG06, SG10, SG11, and SG12) were collected. On February 28, soil gas samples at SG07 and SG08 were successfully collected, but water was pulled at SG09. On March 7, a soil gas sample at SG09 was collected. Sample locations are shown on Figure 1 (Attachment A).

Before initiating field sampling, Tennessee One Call and a private subsurface utility location service identified the locations of buried utilities and other structures that would be damaged or would prevent the advancement of soil borings at each sampling location.[1] Boring locations were adjusted to avoid the presence of anomalies indicating unknown objects and/or utilities in the shallow soils.

Soil Gas Sampling

Seven soil gas sampling points were advanced to 3-5 feet below the ground surface using a hammer drill. At each location, a stainless-steel screen probe and 0.25-inch diameter Teflon tubing were inserted in the borehole. The screens were secured in place with sand. Bentonite clay was used at the surface to seal the borehole and to prevent infiltration from ambient air.

Before sampling, the soil gas borings were allowed to stabilize for a minimum of 2 hours. All fittings on the Summa manifolds were inspected for a proper fit and seal using shut-in tests. Shut-in tests were performed by using a purge canister to create a vacuum in the sample train and the gauge on the manifold was observed for at least 2 minutes to determine if the pressure remained stable. Each system was purged using a sacrificial Summa canister or syringe. Isopropanol was used as a tracer gas to indicate any potential leaks within each sample setup. Soil gas samples were collected in laboratory-provided, individually-certified, 6-liter Summa canisters with a designated soil gas manifold. The manifolds' flow rates were set to 200 milliliters per minute by the laboratory. Each sample was collected over an approximately 30-minute period.

All samples, along with pre and post-canister vacuum pressures, canister serial numbers, sample identifications, sampling dates, and required analyses were recorded on the chain-of-custody form. The samples were shipped via overnight courier to Pace National of Mount Juliet, Tennessee.

[1] The private subsurface utility locater, Alsip Locating Service, used ground-penetrating radar equipment to look for the presence of underground utilities and other structures at the sampling locations.

Canisters were analyzed using the United States Environmental Protection Agency (U.S. EPA) Method TO-15 for VOCs. Field sampling logs for soil gas samples are included in Attachment B.

ANALYTICAL RESULTS

Analytical results for the soil gas samples were compared to the November 2022 U.S. EPA Vapor Intrusion Screening Levels (VISL) for residential air. In accordance with TDEC guidance, detected chemicals were evaluated based on the cumulative target lifetime carcinogenic risk of 10E-6 and a target noncarcinogenic hazard quotient of 0.1. Laboratory detections for the soil gas samples are summarized in Table 1 (Attachment C). Laboratory reports for soil gas are provided in Attachment D. Twenty-three VOCs were detected in soil gas sampled from the seven locations at the Site, and no VOCs were reported above U.S. EPA residential VISLs.

Risk screening was performed using the U.S. EPA VISL Risk Calculator. Input parameters for the U.S. EPA VISL calculator included location-specific concentrations and default exposure assumptions for risk screening; VISL risk outputs are provided in Attachment E and summarized in Table 1 (Attachment C). TDEC generally requires response actions (which could include a vapor barrier, mitigation system, monitoring, etc.) when risk is above 1E-05 and/or the hazard quotient is above 1.0. For the residential exposure scenario, carcinogenic risk ranged from 2.49E-10 to 2.38E-07 and the hazard quotient ranged from 0.00963 to 0.0386.

CONCLUSIONS

During this February/March 2023 soil gas sampling event, twenty-three VOCs were detected in soil gas sampled from the seven locations at the Site and none of these VOCs were reported above U.S. EPA residential VISLs. Additionally, both the calculated carcinogenic risk and hazard quotients were below levels that would prompt TDEC to require response actions.

LIMITATIONS

The information presented in this report was obtained through performance of the approved proposal dated January 30, 2023. Report users should recognize that any sampling or testing activities are inherently limited, in that conditions at other locations and depths within the Site may vary from those at the locations where samples or measurements were obtained. The ability of EnSafe to interpret results and draw conclusions about Site conditions is similarly limited and subject to the availability and quality of information that led EnSafe to select sampling or measurement locations, and to practical limits in the extent of sampling that was conducted. EnSafe has conducted the professional assessment services with a level of care and skill consistent with generally accepted environmental consulting industry standards.

Report results apply solely to conditions existing at the time that EnSafe obtained samples or conducted tests. Only the party for whom this report was originally prepared has the right to make use of and rely upon this report. Reuse of this report or any portion thereof for other than its intended purpose shall be at the user's sole risk. EnSafe makes no representation as to the accuracy or completeness of information prepared by other parties.

Sincerely,

EnSafe Inc.

Soil Gas Sampling Logs

Vapor Intrusion Assessment Field Sampling Form				
Site Location	Edgeview at Legends Park, Memphis, Tennessee			
Project Name	Legends Park, Block A Soil Gas Sampling			
Project Number	0888834477/001			
Personnel	Griffin Heard			
Sample ID	LEGASG06	LEGASG07	LEGASG08	LEGASG09
Date	2/20/2023	2/20/2023	2/20/2023	2/20/2023
Sub-Slab, Near-Slab, or Soil Gas?	Soil Gas	Soil Gas	Soil Gas	Soil Gas
Sample Type (Summa, Tedlar, Syringe, etc.)	Summa	Summa	Summa	Summa
Was leak testing performed?	Yes	Yes	Yes	Yes
What type? (check dam, Helium shroud, IPA)	IPA	IPA	IPA	IPA
Were leaks indicated?				
If He, shroud/purge He concentrations (%)	N/A	N/A	N/A	N/A
Final He concentration (%)	N/A	N/A	N/A	N/A
If using IPA or He, has analysis been requested from lab?	N/A	N/A	N/A	N/A
Was shut-in test performed?	Yes	Yes	Yes	Yes
Duration of test (sec)	120	120	120	120
Canister Vacuum pre-test (inHg)	21	25	20	21
Canister Vacuum post-test (inHg)	21	25	20	21
Purge Method (sacrificial summa, syringe, other)	Sac. Summa	Sac. Summa	Sac. Summa	Sac. Summa
Purge Rate (mL/min)	200	200	200	200
Volume Purged (mL)	400	400	400	400
Was purge gas screening performed?	No	No	No	No
Canister Size	6 L	6 L	6 L	6 L
Sampling Duration (24 hr, 12 hr, 8 hr, grab)	Grab	Grab	Grab	Grab
Canister #	12070	6305	11963	11963
Flow Controller #	20971	7026	21701	11042
Sample Start Time	1332	1337	1426	NA
Sample End Time	1344	1337	1428	NA
Canister Starting Vacuum (inHg)	26.5	19.5	25	NA
Canister Ending Vacuum (inHg)	4	0	5	NA
Analysis	TO-15	TO-15	TO-15	TO-15
Floor Conditions (concrete, wood, carpet, other)	Grass	Grass	Grass	Grass
Visible cracks, sumps, utility penetrations?				
VOC sources in area?	No	No		No
Other Comments		Flow controller failure?	ster from SG09, redo shole; water coming up during purge

ANALYTICAL REPORT

February 22, 2023

ENSAFE - Memphis

Sample Delivery Group:	L1587655
Samples Received:	02/21/2023
Project Number:	34477
Description:	Legends Park, Block A Soil Gas Sampling
Site:	EDGEVIEW AT LEGENDS PARK
Report To:	Chelsey Kipper 5724 Summer Trees Drive Memphis, TN 38134

Entire Report Reviewed By:

Jennifer Gambill
Project Manager

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Jennifer Gambill

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
	The remainder of this page intentionally left blank, there are no qualifiers applied to this SDG.

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
J	The identification of the analyte is acceptable; the reported value is an estimate.
J4	The associated batch QC was outside the established quality control range for accuracy.

Re: Soil Sampling for Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons, and Metals
Edgeview at Legends Park, Legends Park, Block A
Memphis, Tennessee

Dear Mr. Thomas,

EnSafe is pleased to submit this report detailing the collection of soil samples on the above-referenced property. The sampling was conducted to determine if volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), and Resource Conservation and Recovery Act 8 metals remained in site soil at concentrations causing human health risks.

Samples were collected in a grid pattern as shown on Figure 1 in Attachment A. Twenty-two surface soil samples (0 to 1 feet below ground surface [bgs]) were collected using hand auger techniques. In the area where soil is being removed for construction (cut), eleven subsurface soil samples were also collected from the 1 to 3-feet, 3 to 4-feet, 4 to 5-feet, and/or 8 to 9-feet interval using hand auger techniques. Soil samples were containerized, labeled, and preserved for submittal under chain-of-custody to Waypoint Analytical in Memphis, Tennessee. Soil samples were analyzed using EPA Method 8260 for VOCs, EPA Method 8270 for PAHs, and EPA Method 6010 for Resource Conservation and Recovery Act 8 metals.

Soil analytical results were compared to the November 2022 U.S. EPA regional screening levels (RSLs) for residential and industrial land use and Tennessee Department of Environment and Conservation (TDEC) Hazardous Trace Elements in Tennessee Soil Background Levels (TDEC 2001). Analytical results are provided in Table 1 in Attachment B. The laboratory analytical reports are provided in Attachment C.

Analytical Results

All detected VOCs were reported below their respective residential and industrial RSLs in the samples collected.

Concentrations of arsenic exceed both residential and industrial RSLs in all of the collected soil samples, except sample location SB43 at 3 to 4 feet which exceeded only the residential RSL. Arsenic concentrations at SB26 at 0-1 feet bgs, SB26 at 1-3 feet bgs, SB28 at 0-1 feet bgs, SB40 at 0-1 feet bgs, SB44 at 0-1 feet bgs, and SB46 at 0-1 feet bgs also exceeded the TDEC

background concentration of 10 milligrams per kilogram (mg/kg). Barium concentrations at SB25 at 1-3 feet bgs, SB28 at 0-1 feet bgs, SB35 at 8-9 feet bgs, and SB44 at 0-1 feet bgs were the only locations to exceed the TDEC background concentration of 144 mg/kg; however, all barium concentrations are below the residential and industrial RSLs. All cadmium concentrations are below the residential and industrial RSLs and TDEC background concentrations, except at SB28 at 0-1 feet bgs which exceeded the residential RSL and TDEC background concentration. Chromium concentrations exceeded the TDEC background concentration of 20 mg/kg at SB28 at 0-1 feet bgs and SB44 at 0-1 feet bgs; however, all chromium concentrations are below the residential and industrial RSLs. Lead concentrations exceeded the TDEC background concentration of 45 mg/kg at SB28 at 0-1 feet bgs, SB29 at 1-3 feet bgs, SB31 at 0-1 feet bgs, and SB41 at 0-1 feet bgs; however, all lead concentrations are below the residential and industrial RSLs. The concentration of mercury at SB28 at 0-1 feet bgs exceeded the TDEC background concentration of 0.18 mg/kg; however, all mercury concentrations are below the residential and industrial RSLs. The elevated metals concentrations appear to be primarily in the surficial soils with the highest concentrations detected in SB28 at 0-1 feet bgs as indicated on Figure 2.

Benzo(a)anthracene exceeded the residential RSL in soil samples collected at SB25 at 0-1 feet bgs, SB42 at 0-1 feet bgs, and SB42 at 1-3 feet bgs. Concentrations of benzo(a)pyrene (BaP) exceeded both residential and industrial RSLs in the soil sample collected from SB25 at 0-1 feet bgs and only the residential RSL in the soil samples collected from SB27 at 0-1 feet bgs, SB28 at 0-1 feet bgs, SB30 at 0-1 feet bgs, SB31 at 0-1 feet bgs, SB34 at 0-1 feet bgs, SB35 at 0-1 feet bgs, SB36 at 0-1 feet bgs, SB36 at 3-4 feet bgs, SB37 0-1 feet bgs, SB38 0-1 feet bgs, SB38 at 1-3 feet bgs, SB40 at 0-1 feet bgs, SB41 0-1 feet bgs, SB42 at 0-1 feet bgs, SB42 at 1-3 feet bgs, and SB43 at 0-1 feet bgs. Benzo(a)fluoranthene concentrations exceeding the residential RSL were collected from soil samples at SB25 at 0-1 feet bgs and SB42 at 1-3 feet bgs. Dibenz(a,h)anthracene concentrations exceed the residential RSL of 0.11 mg/kg at SB25 at 0-1 feet bgs, SB42 at 0-1 feet bgs, and SB42 at 1-3 feet bgs. All indeno(1,2,3-cd)pyrene concentrations are below the residential and industrial RSLs, except at SB25 at 0-1 feet bgs which exceeds the residential RSL. PAHs at the highest concentrations were detected in SB25 at 0-1 feet bgs.

Benzo(a)pyrene Data Evaluation

A comparison of the cumulative toxicity for the suite of detected PAHs was performed because not all PAHs have the same toxicity or ability to cause illness and adverse health effects. The most toxic chemicals in the group are BaP and dibenz(a,h)anthracene. Because they are the most toxic, these PAHs are the standard by which other PAHs are assessed. To provide an overall assessment of the potential risks from the entire class of PAHs, a U.S. EPA-accepted toxicity equivalency factor (TEF) calculation was employed. The concentrations of

Toxicity Equivalence Factors for BaP

Compound	TEF
Benzo(a)pyrene	1
Benzo(a)anthracene	0.1
Benzo(b)fluoranthene	0.1
Benzo(k)fluoranthene	0.01
Chrysene	0.001
Dibenz(a,h)anthracene	1
Indeno(1,2,3-cd)pyrene	0.1

other PAHs measured in the environment are converted to a BaP equivalent concentration based on how toxic they are relative to these two compounds. This is accomplished by multiplying their reported concentrations by their respective TEF values (listed to the right). These converted TEF concentrations are then summed to determine the BaP equivalency (BEQ) concentration for each sample. The BEQ results can then be assessed by comparing the calculated value against the TDEC Division of Remediation-provided residential BEQ soil screening value. The calculated BEQ results are shown on Table 1. The calculation of the residential BEQ screening level was provided by TDEC Division of Remediation via email on May 5, 2023, and is presented in Attachment D.

The BEQ results from the 35 soil samples across the Site were compared to the 1.15 mg/kg residential BEQ screening level. BEQ concentrations exceeded the 1.15 mg/kg screening level in three samples, SB25 from 0 to 1-foot bgs (3.605 mg/kg), SB42 from 0-1-foot bgs (1.681 mg/kg), and SB42 from 1 to 3-feet bgs (2.093 mg/kg). The two locations are shown on Figure 2.

Conclusions and Recommendations

Elevated concentrations have been identified at three locations which are SB28, SB25 and 2B42. This site is a cut fill site (i.e., soil will be moved around the site to adjust site elevations) and the soil can be moved to areas covered by a hardscape or removed from the site. The Soil Management Plan will need to be updated to address these actions as needed.

Respectfully submitted,

EnSafe Inc.

Allison Harris

Ref: Analytical Testing
Lab Report Number: 23-111-0041
Client Project Description: Legends Park
198 N. Pauline-Memphis, TN
Project No. 0888834617

Dear Ms. Allison Harris:
Waypoint Analytical, LLC. received sample(s) on 4/20/2023 for the analyses presented in the following report.

The above referenced project has been analyzed per your instructions. The analyses were performed in accordance with the applicable analytical method. Where the laboratory was not responsible for the sampling stage (refer to the chain of custody) results apply to the sample as received.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance.

The results are shown on the attached Report of Analysis(s). Results for solid matrices are reported on an as-received basis unless otherwise indicated. This report shall not be reproduced except in full and relates only to the samples included in this report.

Please do not hesitate to contact me or client services if you have any questions or need additional information.

Sincerely,

Rebekah Ross

Rebekah Ross
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis.

CASE NARRATIVE

Semivolatile Organic Compounds - GC/MS (SIM) Method 8270D SIM
Sample 81022 (LEGSSB25-01)
QC Batch No: L677852/L677721
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.

Sample 81022 (LEGSSB25-01)
QC Batch No: L677852/L677721
Matrix spike/matrix spike duplicate recoveries are outside of control limits. Acceptable LCS recovery indicates the system was in control, but the reported result could be affected by matrix interference.

Sample 81026 (LEGSSB27-01)
QC Batch No: L677852/L677721
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.

Sample 81031 (LEGSSB31-01)
QC Batch No: L677852/L677721
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.

Sample 81035 (LEGSSB34-01)
QC Batch No: L677852/L677721
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.

Sample 81050 (LEGSSB42-01)
QC Batch No: L677866/L677722
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.

Sample 81051 (LEGSSB42-03)
QC Batch No: L677866/L677722
The sample was diluted due to the nature of the sample matrix. Reporting limits have been adjusted accordingly.
